Conceptual Foundations of Social Research Methods David Baranov, 2021-02-25 This book probes the complex methodological choices facing social researchers and students who are applying or learning the methods of social research The author shows how an understanding of social research requires close consideration of the underlying conceptual frameworks from neopositivism to structuralism hermeneutics and anti foundationalism that shape how one studies society Baranov introduces each philosophical tradition and shows how decisions about research design and methodology are affected by them He also explains the practical and ethical consequences that follow from methodological

choices The book's approach is non doctrinaire and the prose style is accessible concrete and jargon free **Philosophical Foundations of the Social Sciences** Harold Kincaid,1996 This 1996 book argues that behind the diverse methods of the natural sciences lies a common core of scientific rationality *Research Methods and Society* Linda Eberst Dorsten, Lawrence Hotchkiss,2016-09-17 Provides a foundation for understanding research findings in social sciences Designed to help students acquire basic skills in the methods of social science research the second edition of *Research Methods and Society* contains numerous excerpts from professional journal articles scholarly books and popular press The text uses a straightforward writing style to present essential information without eliminating key concepts tools and their applications Concrete everyday examples and hands on practice activities reinforce fundamental concepts that will be useful to students in their future careers and life Topics are illustrated in ways that are student centered yet instructor friendly Features and updates to this 2nd edition include Highlighted concepts and terms in each chapter In addition to a chapter end list of key terms These familiarize students with important content and helps ensure they understand and retain it Chapter summaries Includes a section titled Your Review Sheet Questions Discussed in This Chapter Enables students to review the major themes presented in each chapter and encourages them to reflect on the key points Numerous real world activities Help students meet specific learning needs such as evaluating excerpts from research articles analyzing secondary data and analyzing primary data from direct observation and other mini projects Excerpts from professional journal articles and popular press readings these are followed by questions which guide learning on specific methods topics and illustrates specific issues related to methodology typically employed by social scientists Added and expanded discussion of Ethics with special attention to chapters on direct methods of data collection as well as new discussions about online research New secondary data tables and their discussions applications *Social Research* Sotirios Sarantakos,2017-09-16 From question development and research design to data collection and statistical analysis this text guides the reader through every aspect of social research Encouraging a critical approach in each chapter this 4th edition includes enhanced coverage of internet sampling mixed methods conversation analysis and feminist research **Making Sense of Social Research Methodology** Pengfei Zhao,Karen Ross,Peiwei Li,Barbara Dennis,2021-01-11 Making Sense of Social Research Methodology A Student and Practitioner Centered Approach introduces students to research methods by illuminating the underlying assumptions of social science inquiry Authors Pengfei Zhao Karen Ross Peiwei Li and Barbara Dennis show how research concepts are often an integral part of everyday life through illustrative common scenarios like looking for a recipe or going on a job interview The authors extrapolate from these personal but ubiquitous experiences to further explain concepts like gathering data or social context so students develop a deeper understanding of research and its applications outside of the classroom Students from across the social sciences can take this new understanding into their own research their professional lives and their personal lives with a new sense of relevancy and urgency This text is organized into clusters that center on major topics in

Methods David Baronov, 2015-10-23 One of the common frustrations for students trying to make sense of the various debates and concepts that inform contemporary educational and social science research methods such as structuralism postpositivism hermeneutics and postmodernism is that most books introducing these topics are written at a level that assumes the reader comes to this material with a basic grasp of the underlying ideas Too often fundamental concepts and theories are presented without adequate preparation and without providing practical examples to illustrate key elements When the first edition of Conceptual Foundations of Social Research Methods was published it represented a sharp contrast with these other approaches and received much praise In this revised and expanded second edition David Baronov further develops his critically acclaimed treatment of the core conceptual tools of social research informing education and the social sciences updating his discussion of the current literature and adding a new chapter that explores the role of pragmatism Features of the Second Edition *Cartographies of Knowledge* Celine-Marie Pascale, 2010-11-04 Mapping geographies of power and knowledge in qualitative research In this foundational tome Professor Celine Marie Pascale critiques methodology in relationship to specific qualitative methods and argues cogently that despite good intentions most of this research is still tethered to the Cartesian paradigm thus limiting its emancipatory potential This is an impressive book that will likely become a classic Eduardo Bonilla Silva Duke University co author with Tukufu Zuberi White Logic White Methods Racism and Methodology 2012 Winner of the International Congress of Qualitative Inquiry Distinguished Book Award Using clear language and concrete examples this text examines theoretical and historical foundations that shape the premise and logic of qualitative social research It analyzes qualitative methodology and methods in relationship to issues of agency subjectivity and experience Rooted to feminist critical race and post structural literature it is concerned with social justice as it critiques current research paradigms and advances broad alternatives This is an ideal text for students in graduate level courses in Methodology Epistemology Qualitative Research Methods Data Analysis Ethnomethodology Symbolic Interaction Phenomenology Grounded Theory and related courses the social behavioral and health sciences **Philosophical**

Foundations of Social Research Methods ,2006 Playing by the Rules Leanne M. Dzubinski,2021-03-04 The purpose of this study was to understand how women lead and make meaning of their leadership in evangelical mission organizations Twelve executive level women were interviewed They described how they came to lead and told stories of their successes and challenges They also described their thoughts on why they were chosen to lead and what it was like to be a woman leader in their organizations Analysis of their stories revealed their challenges as well as organizations ongoing ambivalence regarding women leaders Conclusions from the study and suggestions for improved organizational practice are offered EBOOK: Combining Methods in Educational and Social Research Stephen Gorard,Chris Taylor,2004-09-16 This excellent book promises much and delivers a whole lot more It provides a description of the practicalities of combining evidence from a variety of data collection modes in order to enrich our responses to educational research questions This is achieved with thoroughness and clarity and even some wit There are outstanding teaching materials here This is the best book on educational research methods published in this country for decades Professor Charles Desforges University of Exeter In this timely and important contribution Stephen Gorard and Chris Taylor help us move beyond the wasteful schism of qualitative versus quantitative research by offering sound basic theorising and extensive practical illustration of the combining of research methods I see their book as essential reading for anyone concerned for effective educational and social research Professor Peter Tomlinson University of Leeds There is growing interest in the possibilities of combining research approaches in education and social sciences as dissatisfaction mounts with the limitations of traditional mono method studies and with the schism between quantitative and qualitative methods This book argues the case for combining multiple research methods and provides much needed practical guidance for researchers who want to use this mixed methods approach The authors believe that all research has an over arching logic and that within this the fruitful combination of quantitative and qualitative methods is possible They develop the idea of the new education and social researcher for whom the combination of approaches is a representation of a diverse skills base rather than a matter of ideological or theoretical allegiance The book outlines and evaluates methods that are currently used and looks at combining different methods across and within studies including complex interventions Bayesian approaches new political arithmetic triangulation life histories and design studies It offers a radical new and very simple way of working with numbers Drawing on examples across the social sciences this book is key reading for undergraduate and postgraduate students in Education and social science courses with a research element as well as academics and professionals undertaking research projects **Sociology** Robert Van Krieken,Daphne Habibis,Philip Smith,Brett Hutchins,Greg Martin,Karl Maton,2013-09-12 Building upon the success of previous editions this fully revised edition of Sociology lays the foundations for understanding sociology in Australia The depth and breadth of the book ensures its value not only for first year students but for sociology majors requiring on going reference to a range of theoretical perspectives and current debates This fifth Australian edition continues to build on the

book's reputation for coverage clarity and content drawing upon the work of leading Australian sociologists as well as engaging with global social trends and sociological developments **What Is a Case?** Charles C. Ragin, Howard Saul Becker, 1992-07-31 The concept of the case is a basic feature of social science research and yet many questions about how a case should be defined selected and judged are far from settled The contributors to this volume probe the nature of the case and the ways in which different understandings of the concept affect the conduct and the results of research The contributions demonstrate that the work of any given researcher is often characterised by some hybrid of these basic approaches and it is important to understand that most research involves multiple definitions and uses of cases as both specific empirical phenomena and as general theoretical categories **Philosophical Foundations of Social Research Methods** Malcolm Williams, 2006 **UGC NET Paper 2 _ Sociology Volume - 1** Mr. Rohit Manglik, 2024-03-06 EduGorilla Publication is a trusted name in the education sector committed to empowering learners with high quality study materials and resources Specializing in competitive exams and academic support EduGorilla provides comprehensive and well structured content tailored to meet the needs of students across various streams and levels **Migration and Educational Policymaking in China** Hui Yu, 2022-07-21 By concentrating on the topic of school enrolment policy for rural to urban migrant children in China this book analyses the unequal power relations and structural inequalities that can appear in the context of education The author complements current knowledge by applying theoretical resources of policy sociology in particular the thinking of Pierre Bourdieu into analysis of educational policymaking in the Chinese context He takes a policy trajectory approach to trace the unequal power relations and structural inequalities invested and realised in the school enrolment policy Rooted in rich qualitative data from five metropolises he examines both external influences of politics economy and public policy on educational policy agenda setting and discursive practices within the educational policy cycle inherent in the post 2013 restrictive school enrolment policy Structural constraints and agency in the local context are also explored indicating that the intersectional effects of political economic and civic logic can result in differentiated modes of policy enactment The study will be of interest to scholars students policymakers and practitioners in helping address policymaking and social justice in education for migrants and other marginalised groups **Philosophical Foundations of Social Research Methods: New strategies in social research** Malcolm Williams, 2006 The philosophy of social research is a subset of the philosophy of social science but also an important subject area spanning methodology and method The articles in this collection are the best exemplars of key positions in a very wide disciplinary field Topics covered include science and art in the history of social research positivism and antipositivism language and the linguistic turn realism and anti realism theory and theory choice logic and models prediction and laws interpretation probability and complexity
