Innovations in Intelligent Machines-4 Colette Faucher, Lakhmi C. Jain, 2013-11-18 This research volume is a continuation of our previous volumes on intelligent machine. It is divided into three parts. Part I deals with big data and ontologies. It includes examples related to the text mining, rule mining and ontology. Part II is on knowledge based systems. It includes context centered systems, knowledge discovery, interoperability, consistency and systems of systems. The final part is on applications. The applications involve prediction, decision optimization and assessment. This book is directed to the researchers who wish to explore the field of knowledge engineering further. *Complete Poems* A. M. Klein, 1990-01-01 This collection includes all Klein's poetry both original works and translations from Hebrew, Yiddish, Aramaic and Latin. Many of them coming from all periods of his careers have never been published. **Progress in Artificial Intelligence** Pedro Barahona, Jose J. Alferes, 2003-07-31 The Portuguese Association for Artificial Intelligence APPIA has been regularly organising the Portuguese Conference on Artificial Intelligence EPIA. This ninth conference follows previous ones held in Porto 1985, Lisboa 1986, Braga 1987, Lisboa 1989, Albufeira 1991, Porto 1993, Funchal 1995 and Coimbra 1997. Starting in 1989 the conferences have been held biennially, alternating with an APPIA Advanced School on Artificial Intelligence and become truly international. English has been adopted as the official language and the proceedings are published in Springer's LNAI series. The conference has reconformed its high international standard this year largely due to its programme committee composed of distinguished researchers in a variety of specialities in Artificial Intelligence, half of them from Portuguese universities. This has attracted a significant international interest well expressed by the number of papers submitted: 66 from 17 different countries, 29 of which are by Portuguese researchers. From the 66 papers submitted, about one third of them, 23 were selected for oral presentation and have been published in this volume. The review process enabled the selection of high quality papers, each paper being reviewed by two or three reviewers either from the programme committee or by their appointment. We would like to thank all of the reviewers for their excellent and hard work. *Advances in Databases and Information Systems* András Benczúr, Bernhard Thalheim, Tomáš Horváth, 2018-07-28 This book constitutes the proceedings of the 22nd European Conference on Advances in Databases and Information Systems ADBIS 2018 held in Budapest, Hungary in September 2018. The 17 regular papers presented together with two invited papers were carefully selected and reviewed from numerous submissions. The papers are organized in topical sections such as information extraction and integration, data mining and knowledge discovery, indexing, query processing and optimization, data quality and data cleansing, distributed data platforms including cloud data systems, key value stores and big data systems and streaming data analysis, web XML and semi-structured databases. *Heat Pumps* Takamoto Saito, 2013-10-22 It has long been recognized that realizing the potential for energy conservation and diversification by using heat pumps offers considerable benefits to the environment. Important work on more efficient and ozone friendly working fluids will further enhance the case for greater support of heat pump research.

This book contains the Proceedings of the Third International Energy Agency Conference held in Tokyo in March 1990 The main theme of the Conference Heat Pumps Solving Energy and Environmental Challenges is explained in great depth covering not only technical characteristics but economic factors and the role of government and other bodies in promoting research and the uses of all types of heat pumps are also fully considered As well as publishing the papers presented at the meeting the book also contains the extensive complementary poster sessions from the Conference

Mechanics Of Solids And Structures - Proceedings Of The International Conference F W Travis, Daniel Tint Lwin, 1991-09-05 This volume of proceedings consists of invited papers on the following and related subject areas Composite Materials Experimental Methods in Stress Analysis Fracture Mechanics Structural Stability Non Linear Behaviour of Materials and Structures Plasticity Numerical Methods Structural Dynamics

A.M. Klein: Complete Poems A.M. Klein, 1990-12-15 It is for his poetry that A M Klein is best known and most warmly remembered This collection includes all Klein s poetry both original works and translations from Hebrew Yiddish Aramaic and Latin Many of them coming from all periods of his careers have never been published The poems are arranged chronologically according to date of composition This makes possible for the first time an appreciation of Klein s poetic development The editor s introduction places this development in the perspective of Klein s life and time and in particular explores Klein s lifelong struggle to reconcile his dual vocations as both a Jewish and a modernist writer The textual apparatus identifies all authoritative versions for each poem and lists all emendations and all substantive variants in both published and manuscript versions The explanatory notes gloss obscure terms and references They also provide a rich context for appreciation and interpretation by drawing connections with Klein s life his wide reading and his work as a whole Wherever possible Klein s own numerous but scattered comments on his poems have been cited
