## **France And European Integration Toward A Transnational Polity:**

**France and European Integration** Michel R. Gueldry, 2001-05-30 Examines the substantive transformations brought upon the French state by European integration France and European Integration Michel R. Gueldry, 2001-05-30 Gueldry analyzes the substantive transformations brought upon the French state by European integration through an incremental and cumulative process generally described as Europeanization This restructuring is characterized by the erosion of traditional political and economic parameters the emergence of new means and models of public action and a general paradigmatic redefinition including a search for renewed political legitimacy by French elite Covering the period from 1957 to the present Gueldry examines how regional integration affects French governmental structures public policies political processes and culture He emphasizes the post Single European Act February 1986 period because of the accelerating momentum of the integration process after this milestone treaty Students scholars and policy makers involved with EU history institutions and policies will be particularly interested in the work The Oxford Handbook of French Politics Robert Elgie, Emiliano Grossman, Amy G. Mazur, 2016-11-03 The Oxford Handbook of French Politics provides a comprehensive and comparative overview of the French political system through the lens of political science The Handbook is organized into three parts the first part identifies foundational concepts for the French case including chapters on republicanism and social welfare the second part focuses on thematic large scale processes such identity governance and globalization while the third part examines a wide range of issues relating to substantive politics and policy among which are chapters on political representation political culture social movements economic policy gender policy and defense and security policy The volume brings together established and emerging scholars and seeks to examine the French political system from a comparative perspective The contributors provide a state of the art review both of the comparative scholarly literature and the study of the French case making The Oxford Handbook of French Politics an invaluable resource for anyone interested in the foundations of contemporary political life in France Black France, White Europe Emily Marker, 2022-10-15 Winner of the George Louis Beer Prize Black France White Europe illuminates the deeply entangled history of European integration and African decolonization Emily Marker maps the horizons of belonging in postwar France as leaders contemplated the inclusion of France's old African empire in the new Europe in the making European integration intensified longstanding structural contradictions of French colonial rule in Africa Would Black Africans and Black African Muslims be French If so would they then also be European What would that mean for republican France and united Europe more broadly Marker examines these questions through the lens of youth amid a surprising array of youth and education initiatives to stimulate imperial renewal and European integration from the ground up She explores how education reforms and programs promoting solidarity between French and African youth collided with transnational efforts to make young people in Western Europe feel more European She connects a particular postwar vision for European unity which coded Europe as both white and raceless

Christian and secular to crucial decisions about what should be taught in African classrooms and how many scholarships to provide young Africans to study and train in France That vision of Europe also informed French responses to African student activism for racial and religious equality which ultimately turned many young francophone Africans away from France irrevocably Black France White Europe shows that the interconnected history of colonial and European youth initiatives is key to explaining why despite efforts to strengthen ties with its African colonies in the 1940s and 1950s France became more European during those years

Personal Diplomacy in the EU Roland Vogt, 2016-10-04 At a time when the economic troubles and bailouts of Greece and other European economies are casting significant doubt on the future viability of the Eurozone and the EU it is crucial to examine the origins of the political will and leadership that is necessary to move the integration process forward This book makes a significant conceptual and empirical contribution by elucidating the extent to which the integration process hinges not on institutions and norms but on the relations among leaders Vogt conducts a comparative diplomatic history of three critical junctures in the process of European integration the creation of the Common Market 1955 1957 British accession 1969 1973 and the introduction of the Euro 1989 1993 He illustrates how personal diplomacy leadership constellations and the dynamics among leaders enable breakthroughs or inhibit accords He also reveals how the EU's system of top level decision making that privileges institutionalised summitry has operated in the past and suggests in a separate chapter why it has come to atrophy and prove more dysfunctional of late

*French Relations with the European Union* Helen Drake, 2012-10-12 This scholarly work examines how key actors within French politics and society have related to the challenges and opportunities posed by the European Union and how these relations have driven or hindered change in France The collection invites the reader to explore below the surface image of a France troubled by its relations with the EU in the post Cold War era and see the dynamics of change in empirical detail Each chapter offers insights into specific aspects of the France EU relationship including the characteristics of Euroscepticism la fran aise amongst the electorate and political parties the dynamics of change in the political media and legal establishments in their dealings with the EU the priorities for labour business and la vie associative in their relations with French decision makers regarding the EU

*Government and Politics of France* Anne Stevens, 2017-03-14 Updated throughout to cover the period of Chirac Jospin cohabitation and the implications of Chirac's success in the dramatic 2002 presidential and parliamentary elections the third edition of this popular and widely used text provides a clear and comprehensive account of the contemporary French political system

**Journal of International and Area Studies**, 2004 Imperial Eclipse Yukiko Koshiro, 2013-05-10 The Pacific War narrative of Japan's defeat that was established after 1945 started with the attack on Pearl Harbor detailed the U S island hopping campaigns across the Western Pacific and culminated in the atomic bombings of Hiroshima and Nagasaki Japan's capitulation and its recasting as the western shore of an American ocean But in the decades leading up to World War II and over the course of the conflict Japan's leaders and citizens were as deeply concerned

about continental Asia and the Soviet Union in particular as they were about the Pacific theater and the United States In *Imperial Eclipse* Yukiko Koshiro reassesses the role that Eurasia played in Japan's diplomatic and military thinking from the turn of the twentieth century to the end of the war Through unprecedented archival research Koshiro has located documents and reports expunged from the files of the Japanese Cabinet ministries of Foreign Affairs and War and Imperial Headquarters allowing her to reconstruct Japan's official thinking about its plans for continental Asia She brings to light new information on the assumptions and resulting plans that Japan's leaders made as military defeat became increasingly certain and the Soviet Union slowly moved to declare war on Japan which it finally did on August 8 two days after Hiroshima She also describes Japanese attitudes toward Russia in the prewar years highlighting the attractions of communism and the treatment of Russians in the Japanese empire and she traces imperial attitudes toward Korea and China throughout this period Koshiro's book offers a balanced and comprehensive account of imperial Japan's global ambitions

**Major Nation-States in the European Union** J. Richard Piper, 2015-09-25 Integrating the study of individual European nation states within the framework of the European Union this unique new text is essentially two books in one a book on the EU and a comparative introduction to European politics This text provides more value to students by combining two texts in one but engages student interest and facilitates learning through a variety of useful features Role playing exercises encourage participation and test students critical thinking skills while an emphasis on the people behind the politics humanizes material and provides lively insights into contemporary European politics and society To ensure student understanding there is extensive material comparing and contrasting EU states to one another and to the United States a thorough glossary at the end of the book and an abundance of examples tables charts and graphs to illustrate and extend the discussions

**In Pursuit of Prosperity** Charles R Hankla, 2025-07-09 With so many states committed to economic transformation and so many experts ready to provide technical advice on how to achieve it why does progress so often remain elusive In *Pursuit of Prosperity* examines the process of economic upgrading moving to more valuable activities in production improving technology knowledge and skills and participating in global value chains and develops a new theory to explain the form and success of national policies designed to promote it Using a mixed methods approach Charles R Hankla draws upon archival research and interviews from France and India as well as quantitative models of sixteen countries across six decades He finds that when state and private actors are aligned in their institutional structures which can happen in both corporatist and pluralist systems industrial policy tends to be more effective It is when the state or the private sector independently dominates industrial policy that poor outcomes are most likely As *In Pursuit of Prosperity* shows rather than being fixed characteristics of countries policymaking styles vary across time and across sectors of the economy reflecting the changing power dynamics and organizational resources of stakeholders The book sheds light on how industrial policy which is experiencing a comeback in the United States and beyond can best be harnessed for upgrading It offers a valuable contribution to our understanding of the complex

relationship between state politics and economic performance in the modern globalized world      French Politics and Society Alistair Cole, 2017-04-21 French Politics and Society is the ideal companion for all students of France and French politics with a strong reputation for its lucidity and lively exposition of the French polity This third edition remains a highly readable text and offers a broad critical and comprehensive understanding of French politics The book provides an excellent description of French institutions and ensures readers access to background information through discussing historical developments political forces public policy and the evolution of important aspects of French society Key updates for the third edition include extensive updates including the Chirac Sarkozy and Hollande presidencies inclusion of constitutional and state reform coverage since 2008 the French party system and evolution of the French left and right more on France's positioning with regards to Brussels and the impact of the European economic crisis French Politics and Society is essential reading for all undergraduates studying French politics French studies European studies or comparative politics      Securing Europe L. Watanabe, 2010-01-20 Securing Europe takes a novel approach to Europeanization among EU member states by employing a sociological institutionalist approach Watanabe argues that Europeanization as a process of change takes place not as a result of rationally calculating states but as a result of the reworking of perceptual and normative frameworks      **National Perspectives on Russia** Maxine David, Jackie Gower, Hiski Haukkala, 2013-06-03 This book presents a ground breaking comparative study of the bilateral relations of all 27 EU member states with Russia and an assessment of their impact on the EU's efforts to conduct a coherent and effective policy towards its most important neighbour While there has been a lot of research on European foreign policy there has been much less on the role that national foreign policies play in it Based on a common analytical framework this book offers a detailed analysis of national perspectives on Russia and how they interact with and affect policymaking at the EU level The authors provide deep insights into the relationship between individual states and Russia looking at a range of policy areas economics trade energy security culture and education They are not only interested in examining policy failure but also probing the possibilities of seeing national foreign policies and the bilateralism with third parties that they often entail as a potentially positive resource for the European Union As Russia is an example of a particularly hard case for EU foreign policy this book yields important insights concerning the possibilities as well as limits of developing a common EU policy in the future It will be of interest to students and scholars of European politics EU Studies Russian politics foreign policy studies and international politics      Dynamics in the French Constitution David Marrani, 2013-10-08 The promulgation of the Fifth French Republic Constitution in 1958 marked the end of a complex constitutional history that has since 1789 seen more than twenty constitutions and five Republics Lasting now for more than fifty years the Fifth Republic Constitution has proven to be the right settlement for the French people a consensual text However while offering the appearance of stability the Fifth French Republic Constitution has often been reconsidered and changed not least in the year of its fiftieth anniversary when the Constitution was modernised These dynamics of the Fifth

Republic Constitution are neither a recent matter nor entirely the result of the successive constitutional amendments. Instead, the history of the Constitution has involved the resurgence of repressed archaic elements from the ancient regime while the social, economic and environmental contexts have penetrated not only the text itself but more extensively its spirit and behind it the philosophy and our perception of the Republic. In *Dynamics in the French Constitution*, David Marrani questions the foundations of the French Fifth Republic. In using specific themes, current and traditional debates, contemporary and archaic factors that have enlightened the road of long-lasting Republic, the book explores some of the changes of the last fifty years and the tensions that are present within the constitutional text. In combining theoretical concepts of constitutional law with key contemporary and historical developments such as the European integration, the response to environmental challenges, the practice of human rights and the pillars supporting French republicanism, this book offers varied and creative tools for a better understanding of the Republic of today.

*Euroscepticism*, 2016-08-29. The accelerated pace of European integration since the early 1990s has been accompanied by the emergence of increasingly prominent and multiform oppositions to the process. The term Euroscepticism has appeared with growing frequency in a range of political media and academic discourses. Yet the label is applied to a wide range of different and occasionally contradictory phenomena. Although originally associated with an English exceptionalism relative to a Continental project of political and economic integration, the term Euroscepticism is now also identified with a more general questioning of European Union institutions and policies which finds diverse expressions across the entire continent. This volume of *European Studies* brings together an interdisciplinary team of contributors to provide one of the first major multinational surveys of the growth of these Eurosceptic tendencies. Individual chapters provide detailed examinations of developments in France, Germany, the Netherlands, the United Kingdom, Ireland, Sweden, Austria, the Czech Republic, Poland and Switzerland. Overall, the volume draws a distinctive portrait of contemporary Euroscepticism, situating the phenomenon not only relative to the progress of European integration but also in relation to broader questions concerned with the evolution of party politics and the reshaping of national identities.

**Muslims in Europe** Alexandru Balaş, 2008      **The Member States of the European Union** Simon Bulmer, Christian Lequesne, 2020. A unique overview of Europeanization which combines a thematic and country-by-country approach to understanding the relationship between member states and the EU.

**Political Science Quarterly** Columbia University. Faculty of Political Science, 2002. A review devoted to the historical, statistical and comparative study of politics, economics and public law.

*France After Hegemony* Michael Maurice Loriaux, 1991. How does the decline of the hegemon, the dominant rule-making power of the international system, affect middle-level nations? By examining monetary and credit policy in postwar France, Michael Loriaux illuminates this question, tracing the relationship of domestic economic reform to specific changes in the international political economy which have resulted from U.S. hegemonic decline.
