Soft Computing in Case Based Reasoning Sankar Kumar Pal,Tharam S. Dillon,Daniel S. Yeung,2012-12-06 Soft Computing in Case Based Reasoning demonstrates how various soft computing tools can be applied to design and develop methodologies and systems with case based reasoning for real life decision making or recognition problems Comprising contributions from experts from all over the world it Provides an introduction to CBR and soft computing and the relevance of their integration Evaluates the strengths and weaknesses of CBR in its current form Presents recent developments and significant applications in domains such as data mining medical diagnosis knowledge based expert systems banking and forensic investigation Addresses new information on developing intelligent systems This book will be of particular interest to graduate students and researchers in computer science electrical engineering and information technology but it will also be of interest to researchers and practitioners in the fields of systems design pattern recognition and data mining   *Enterprise Information Systems* Joaquim Filipe,José Cordeiro,2011-03-07 This book contains substantially extended and revised versions of the best papers from the 12th International Conference on Enterprise Information Systems ICEIS 2010 held in Funchal Madeira Portugal June 8 12 2010 Two invited papers are presented together with 39 contributions which were carefully reviewed and selected from 62 full papers presented at the conference out of 448 submissions They reflect state of the art research work that is often driven by real world applications thus successfully relating the academic with the industrial community The topics covered are databases and information systems integration artificial intelligence and decision support systems information systems analysis and specification software agents and internet computing and human computer interaction   Science Bertrand Zavidovique,2012 The concept is fundamental in statistics and tailors to the emergence of collective behaviours Communication then asks for uncertainty considerations noise indeterminacy or approximation and its wider impact on the couple perception action Clustering being all about uncertainty handling data set representation appears not to be the only solution Introducing hierarchies with adapted metrics a priori pre improving the data resolution are other

methods in need of evaluation The technology together with increasing semantics enables to involve synthetic data as simulation results for the multiplication of sources Part B plays with another couple important for complex systems state vs transition State first descriptions would characterize physics while transition first would fit biology That could stem from life producing dynamical systems in essence **Recommender Systems for Technology Enhanced Learning** Nikos Manouselis,Hendrik Drachsler,Katrien Verbert,Olga C. Santos,2014-04-12 As an area Technology Enhanced Learning TEL aims to design develop and test socio technical innovations that will support and enhance learning practices of individuals and organizations Information retrieval is a pivotal activity in TEL and the deployment of recommender systems has attracted increased interest during the past years Recommendation methods techniques and systems open an interesting new approach to facilitate and support learning and teaching The goal is to develop deploy and evaluate systems that provide learners and teachers with meaningful guidance in order to help identify suitable learning resources from a potentially overwhelming variety of choices Contributions address the following topics i user and item data that can be used to support learning recommendation systems and scenarios ii innovative methods and techniques for recommendation purposes in educational settings and iii examples of educational platforms and tools where recommendations are incorporated

Advances in Case-Based Reasoning Thomas Roth-Berghofer,Mehmet H. Göker,H. Altay Güvenir,2006-08-30 This book constitutes the refereed proceedings of the 8th European Conference on Case Based Reasoning ECCBR 2004 held in Fethiye Turkey in September 2006 The book presents 31 revised full papers and 5 revised application papers together with 2 invited papers and 2 abstracts of invited talks The coverage represents snapshot of current current issues in case based reasoning ranging from theoretical and methodological issues to advanced applications in various fields *Evaluation of Novel Approaches to Software Engineering* Leszek Maciaszek,César González-Pérez,Stefan Jablonski,2010-11-18 Software engineering is understood as a broad term linking science traditional en neering art and management and is additionally conditioned by social and external factors conditioned to the point that brilliant engineering solutions based on strong science showing artistic creativity and skillfully managed can still fail for reasons beyond the control of the development team Modern software engineering needs a paradigm shift commensurate with a change of the computing paradigm from 1 Algorithms to interactions and from procedural to object oriented programming 2 Systems development to systems integration 3 Products to services Traditional software engineering struggles to address this paradigm shift to inter tions integration and services It offers only incomplete and disconnected methods for building information systems with fragmentary ability to dynamically accom date change and to grow gracefully The principal objective of contemporary software engineering should therefore be to try to redefine the entire discipline and offer a complete set of methods tools and techniques to address challenges ahead that will shape the information systems of the future **Computers in Fisheries Research** Bernard A. Megrey,Erlend Moksness,2008-11-26 The first edition of this book was published by Chapman and Hall

Ltd in 1996 The first edition contained nine chapters and for all except one chapter the original chapter authors agreed to update their chapter Comparing these chapters gives the reader an idea of the development over a time span of more than 10 years between the two editions In the preparation of the second edition we decided to add more chapters reflecting some important fields with significant contributions to present day fishery research These are the use of internet for searching of information Chapter 2 and the present state and use of remote sensing Chapter 5 ecosystem modeling Chapter 8 and visualization of data Chapter 10 This second edition provides a valuable sampling of contemporary applications Scientists have an opportunity to evaluate the suitability of different computer technology applications to their particular research situation thereby taking advantage of the experience of others The chapters that follow are the fruition of this idea The history behind this book started in 1989 when we were asked by Dr Vidar Wespestad previously Alaska Fisheries Science Center Seattle USA to prepare and convene a session at the 1992 World Fishery Congress in Athens Greece on computer applications in fisheries We agreed that the idea was a good one and the computer session in 1992 turned out to be very successful *Fuzzy Logic and Applications* Vito Di Gesù,Francesco Masulli,Alfredo Petrosino,2006-01-25 This volume constitutes the thoroughly refereed post workshop proceedings of the 5th International Workshop on Fuzzy Logic and Applications held in Naples Italy in October 2003 The 40 revised full papers presented have gone through two rounds of reviewing and revision All current issues of theoretical experimental and applied fuzzy logic and related techniques are addressed with special attention to rough set theory neural networks genetic algorithms and soft computing The papers are organized in topical section on fuzzy sets and systems fuzzy control neuro fuzzy systems fuzzy decision theory and application and soft computing in image processing **Information Systems Design and Intelligent Applications** J.
