

A vibrant, cartoon-style illustration of a garden scene. On the left, a thick, brown, braided vine arches over the scene, laden with clusters of purple grapes. A fox with orange fur and a white underbelly and tail tip is standing on its hind legs in the center, looking up at the grapes. The ground is green with various flowers, including red and yellow daisies, and a red mushroom with white spots in the bottom left. In the background, there are two green trees with small red fruits and a blue sky with a few white clouds.

Surfaces and Essences Douglas R Hofstadter, Emmanuel Sander, 2013-04-23 Analogy is the core of all thinking This is the simple but unorthodox premise that Pulitzer Prize winning author Douglas Hofstadter and French psychologist Emmanuel Sander defend in their new work

Hofstadter has been grappling with the mysteries of human thought for over thirty years. Now with his trademark wit and special talent for making complex ideas vivid, he has partnered with Sander to put forth a highly novel perspective on cognition. We are constantly faced with a swirling and intermingling multitude of ill-defined situations. Our brain's job is to try to make sense of this unpredictable swarming chaos of stimuli. How does it do so? The ceaseless hail of input triggers analogies galore, helping us to pinpoint the essence of what is going on. Often this means the spontaneous evocation of words, sometimes idioms, sometimes the triggering of nameless long-buried memories. Why did two-year-old Camille proudly exclaim "I undressed the banana"? Why do people who hear a story often blurt out "Exactly the same thing happened to me" when it was a completely different event? How do we recognize an aggressive driver from a split-second glance in our rearview mirror? What in a friend's remark triggers the offhand reply "That's just sour grapes"? What did Albert Einstein see that made him suspect that light consists of particles when a century of research had driven the final nail in the coffin of that long-dead idea? The answer to all these questions, of course, is analogy: making the meat and potatoes, the heart and soul, the fuel and fire, the gist and the crux, the lifeblood and the wellsprings of thought. Analogy, making far from happening at rare intervals, occurs at all moments, defining thinking from top to toe, from the tiniest and most fleeting thoughts to the most creative scientific insights. Like G. Escher, Bach, before it, *Surfaces and Essences* will profoundly enrich our understanding of our own minds. By plunging the reader into an extraordinary variety of colorful situations involving language, thought, and memory, by revealing bit by bit the constantly churning cognitive mechanisms normally completely hidden from view, and by discovering in them one central invariant core, the incessant unconscious quest for strong analogical links to past experiences, this book puts forth a radical and deeply surprising new vision of the act of thinking.

The Minority Body, Elizabeth Barnes, 2017-04-14. Elizabeth Barnes argues compellingly that disability is primarily a social phenomenon, a way of being a minority, a way of facing social oppression, but not a way of being inherently or intrinsically worse off. This is how disability is understood in the Disability Rights and Disability Pride movements, but there is a massive disconnect with the way disability is typically viewed within analytic philosophy. The idea that disability is not inherently bad or sub-optimal is one that many philosophers treat with open skepticism and sometimes even with scorn. The goal of this book is to articulate and defend a version of the view of disability that is common in the Disability Rights movement. Elizabeth Barnes argues that to be physically disabled is not to have a defective body but simply to have a minority body.
