**The Known Economy** Colin Danby, 2017-06-26 Why do critics and celebrants of globalization concur that international trade and finance represent an inexorable globe bestriding force with a single logic *The Known Economy* shows that both camps rest on the same ideas about how the world is scaled Two centuries ago romantic and rationalist theorists concurred that the world was divided into discrete nations moving at different rates toward a modernity split between love and money Though differing over whether this history is tragedy or triumph they united in projecting an empty international space in which a Moloch like global capitalism could lurk *The Known Economy* tracks the colonial development of national accounting and re examines the ways gender and heteronormativity are built in to economic representation It re interprets the post WWII spread of standardized economic statistics as the project of international organizations looking over the shoulders of national governments rather than the expanding power of national governments over populations

**Africa Yesterday, Today and Tomorrow** Nathan Andrews, 2013-02-14 From a multi dimensional and interdisciplinary standpoint this book challenges the teleological and unidirectional notions of development embodied in the idea of modernisation or progress and offers a critique of the tendency to consider Africa as a basket case which often gives the Western self an undeserving privilege and superiority over the African other Mostly authored by emerging African scholars this 16 chapter volume addresses the historical application of development projects in Africa and their modern impact in economic political cultural social and infrastructural contexts among others The book therefore unearths development dynamics in specific African countries examines the continent's external relations rethinks predominant ideas on development and engages in critical examination of concepts and practices that have maintained hegemonic positions in the discussions on Africa's development Its uniqueness lies in the ability to bring these several voices and themes together into a concise conception of both the challenges and possibilities of Africa's sustainable development The book targets both the academic and policy worlds in Africa and around the world as well as ordinary members of the public who seek to broaden their theoretical and empirical understanding on the changing dynamics on the African continent **What's Wrong with**

**the United Nations and How to Fix it** Thomas G. Weiss, 2009 Six decades after its establishment the United Nations and its system of related agencies and programs is perpetually in crisis While World War I and World War II gave rise to groundbreaking efforts at international organization in 1919 and 1945 the UN today seems ill equipped to deal with modern challenges to world order Neither the end of the Cold War nor the aftermath of 9 11 has led to the creation of a next generation of multilateral institutions But what exactly is wrong with the UN and how can we fix it Is it possible to retrofit the world body In this succinct and illuminating analysis Thomas G Weiss takes a diagnosis and cure approach to the world organization's inherent difficulties In the first half of the book he considers the problems of international leadership and decision making in a world of self interested states the diplomatic difficulties caused by the artificial divisions between the industrialized North and the global South the structural problems of managing the UN's many overlapping jurisdictions

agencies and bodies and the ever demanding challenges of bureaucracy and leadership The second half examines how to mitigate these maladies and points the way to a more ideal world in which the UN's institutional ills might be cured His remedies are not based on pious hopes of a miracle cure for the UN but rather on specific and encouraging examples that could be replicated With considered optimism and in contrast to received wisdom Weiss contends that substantial change in intergovernmental institutions is plausible and possible This indispensable book will spark debate amongst students scholars and policy makers concerned with international politics as well as anyone genuinely interested in the future of the United Nations and international cooperation

*Transforming Brazil* Rafael R. Ioris, 2014-05-09 In this book Rafael R Ioris critically revisits the postwar context in Brazil to reexamine traditional questions and notions pertaining to the nature of Latin America's political culture and institutions It was in this period that the region lived some of its most intense and successful experiences of fast economic growth which was paradoxically marred by heightened ideological divisions political disruptions and the emergence of widespread authoritarian rule Combining original sources of political diplomatic intellectual cultural and labor histories Ioris provides a comprehensive history of the fruitful debates concerning national development in postwar Brazil a time when the so called country of the future faced one of its best moments for consolidating political democracy and economic prosperity He argues that traditional views on political instability have been excessively grounded on an institutional focus which should be replaced by in depth analysis of events on the ground In so doing he reveals that as national development meant very different things to multiple different social segments of the Brazilian society no unified support could have been provided to the democratically elected political regime when things rapidly became socially and politically divisive early in the 1960s Innovating in its multidimensional analytical scope and interdisciplinary focus *Transforming Brazil* provides a rich political cultural and intellectual examination of a historical period characterized by rapid socio economic changes amidst significant political instability and the heightened ideological polarization shaping the political scenario of Brazil and much of Latin America in the Cold War era

as they seek to participate fully in the process of knowledge production This book addresses one of the most compelling topics of our time and speaks to our need to understand the long struggle of women to gain an authoritative voice in higher education and the factors that underlie that struggle Scholars and researchers of women s studies higher education and a range of humanities and social sciences will find this book a welcome addition to the literature Sciences from Below Sandra Harding,2008-06-25 A preeminent science studies scholar shows how feminist and postcolonial science studies challenge the problematic modernity versus tradition binary Ontology and Economics Edward Fullbrook,2008-10-27 Tony Lawson has become a major figure of intellectual controversy on the back of juxtaposing two relatively simple and seemingly innocuous ideas He has argued firstly that success in science depends on finding and using methods including modes of reasoning appropriate to the nature of the phenomena being studied and also that there are important differences between the nature of the objects of study of natural sciences and those of social science This original book brings together some of the world s leading critics of economics orthodoxy to debate Lawson s contribution to the economics literature The debate centres on ontology which means enquiry into the nature of what exists and in this collection scholars such as Bruce Caldwell John B Davis and Geoffrey M Hodgson present their thoughtful criticisms of Lawson s work Lawson himself presents his reactions to these criticisms with full chapter replies to each of the scholars included This book is particularly useful for students and researchers concerned primarily with methodology and future development of economics It is also relevant to the concerns of philosophers of science and to all social scientists interested in methodological issues **Figuring the Population Bomb** Carole R. McCann,2016-12-01 Figuring the Population Bomb traces the genealogy of twentieth century demographic facts that created a mathematical panic about a looming population explosion This narrative was popularized in the 1970s in Paul Ehrlich s best selling book The Population Bomb which pathologized population growth in the Global South by presenting a doomsday scenario of widespread starvation resulting from that growth Carole McCann uses an archive of foundational texts disciplinary histories participant reminiscences and organizational records to reveal the gendered geopolitical grounds of the specialized mathematical culture bureaucratic organization and intertextual hierarchy that gave authority to the concept of population explosion These demographic theories and measurement practices ignited the population crisis and moved nations to interfere in women s reproductive lives Figuring the Population Bomb concludes that mid twentieth century demographic figures remain authoritative to this day in framing the context of transnational feminist activism for reproductive justice Writing Neoliberal Values Rachel C. Riedner,2015-10-05 This book examines human interest stories unpacking from them violence inherent to neoliberalism and considers if it is possible to find in these stories hints of people and labour that suggest other narratives **Stitching the 24-Hour City** Seo Young Park,2021-06-15 Stitching the 24 Hour City reveals the intense speed of garment production and everyday life in Dongdaemun a lively market in Seoul South Korea Once the site of uprisings against oppressive working conditions in the 1970s and 1980s Dongdaemun

has now become iconic for its creative economy nightlife fast fashion factories and shopping plazas Seo Young Park follows the work of people who witnessed and experienced the rapidly changing marketplace from the inside Through this approach Park examines the meanings and politics of work in one of the world's most vibrant and dynamic global urban marketplaces Park brings readers into close contact with the garment designers workers and traders who sustain the extraordinary speed of fast fashion production and circulation as well as the labor activists who challenge it Attending to their narratives and practices of work Park argues that speed rather than being a singular drive of acceleration is an entanglement of uneven paces of life labor the market and the city itself *Stitching the 24 Hour City* exposes the under studied experiences with Dongdaemun fast fashion peeling back layers of temporal politics of labor and urban space to record the human source of the speed that characterizes the never ending movement of the 24 hour city
