## **Fountains Splash And Spectacle Water And Design From The Renaissance To The Present:**

**Fountains** Kenneth A. Breisch, 1998 *Fountains Splash and Spectacle* celebrates the achievements in fountain design since the Renaissance and explores the fountain's social significance and its underlying principles. Abundant illustrations of works of art, historical and modern photographs and architectural drawings feature fountains as symbols of power structures created for pleasure and entertainment, incredible technological displays made for international expositions, and fountains as urban oases in cities throughout the United States and Europe. BOOK JACKET Title Summary field provided by Blackwell North America Inc. All Rights Reserved      **Fountains: Splash and Spectacle**, 1998      **Art in Detroit Public Places** Dennis Alan Nawrocki, 2008 Third edition of a favorite guide to major examples of public art in metropolitan Detroit, updated for the first time since 1999. The Detroit area is home to numerous significant works of public art in its parks, libraries, schools, and hospitals. This new and updated edition of a classic guidebook considers over 150 pieces organized by section into six geographical districts of metropolitan Detroit. Each of these sections is accompanied by a comprehensive street map for easy planning of walking or driving tours, and the artworks in it are presented with individual descriptive histories and photographs. With our artistic and architectural heritage always under threat from new development and sprawl, *Art in Detroit Public Places* showcases the rich tradition of public art already in our community and also raises awareness of the need for its preservation. The vast collection of public art in metropolitan Detroit includes works by such important national and international figures as Alexander Calder, Gutzon Borglum, Sam Gilliam, Robert Graham, Carl Milles, Louise Nevelson, Isamu Noguchi, and Auguste Rodin, as well as fine pieces by many noteworthy area artists. City founders, corporations, commercial developers, and private citizens have all contributed to this rich legacy, and many of the newly built public spaces in the area have been enlivened with artwork in recent years. This new and updated version of *Art in Detroit Public Places* adds more than thirty works to those considered in the previous edition, including Babcock and Ernstberger's *Monroe and Woodward Monument Markers* in the city's Campus Martius Park, and Barr and De Giusti's *Transcending* in Hart Plaza. As downtown Detroit and the surrounding areas continue to evolve and grow, *Art in Detroit Public Places* serves as a record of public art already in existence and a fitting justification for its protection. Art and architecture enthusiasts, along with anyone interested in the cityscape of Detroit, will enjoy this useful volume.      **Department of the Interior and Related Agencies Appropriations for 2000** United States. Congress. House. Committee on Appropriations. Subcommittee on Department of the Interior and Related Agencies, 1999      *The World of Renaissance Italy* Joseph P. Byrne, 2017-06-22 Students of the Italian Renaissance who wish to go beyond the standard names and subjects will find in this text abundant information on the lives, customs, beliefs, and practices of those who lived during this exciting time period. *The World of Renaissance Italy: A Daily Life Encyclopedia* engages all of the Italian peninsula from the Black Death (1347-1352) to 1600. Unlike other encyclopedic works about the Renaissance era, this book deals exclusively with Italy, revealing the ways common Italian people lived and

experienced the events and technological developments that marked the Renaissance era The coverage specifically spotlights marginal or traditionally marginalized groups including women homosexuals Jews the elderly and foreign communities in Italian cities The entries in this two volume set are organized into 10 sections of 25 alphabetically listed entries each Among the broad sections are art fashion family and gender food and drink housing and community politics recreation and social customs and war The See Also sources for each article are listed by section for easy reference a feature that students and researchers will greatly appreciate The extensive collection of contemporary documents include selections from a diary letters a travel journal a merchant s inventory Inquisition testimony a metallurgical handbook and text by an artist that describes what the author feels constitutes great work Each of the primary source documents accompanies a specific article and provides an added dimension and degree of insight to the material

**Renaissance Fun** Philip Steadman, 2021-04-13 *Renaissance Fun* is about the technology of Renaissance entertainments in stage machinery and theatrical special effects in gardens and fountains and in the automata and self playing musical instruments that were installed in garden grottoes How did the machines behind these shows work How exactly were

chariots filled with singers let down onto the stage How were flaming dragons made to fly across the sky How were seas created on stage How did mechanical birds imitate real birdsong What was artificial music three centuries before Edison and the phonograph How could pipe organs be driven and made to play themselves by waterpower alone And who were the architects engineers and craftsmen who created these wonders All these questions are answered At the end of the book we visit the lost garden of marvels at Pratolino with its many grottoes automata and water jokes and we attend the performance of Mercury and Mars in Parma in 1628 with its spectacular stage effects and its music by Claudio Monteverdi one of the places where opera was born Renaissance Fun is offered as an entertainment in itself But behind the show is a more serious scholarly argument centred on the enormous influence of two ancient writers on these subjects Vitruvius and Hero Vitruvius's Ten Books on Architecture were widely studied by Renaissance theatre designers Hero of Alexandria wrote the Pneumatics a collection of designs for surprising and entertaining devices that were the models for sixteenth and seventeenth century automata A second book by Hero On Automata Making much less well known then and now describes two miniature theatres that presented plays without human intervention One of these it is argued provided the model for the type of proscenium theatre introduced from the mid sixteenth century the generic design which is still built today As the influence of Vitruvius waned the influence of Hero grew
