addresses the most pressing issues that need to be resolved to allow for the development of advanced user friendly legal databases It involves a study into the nature of legal information handling and the representation of legal knowledge In addition to the theoretical study it is demonstrated with the development of a prototype how the architecture can be used for the development of practical legal information retrieval systems The results of these studies are interpreted to discuss a number of possible applications for the intelligent interface architecture including the publication of government information and the organisation of legal information on the Internet      **Monthly Bibliography** United Nations Library (Geneva, Switzerland),1996      **Information Technology and the Law** ,1996      □□□□□□□□□□ ,2004      Recent Acquisitions Ohio State University.
