### **Highlights of the Instructional Courses ,1996      Content-Based Instruction in Foreign Language Education**

Stephen B. Stryker,Betty Lou Leaver,1997-09-01 This book offers concrete and practical ideas for implementing content based instruction using subject matter rather than grammar through eleven case studies of cutting edge models in a broad variety of languages academic settings and levels of proficiency The highly innovative models illustrate content based instruction programs for both commonly and less commonly taught languages Arabic Croatian French German Indonesian Italian Russian Serbian and Spanish and for proficiency levels ranging from beginners to fluent speakers They include single teacher and multi teacher contexts and such settings as typical language department classrooms specialty schools intensive language programs and university programs in foreign languages across the curriculum All of the contributors are pioneers and practitioners of content based instruction and the methods they present are based on actual classroom experiences Each describes the rationale curriculum design materials and evaluation procedures used in an actual curriculum and discusses the implications of the approach for adult language acquisition      International Handbook of Primary Technology Education

Clare Benson,Julie Lunt,2011-11-16 This international handbook offers an in depth study of the development of primary Technology or Design and Technology education worldwide It is unique in that it focuses on the way in which the building blocks for this subject have been established providing much needed research and information for those involved with secondary education and beyond to draw on The inclusion of Technology education into primary curricula has gathered momentum for the last two decades as its importance and relevance to children s lives has been realised by educators This handbook offers a detailed insight into the many and varied ways in which countries have incorporated the subject into children s primary school experiences and issues that have arisen during its implementation The authors all work in the field of primary technology education and have been actively involved in curriculum development and research in their own countries The first part of the book is devoted to the introduction the development and implementation of Technology education into the primary curricula of countries worldwide Reasons for this movement successes and barriers to development are discussed and speculation about the future of Technology education is reflected upon The second part of the book relates to issues that have arisen as the subject has grown over the last twenty years and consideration needs to be given to these if future successes are to be achieved Classroom practice including designing and ICT teacher education enterprise sustainability and indigenous technology are all reflected upon and support the notion of technology as a valued and valuable part of the primary curriculum This book should be of interest to undergraduate and graduate students practitioners researchers curriculum developers policy makers and professional development providers who are involved with and have an interest in primary technology education worldwide      **Critical Perspectives on Plurilingualism in**

**Deaf Education** Kristin Snoddon,Joanne C. Weber,2021-07-12 This book is the first edited international volume focused on

critical perspectives on plurilingualism in deaf education which encompasses education in and out of schools and across the lifespan The book provides a critical overview and snapshot of the use of sign languages in education for deaf children today and explores contemporary issues in education for deaf children such as bimodal bilingualism translanguaging teacher education sign language interpreting and parent sign language learning The research presented in this book marks a significant development in understanding deaf children s language use and provides insights into the flexibility and pragmatism of young deaf people and their families communicative practices It incorporates the views of young deaf people and their parents regarding their language use that are rarely visible in the research to date     Education for Sustainability Colleen McNerney,Norah D. Ellis,Amanda J. Gregory,B.R. Mears-Young,Gillian Ragsdell,2013-06-29 The systems movement now 40 years old is made up of many associations of systems thinkers from different disciplines all over the world The United Kingdom Systems Society UKSS was formed in 1978

Today it has over 300 members and is committed to the development and promotion of systems philosophy theory concepts and methodologies for improving decision making for the benefit of organizations and wider society The first UKSS International Conference was held at the University of Hull in July of Huddersfield 1989 Since then we have held International Conferences at the Universities 1991 and Paisley 1993 The UKSS International Conferences are now an established biannual event and this our fourth international conference will be jointly hosted by the Universities of Hull and Humberside Systems science is considered to be a trans discipline which promotes critical and effective intervention in complex organisational and social problem situations As such it traverses hard through soft to critical systems thinking and methodologies Yet despite the currently robust state of the UKSS the systems movement cannot be described as an international movement different subdisciplines are at different stages of development and are often engaged in pursuing their own particular interests and themes with little conversation between the subdisciplines despite their common interest in systems *Teaching the*

*Separate But Equal?* Tony Edwards, Carol Fitz-Gibbon, Frank Hardman, Roy Haywood, Nick Meagher, 2005-08-19 This book looks in detail at the strong contrasts in the provision traditionally made for academically and vocationally minded students and looks at differences and similarities in practice The chapters report evidence of how students on both sides think they have been taught They also report on how those students prefer to learn how their teachers define the kinds of learning appropriate for particular qualifications and how the organisation of learning for different but equal qualifications was observed in forty schools and colleges The book's main focus is on the objectives and processes of learning at a stage which is certainly being transformed but which is still powerfully shaped by myths about the sixth form and education of leaders
