Libya Since Independence Economic And Social Development:

Libya Since Independence (RLE Economy of Middle East) J.A. Allan, 2014-10-24 Since its independence in 1951 Libya has experienced rapid economic and social change. Many of these developments though dramatic have not been comprehensively documented until now. One of the problems that Libya has had to face has been the absorption of burgeoning oil revenues and here the Libyan experience accords with that of other oil rich states. The country has embarked on ambitious policies based on oil wealth. This book charts the development of traditional agricultural way of life and the growth of new industrial projects and transport systems. The effect of Libya's new wealth on its social and political systems is also considered in detail. In conclusion the importance of Libya's frontiers are discussed although Libyan international interests have been wide ranging in recent years its real external interests are to extend its natural resource base for its future developments will be founded on Libya's perception of its territorial entitlement. First published in 1982

The Impact of Oil Revenues on Arab Gulf Development M.S. El Azhary, 2023-05-09 As the price of oil fell in the eighties the pressures on the Arab Gulf States to speed up the diversification of their economies into non oil sectors increased. This book first published in 1984 examines this problem and many other issues connected with the impact of oil revenues on development in the Gulf States. It considers changing oil production

policies and developments in other sectors of the economy including agriculture industry and banking It explores population problems moves towards Gulf economic coordination and the impact of oil on society culture and education This book provides an assessment of just how much the region depends on oil for its economic prosperity and development and some indication of the enormous problems that would face the region should the demand for oil decrease still further *Africa, Asia, and South America Since 1800* A. J. H. Latham, 1995 A reference for graduate and undergraduate students presenting the bibliographic details and sometimes describing and evaluating the content of over 5 000 books in English most published since 1945 and many quite recently but also some earlier works of enduring importance A section of works on all three continents is followed by sections on each which first consider the continent as a whole then each country usually by chronological periods and topics such as economics politics and society Indexed only by author and editor but the table of contents is detailed enough to provide adequate access Distributed in the US by St Martin s Press Annotation copyright Book News Inc Portland Or A History of the Maghrib in the Islamic Period Jamil M. Abun-Nasr, 1987-08-20 A new history of North Africa within the Islamic period from the Arab conquest to the present **The Cambridge History of Africa** J. D. Fage, Roland Anthony Oliver, Michael Crowder, 1975 The eighth and final volume of The Cambridge History of Africa covers the period 1940 75 It begins with a discussion of the role of the Second World War in the political decolonisation of Africa Its terminal date of 1975 coincides with the retreat of Portugal the last European colonial power in Africa from its possessions and their accession to independence The fifteen chapters which make up this volume examine on both a continental and regional scale the extent to which formal transfer of political power by the European colonial rulers also involved economic social and cultural decolonisation A major theme of the volume is the way the African successors to the colonial rulers dealt with their inheritance and how far they benefited particular economic groups and disadvantaged others The contributors to this volume represent different disciplinary traditions and do not share a single theoretical perspective on the recent history of the continent a subject that is still the occasion for passionate debate The Government And Politics Of The Middle East And North Africa David E. Long, Bernard Reich, 1995-08-03 Rapid social economic and political change is endemic to the Middle East and is often more revolutionary than evolutionary in nature In many ways the entire political landscape of the Middle East has been transformed in the past decade in the realm of both international relations and domestic politics The collapse of the Soviet Union the end of the cold war and the Iraqi invasion of Kuwait have all had a profound effect on relations among states within the region and between those states and countries outside the region In this revised edition Long and Reich provide comprehensive and up to date analyses of many critical contemporary events and issues The contributors explain how Desert Storm isolated Iraq and brought Syria back into the mainstream of Arab politics contributing to the revival of the Arab Israeli peace process They also show how the return of a Labor government in Israel has allowed the peace process to go forward Evaluating the economic costs of the Kuwait war and the continuing oil glut the authors find

that resulting changes in the domestic economies of the oil producing states have created additional pressures for social and political change The most profound change in government and politics however is the rise of Islam as the idiom of political discourse among moderates as well as extremists

The Maghreb Since 1800 Knut S. Vikør, 2024-11-01 The Maghreb the region that today encompasses Morocco Algeria Tunisia and Libya is a region apart within the larger Muslim and Arab world Today the focus of popular uprisings for democracy and participation it underwent long periods of colonisation and anti colonial nationalist resistance both peaceful and militant To understand the nature of today s developments in North Africa we need fully to appreciate the tumultuous history of the region and how its four discrete countries followed different trajectories some marked by a continuity of social and political structures in both the colonial era and as independent states while others were marked by sharp ruptures and violent struggles These historical differences are still visible in the current era and tell us much about the societies in question This short history of the Maghreb surveys its development from the coming of Islam to the present day but with greatest emphasis on the modern period from the early nineteenth century onwards It follows the French protectorates Morocco and Tunisia and how their nationalist movements forged the independent states that followed and it chronicles the wars of resistance and liberation in Algeria and Libya and how these conflicts also marked their independence with a long running civil war in the former and the recent uprising against the Gaddafi regime in the latter
