Library Information Preservation And Access:

Library Information Santosh Patel, 2003 **Going Digital** Donald L Dewitt, 2013-05-13

Going Digital Strategies for Access Preservation and Conversion of Collections to a Digital Format offers you succinct and analytic views of the problems and benefits of digital resources in the traditional academic library. Library administrators, collection managers and librarians will learn the advantages and disadvantages of traditional and digital collections and the costs of providing local access or implementing remote access to digital collections. Originally presented at a series of five symposiums sponsored by the Research Libraries Group, the articles in *Going Digital* will help you decide upon a cost effective collection method that will meet the needs of your library, your patrons and your budget. The chapters in this text are written by the nation's leading librarians who pose and answer questions about hardware and software needed for digital libraries, the costs involved establishing and maintaining access to digital collections, copyright concerns and long term preservation problems. *Going Digital* gives you insight into factors that will help you decide what will best meet the goals of your library, such as the advantages and disadvantages of preserving microfilm and digital conversion, choosing the correct hardware and software for your digital preservation program, the changes required from librarians when shifting from collection development to digital resources, examining the selection process for collections from perspectives of access, public service, technological requirements and preservation, ways to improve access to traditional collections, cost comparisons between digital and hard copy resources, devising a technical plan for successful digital conversion of projects involving the user's wants when selecting collections for digital conversion and recognizing the central parts patrons play in the selection process. In light of the changing ways we receive and keep our information, *Going Digital* discusses new collection preservation criteria and suggests that access and informational values, not just deterioration, should be equal factors in selecting materials to be converted to digital form. Proving that digital collections are changing every facet of library operations, *Going Digital* shows you the most cost effective way to begin a digital collection and how to choose what materials to digitize in order to provide your patrons with the information they want and need.

Managing Preservation for Libraries and Archives John Feather, 2018-10-24

The preservation of library and archival materials can encompass everything from bookbinding and paper repair to new techniques for maintaining and exploiting digital text, sound or images. *Managing Preservation for Libraries and Archives* brings together an international team of contributors presenting the latest findings on key areas of preservation and addressing the most common storage and retrieval problems for different types of media. The authors also revisit traditional preservation and conservation approaches and suggest how to develop policies for the future. First summarising historical developments, the book sets out key preservation principles, rationales for selecting materials for preservation and how to choose the best methods. Different contributors report on state of the art preservation techniques for paper media and sound archives, explain how the appropriate techniques can be applied and how storage and access can best

be managed in the long term Later chapters analyse the benefits and problems of digitising different types of materials the long term viability of digital media issues of access to digital surrogate documents as opposed to the original medium and the challenges in the digital context of bibliographical control cataloguing metadata distribution and copyright protection An extensive chapter on international information sources provides signposting to a wealth of guidance on the latest techniques Managing Preservation for Libraries and Archives will guide readers working in the library archives museum and heritage sectors through the choices between digital and traditional preservation techniques and prepare them for likely future developments in managing both preservation and access

Preserving Digital Information Task Force on Archiving of Digital Information, Commission on Preservation and Access, Research Libraries Group, 1996 The 21 member Task Force on Archiving of Digital Information was formed in December 1994 and spent a year studying what is needed to make digital libraries stable accessible and valid Their final report is divided into the following sections 1 Introduction which examines the fragility of cultural memory in a digital age and the limits of digital technology 2 The Challenge of Archiving Digital Information a discussion of the obsolescence of certain digital media migration of digital information to other hardware software configurations or generations legal and institutional issues and the need for deep infrastructure 3 Information Objects in the Digital Landscape which examines the issue of integrity of digital information and stakeholder interests in that question 4 Archival Roles and Responsibilities about the operating environment migration strategies and managing costs and finances and 5 Summary and Recommendations One of the major findings of the study was that a process of certification was needed to create a climate of trust in this field of endeavor The future needs a sufficient number of people who can be trusted to go to great lengths to store migrate and provide access to digital collections A series of pilot projects and support structures are recommended Appendices include copies of the charge of the task force and of a detailed analysis of a cost model Contains 75 references BEW

The Future of the Past Abby Smith Rumsey, Abby Smith, Council on Library and Information Resources. Commission on Preservation and Access, 1999 This report summarizes the challenges and accomplishments in preservation efforts since the early 1960s The paper gives an overview of the preservation and management of research collections and describes the context in which decisions are made by researchers and librarians about what to preserve and how By examining how librarians and scholars grappled with the first great crisis in the preservation of library materials the pandemic loss of information printed on embrittled acid paper it traces the development of the current consensus on how to manage large collections recorded on many media of varying stability Highlights include permanent paper paper deacidification the rationale for reformatting the scope of the problem and local responsibilities vs national priorities The need for a national preservation plan is discussed as well as selection of materials for the national plan and the role of

scholars in selection The paper also addresses the problem that despite striking progress made in preservation technology and management the difficulties of preserving original library materials have scarcely diminished over time and demand the same thoughtful cooperation between scholars and librarians as they enter the 21st century as the brittle book problem received in the 1980s AEF

Agricultural Libraries Information Notes, 1996-04 *Preservation in the Digital World* Paul Conway, Commission on Preservation and Access, 1996 This paper seeks to provide an intellectual rationale for maintaining the centrality of preservation concepts and ethics in an increasingly digital information environment in other words while some long held principles of preservation management may no longer apply many others are still viable in high tech situations Libraries are rearranging budgets and raising funds for digital image conversion They must take steps to ensure long term access to digital image files The proposed context for preservation action or conditions that need to exist as steps are taken puts a premium on the library's sense of itself as custodian of materials with social value an organizational structure that allocates resources to preservation and cooperative effort among institutions Preservation action should ultimately place priority on the longevity choice or selectivity quality integrity and accessibility of the images The paper also offers suggestions for a framework of effective preservation leadership Contains 10 figures and 75 references BEW
