Smith,2021-06-08 How China's expansive new era of urbanization threatens to undermine the foundations of rural life Since the beginning of the twenty first century China has vastly expanded its urbanization processes in an effort to reduce the inequalities between urban and rural areas Centered on the mountainous region of Chongqing which serves as an experimental site for the country's new urban development policies *The End of the Village* analyzes the radical expansion of urbanization and its consequences for China's villagers It reveals a fundamental rewriting of the nation's social contract as villages that once organized rural life and guaranteed rural livelihoods are replaced by an increasingly urbanized landscape dominated by state institutions Throughout this comprehensive study of China's urban rural coordination policy Nick R Smith traces the diminishing autonomy of the country's rural populations and their subordination to larger urban networks and shared administrative structures Outside Chongqing's urban centers competing forces are at work in reshaping the social political and spatial organization of its villages While municipal planners and policy makers seek to extend state power structures beyond the boundaries of the city village leaders and inhabitants try to maintain control over their communities uncertain futures through strategies such as collectivization shareholding real estate development and migration As China seeks to rectify the development crises of previous decades through rapid urban growth such drastic transformations threaten to displace existing ways of life for more than 600 million residents Offering an unprecedented look at the country's contentious shift in urban planning and policy *The End of the Village* exposes the precarious future of rural life in China and suggests a critical reappraisal of how we think about urbanization **The Politics of Language Oppression in Tibet** Gerald Roche,2024-11-15 In *The Politics of Language Oppression in Tibet* Gerald Roche sheds light on a global crisis of linguistic diversity that will see at least half of the world's languages disappear this century Roche explores the erosion of linguistic diversity through a study of a community on the northeastern Tibetan Plateau in the People's Republic of China Manegacha is but one of the sixty minority languages in Tibet and is spoken by about 8 000 people who are otherwise mostly indistinguishable from the Tibetan communities surrounding them Recently many in these communities have switched to speaking Tibetan and Manegacha faces an uncertain future The author uses the Manegacha case to show how linguistic diversity across Tibet is collapsing under assimilatory state policies He looks at how global advocacy networks inadequately acknowledge this issue highlighting the complex politics of language in an inter connected world *The Politics of Language Oppression in Tibet* broadens our understanding of Tibet and China the crisis of global linguistic diversity and the radical changes needed to address this crisis *Lewisboro Ghosts* Maureen Koehl,2007-11-15 On the easternmost edge of Westchester County among the quiet communities nestled against the Connecticut state line memories of eerie incidents and haunted happenings flow through the
