Apaczynski, 1982 Originally published by the College Theology Society in 1982 this collection of essays addresses issues of religious literacy The explorations forming the unifying motif here focus on where religious classics can be found today how they are encountered and how their meaning is properly grasped and expressed These concerns are vital to those engaged professionally in the transmission assimilation and creative development of our cultural heritage Co published with the College Theology Society *Joining the Revolution in Theology* Sandra Yocum Mize, 2007 A Sheed drawing boundaries fighting battles 1985 1994 Theology in local and global perspective 1985 1994 Negotiating the golden years 1995 2004 Nos quedamos 1995 2004 *The Routledge Handbook of Religious Literacy, Pluralism, and Global Engagement* Chris Seiple, Dennis R. Hoover, 2021-12-27 This pioneering handbook proposes an approach to pluralism that is relational principled and non relativistic going beyond banal calls for mere tolerance The growing religious diversity within societies around the world presents both challenges and opportunities A degree of competition between deeply held religious worldview perspectives is natural and inevitable yet at the same time the world urgently needs engagement and partnership across lines of difference None of the world's most pressing problems can be solved by any single actor and as such it is not a question of if but when you partner with an individual or institution that does not think act or believe as you do The authors argue that religious literacy defined as a dynamic combination of competencies and skills continuously refined through real world cross cultural engagement is vital to building societies and states of neighborly solidarity and civic fairness Through examination reflection and case studies across multiple faith traditions and professional fields this handbook equips scholars and students as well as policymakers and practitioners to assess analyze and act collaboratively in a world of deep diversity The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license *The Oxford Handbook of Religion and Education* Liam Francis Gearon, Arniika Kuusisto, 2025-04-29 The Oxford Handbook of Religion and Education offers a multi disciplinary work of scholarship and research highlighting the global significance of a critical interface of cultural and social political and theological importance Drawing on historical perspective and contemporary reflection the collection provides a uniquely transformative analysis of why the interface of religion and education is of such critical significance With contributions from some of the leading thinkers in the field this Handbook presents a cumulatively powerful argument to reassess the complexities of the intersection of religion and education With ambitious and yet accessible intellectual engagements the Handbook here furthers a central thesis that the interface of religion and education is not merely a matter of arcane disputation about a domain of ancient origin or a rudimentary matter of formal educational process but a vibrant domain of critical contestation fundamental to knowing understanding and living in the modern world *Foundations of Bilingual Education and Bilingualism* Colin Baker, 2011 Written as an introductory

McCutcheon,2021-06-08

Although many would today argue that the onetime dominance of the phenomenology of religion has receded and with it the traditional approach to studying religion as a unique and deeply felt experience that defies explanation the essays collected here take quite the opposite stand that this approach has merely been re branded and continues to characterize much work being done in the field today Offering a different way forward one that is based on experiences gained by the members of the Department of Religious Studies at the University of Alabama a program that has successfully reinvented itself over the past 20 years the book includes a variety of practical suggestions for how members of Religious Studies departments can revise their approach to studying and teaching about religion Seeing religion instead as mundane but always exemplary of basic social elements found all across cultures the volume argues that the way forward for this field lies not in the specialness of its object of study but instead the fact that thinking and acting as if something is special is itself an ordinary aspect of history and culture Making just this shift helps the scholar of religion to contribute to wide interdisciplinary conversations all across the Humanities and Social Sciences demonstrating the practical relevance of their work **Good Teachers for**

and North America and is creating a need for a deeper understanding of religious diversity. However, the lack of religious or spiritual education within the educational curriculum leaves a moral vacuum that can become a space to be exploited by religious extremism. More recently, religiously motivated incidences of terrorism in several parts of the world have heightened prejudicial attitudes and distrust of certain religions in particular. These are profound concerns and there is an urgency to examine how religion, religious education and interfaith initiatives can address such misconceptions. This book is thus timely, focusing on an area that is often neglected, particularly on the role of religion in education for sustainable development. While religious organisations and faith communities have had a long history of involvement in both schooling and social service delivery in many countries, their role in reaching development goals has not always been explicitly recognised, as is evident even in the United Nations most recently conceptualised 2030 Agenda for Sustainable Development. Undeniably, the integration of religious dialogue into mainstream development issues is crucial because deep cleavages resulting from the issue of minority religious rights continue to give cause for concern and conflict in many countries. This edited book explores some of these tensions and issues and draws parallels across differing geographical contexts to help enhance our collective and comparative understanding of the role of religious education and institutions in advancing the post 2015 development agenda. The contributors to this volume each demonstrate that while religion in education can contribute to understanding and respect, it is also a space that can be contested and co-opted. Without addressing the salience of religion, however, it will not be possible to foster peace and combat discrimination and prejudice. This book will be of interest to researchers, scholars and students in the field of comparative education and development, religious studies, theology and teacher development and training. This book may also be of interest to national and international policy makers. There are also numerous faith-based organisations as well as other non-governmental organisations (NGOs) working on religion and education issues that may find these case studies a useful resource.

Religion and Higher Education in Europe and North America Kristin Aune, Jacqueline Stevenson, 2016-12-01

Religion and Higher Education in Europe and North America illuminates the experiences of staff and students in higher education as they negotiate the university environment. Religious extremism has been rising across Europe whilst recent attacks have thrown public debate around the place of religion on campus into sharper focus. Universities in recognising and managing religious fundamentalism and freedom of speech on campus into sharper focus. Despite these debates, research exploring religion on campus has been largely absent from discourse on higher education outside of America, with policy and practices designed to deal with religion on campus largely founded on supposition rather than evidence. This book speaks into that void, including results from recent studies in the field which form an empirically grounded base from a broad variety of perspectives on religion at universities. Aiming to offer a deeper perspective, more dialogue and engagement on the experiences of students, *Religion and Higher Education in Europe and North America* presents us not only with an opportunity to counter growing trends of intolerance but for people to connect with the

humanity of others Focusing on what research reveals about staff and students experiences it incorporates research from different academic disciplines including sociology education social policy theology and religious studies and across different faith and belief groups This thought provoking and challenging volume features chapters written by researchers involved in informing policy and practice relating to religion and belief in higher education in the UK US Canada France and the Netherlands Spanning the academic practitioner divide students and academics interested in the sociology of religion and of higher education as well as those responsible for the practical management of campus life will find this text of particular importance
