Great Apes Between Two Worlds:

The Great Apes, 1993 In words and more than 100 photographs the author recounts his decade among the world's great apes and includes essays by Jane Goodall, George B. Schaller and Mary G. Smith. Untamed Anita Silvey, 2015 This biography for children will trace Goodall's life but each chapter will also focus on two or more of the chimpanzees that she observed with information in sidebars about these particular animals. Along with biographical details the book will explore the ethical issues that surround Goodall's work and show what has changed in our understanding of Great Apes. What do we know today about these animals in terms of language, speech, tool use and DNA? How has sophisticated technology, GPS systems, Satellite imagery, portable digital microphones been used to gain new information about animal populations. **The Great Apes** Chris Herzfeld, 2017-01-01 Foreword by Jane Goodall. The uncanniness of similitude: wild men, simians and hybrid beings. Skeletons, skins and skulls: apes in the age of colonial expansion and natural history collections. Apes as guinea pigs: primates and experimental research. Great apes in the eyes of scientists: what does it mean to be an ape? Apes that think they are human: astronaut apes, painting apes, talking apes. Conquering the field: pioneers, the quest for origins and primates. Socialities, culture and traditions among primates when the boundary between humans and apes blurs. Women and apes: sex, gender and primatology. Becoming human: being ape. Endangered Gorillas Carl R. Green, Jane Katirgis, 2015-07-15 Gorillas are brilliant, familial creatures that have exhibited complex emotions, intellect and abilities much like humans. Then why are gorillas at risk? Learn about the daily lives of gorillas in the wild, what is threatening their very survival and what is being done to save them. *The Ark in the Park* Mark Rosenthal, Carol Tauber, Edward Uhler, 2003 The history of one of the oldest zoos in the US filled with pictures and wonderful stories about the people and animals who made Lincoln Park Zoo. The evolution of zoos in America is also covered. **World Atlas of Great Apes and Their Conservation** Julian Oliver Caldecott, Lera Miles, 2005 This comprehensive and authoritative review of the distribution and conservation status of Great Apes includes individual country profiles for each species and overview chapters on ape biology, ecology and conservation challenges. **The Great Apes**, 1993 Nichols's words along with contributions by Jane Goodall, George B. Schaller and Mary G. Smith and 100 of his photos recount a decade of adventure among the apes including visits to the forests of Africa and Indonesia and to the man-made environments of zoos and research centers. Elegantly produced. Includes a listing of agencies and research projects but no bibliography. Annotation copyright by Book News Inc. Portland, OR. *Empty Hands, Open Arms* Deni Ellis Béchar, 2013-10-01 Absorbing Béchard's masterful adventure-driven reporting delivers an inspiring account of an all too rare ecological success story. Booklist. Bonobos have captured the public imagination, due not least to their famously active sex lives. Less well known is the fact that these great apes don't kill their own kind and that they share nearly 99% of our DNA. Their approach to building peaceful coalitions and sharing resources has much to teach us, particularly at a time when our violent ways have pushed them to the brink of extinction. Animated by a desire to understand bonobos and learn

how to save them Deni Ellis B chard traveled into the Congo Empty Hands Open Arms is the account of this journey Along the way we see how partnerships between Congolese and Westerners with few resources but a common purpose and respect for indigenous knowledge have resulted in the protection of vast swaths of the rainforest And we discover how small solutions found through openness humility and the principle that poverty does not equal ignorance are often most effective in tackling our biggest challenges Combining elements of travelogue journalism and natural history this incomparably rich book takes the reader not only deep into the Congo but also into our past and future revealing new ways to save the environment and ourselves Riveting and surprisingly uplifting David Suzuki author of The Sacred Balance The embodiment of the type of reporting that we dream of reading but all too rarely encounter intelligent engaged and above all astonishingly perceptive Dinaw Mengestu author of The Beautiful Things That Heaven Bears Also published as Of Bonobos and Men **Wattana** Chris Herzfeld,2016-05-02 She likes tea sews draws on papers and is a self taught master of tying and untying knots But she is not a crafty woman of the DIY set she is Wattana an orangutan who lives in the Jardin des Plantes Zoo in Paris And it is in Paris where Chris Herzfeld first encounters and becomes impressed by Wattana and her exceptional abilities with knots In Wattana An Orangutan in Paris Herzfeld tells not only Wattana s fascinating story but also the story of orangutans and other primates including bonobos chimpanzees and gorillas in captivity Offering a uniquely intimate look at the daily lives of captive great apes Herzfeld uses Wattana s life to trace the history of orangutans from their first arrival in Europe in 1776 to the inhabitants of the Zoo of Paris and other zoos today She provides a close look at the habits technical know how and skills of Wattana who remarkably uses strings paper rolls rope and even pieces of wood to make things And she thoughtfully explores how apes individually and often with ingenuity come to terms with and adapt to their captive environments and caretakers Through these stories Wattana sympathetically reveals the extraordinary psychology and distinctive personalities of great apes as well as the interconnections between animal and human lives especially in zoos Scientists predict that orangutans will disappear from the wild by 2030 and captive animals like Wattana may as a result provide our best chance to understand and appreciate their astonishing intelligence and abilities Wattana the accomplished maker of knots is the hero of this poignant book which will enthrall anyone curious about the lives of our primate cousins *It Happened in Ohio* Carol Cartaino,2010-06-15 Thirty episodes from the history of the Buckeye State including memorable events such as the Kent State Riots but also featuring lesser known tales *Jane Goodall* Dale Peterson,2008 Peterson shows clearly and convincingly how truly remarkable Goodall s accomplishments were and how unlikely it is that anyone else could have duplicated them This biography details how Goodall helped set radically new standards and a new intellectual style in the study of animal behavior **World Without Weight** Daniel Povinelli,2012 In every domain of reasoning humans deploy an wide range of intuitive theories about how the world works So are we alone in trying to make sense of the world by postulating theoretical entities to explain how the world works or do we share this ability with other species This is the focus

of this new book from Daniel Povinelli **House documents** ,1897 *Report of the Commissioner of Education* ,1897
