Frames Of Mind The Theory Of Multiple Intelligences:

Frames of Mind Howard E Gardner, 2011-03-29 There is a book I recommend for everybody It is Howard Gardner's Frames of Mind It has helped me immensely Robert Greene author of The 48 Laws of Power What do we mean when we call someone smart That they are good at math and got a high score on the SAT That they learn languages easily Those traits might be what comes to mind first they are what underly psychology's classic definition of intelligence and what we are told in school that a smart person can do But they are not the whole story As Howard Gardner argues in the groundbreaking classic Frames of Mind to limit our understanding of intelligence to book smarts misses much of what makes human beings amazing Someone who plays an instrument well is exhibiting intelligence So too someone who knows how to do physical comedy is their mastery of their movements and the space around them not brilliant And to have a profound knowledge of their own self their relationships with others and relationships between others too is to show great intelligence as well Gardner calls this the theory of multiple intelligences But this isn't just a book for intellectuals who want to argue about what intelligence is or educators debating how to teach It is for each of us In an era of teaching to the test and increasingly powerful artificial intelligence Gardner's work is a celebration of all the ways there are to be human **Frames of Mind** Howard Gardner, 1983

Learning in a Musical Key Lisa M. Hess, 2011-09-15 Learning in a Musical Key examines the multidimensional problem of the relationship between music and theological education Lisa Hess argues that in a delightful and baffling way musical learning has the potential to significantly alter and inform our conception of the nature and process of theological learning In exploring this exciting intersection of musical learning and theological training Hess asks two probing questions First What does learning from music in a performative mode require Classical modes of theological education often founder on a dichotomy between theologically musical and educational discourses It is extremely difficult for many to see how the perceived nonmusical learn from music Is musicality a universally human potential In exploring this question Hess turns to the music learning theory of Edwin Gordon which explores music's unique mode of teaching learning its primarily aural oral mode This challenge leads to the study's second question How does a theologian in the disciplinary sense integrate a performative mode into critical discourse Tracking the critical movements of this problem Hess provides an inherited transformational logic as a feasible path for integrating a performative mode into multidimensional learning This approach emerges as a distinctly

relational embodied multidimensional and non correlational performative mode theology that breaks new ground in the contemporary theological landscape As an implicitly trinitarian method rooted in the relationality of God this non correlational method offers a practical theological contribution to the discipline of Christian spirituality newly claimed here as a discipline of transformative teaching learning through the highly contextualized and self implicated scholar into relationally formed communities and ultimately into the world ,
