Foundations Of Power:

Foundations of Power and Conflicts of Authority in Late-antique Monasticism Alberto Camplani, Giovanni Filoramo, 2007

The volume offers the acts of a meeting held at the University of Turin on the foundations of power and the conflicts of authority as documented by the monastic sources of East and West in Late Antiquity with special reference to Max Weber's analysis of these notions. The issue is here examined from a variety of perspectives: the different meanings of power and authority in ancient monastic sources; the criteria by which authority is established within the monastic organizations; the kind of power and authority exercised towards outsiders; the relationship between monks and other authorities, especially the Church; the monks and their economic activity; the strategies for the solution of conflicts. The wide range of historical and cultural problems raised by these questions is what the present volume tries to illuminate through individual studies of a number of specific phenomena, events and figures from Shenute to John Cassian, from Abraham of Kashkar to Maxim the Confessor, paying particular attention to monasticism in Egypt, Palestine, Africa and Persia.

Foundations of Pulsed Power Technology Jane Lehr, Pralhad Ron, 2017-07-24. Examines the foundation of pulse power technology in detail to optimize the technology in modern engineering settings. Pulsed power technologies could be an answer to many cutting edge applications. The challenge is in how to develop this high power high energy technology to fit current market demands of low energy consuming applications. This book provides a comprehensive look at pulsed power technology and shows how it can be improved upon for the world of today and tomorrow. Foundations of Pulsed Power Technology focuses on the design and construction of the building blocks as well as their optimum assembly for synergetic high performance of the overall pulsed power system. Filled with numerous design examples throughout the book offers chapter coverage on various subjects such as Marx generators and Marx like circuits, pulse transformers, pulse forming lines, closing switches, opening switches, multi gigawatt to multi terawatt systems, energy storage in capacitor banks, electrical breakdown in gases, electrical breakdown in solids, liquids and vacuum, pulsed voltage and current measurements, electromagnetic interference and noise suppression, and EM topology for interference control. In addition, the book acts as a reference for practicing engineers as well as a teaching text. Features relevant design equations derived from the fundamental concepts in a single reference. Contains lucid presentations of the mechanisms of electrical breakdown in gaseous, liquid, solid and vacuum dielectrics. Provides extensive illustrations and references. On Power: Neurophilosophical

Foundations and Policy Implications Nayef R. F. Al-Rodhan, 2022-02-08. On Power Neurophilosophical Foundations and

Policy Implications seeks to provide a historical contemporary and predictive analysis of power. It aims to explain the history of political power in a unique way by approaching the concept of power through the lens of neurophilosophy, the application of neuroscientific principles to practical questions of governance, ethics, political and moral philosophy. In this book, Professor Nayef Al Rodhan provides an accessible, incisive and provocative take on the history, nature and future of power. His insights go beyond conventional wisdom by exploring some of the themes that will become increasingly relevant to analysing power in the decades to come. A central idea of the book is the highly addictive, universal nature of power at the neurochemical level, the craving for it and the intense resistance to giving it up in all walks of life and circumstances. This can be applied directly to thinking about governance, political change, public policy, national and international peace, security and prosperity. Al Rodhan formulates an innovative conceptual picture of power by integrating the findings of neuroscience with the broader implications of power in the era of digital connectivity and cognitive and physical enhancement technologies. In doing so, he guides our approach to political power and public policy influenced by ubiquitous disruptive and intrusive technologies. This book will appeal to students and scholars of neuroscience, philosophy, government, business and international relations. It will also hold particular interest for politicians, public servants, think tankers, policy makers and journalists, as well as senior executives from the corporate, sports, media and entertainment world.

The Gates Foundation's Rise to Power Adam Moe Fejerskov, 2018-05-11. The Bill and Melinda Gates Foundation has established itself as one of the most powerful private forces in global politics, shaping the trajectories of international policy making. Driven by fierce confidence and immense expectations about its ability to change the world through its normative and material power, the foundation advances an agenda of social and economic change through technological innovation. And it does so while forming part of a movement that refocuses efforts towards private influence on and delivery of societal progress. The Gates Foundation's Rise to Power is an urgent exploration of one of the world's most influential but also notoriously sealed organizations. As the first book to take us inside the walls of the foundation, it tells a story of dramatic organizational change, of diverging interests and influences, and of choices with consequences beyond the expected. Based on extensive fieldwork inside and around the foundation, the book explores how the foundation has established itself as a major political power, how it exercises this power, but also how it has been deeply shaped by the strong norms, ideas, organizations and expectations from the field of global development. The book will be of interest to scholars and students of global development, international relations, philanthropy and organizational theory.

The Governance of Philanthropic Foundations in Authoritarian China Qian Wei, 2022-12-16. This book is the first monograph to provide a multilevel analysis of power dynamics underlying the governance of philanthropic foundations in the authoritarian context of China. As a special kind of organization with a democratic culture, Chinese foundations' governance is under more pressure than we realize. The government has been evolving its methods to impose stringent control over foundations. Chapter 3 and purer foundations highly dependent on individual donations are more likely

to adopt authoritarian leadership styles rather than being mechanisms spreading democratic values in Chinese society Chapter 4 However this practice does not come without a price Given power s double edge of both enabling and constraining effects although strongman leaders may use their power to get things done their power may also cause the problem of accountability Chapter 5 Overall Chinese society is a stable system with authoritarian power modes This system is not static but in constant flux homogenizing incompatible parts until all units of the system adopt the same power mode This book establishes a comprehensive and bleak picture of the unfavorable conditions foundations in China face and provides valuable insights to understand the future of the nonprofit sector in China This book will be of interest to students and researchers in the fields of sociology political science and nonprofit studies NGO management It will also be a valuable resource for NGP practitioners **Power**, 1929 **POWER** 237 Guy Gweth, **Power and Influence after the Cold War** Ann L.
