Gangster Capitalism:

Gangster Capitalism Michael Woodiwiss, 2005 We know all about organized crime Blockbuster movies and books and thousands of news stories continually tell an eager public that organized crime is what gangsters do Closely knit ethnically distinct and ruthlessly efficient these mafias control the drugs trade people trafficking and other serious crimes If only states would take the threat seriously and recognize the global nature of modern organized crime the FBI's success against the New York mafias could be replicated throughout the world The wicked trade in addictive drugs could be halted The trouble is as Michael Woodiwiss demonstrates in shocking and surprising detail what everyone knows is pretty much completely wrong Organized crime is dominated by employees of multinational companies politicians and bureaucrats Gangsters are a problem but they are minor players when compared with the intelligence and law enforcement agencies that selectively enforce drugs prohibition and profit from it The position of large corporations in the global economy provides the most mouth watering opportunities for illegal profits Woodiwiss shows how respectable businessmen and revered statesmen have seized these opportunities in an orgy of fraud and illegal violence that would leave the most hardened Mafioso speechless with admiration

Fascism on Trial Henry A. Giroux, Anthony R. DiMaggio, 2024-02-22 This book interrogates rising fascism in America It spotlights the major facets of fascism that increasingly characterize contemporary US politics in relation to political authoritarianism the rise of anti intellectualism the mainstreaming of conspiracy theories the glorification of political street violence and state violence rising white supremacy and the militarization of US political discourse Alongside this Giroux and DiMaggio show how the assault on critical education and pedagogy is central to the fascist program They stress the importance of reprioritizing education as a public good to combating fascist politics and ideology and draw links between fascism and the banning of books in schools whitewashing history and punishing policies aimed at Black Brown and transgender youth They challenge the commonly embraced notion that Trumpism is primarily a function of economic insecurity within his support base documenting how support for the former president primarily centered on reactionary socio cultural values and white supremacy They also show how white supremacist values are central to the Trump base defending the January 6th insurrection despite academics journalists and political officials in both major parties ignoring the threat of rising white nationalism

The Hidden History of Crime, Corruption, and States Renate Bridenthal, 2017-06 Renowned historical sociologist Charles Tilly wrote many years ago that banditry piracy gangland rivalry policing and war making all belong on the same continuum This volume pursues the idea by revealing how lawbreakers and lawmakers have related to one another on the shadowy terrains of power over wide stretches of time and space Illicit activities and forces have been more important in state building and state maintenance than conventional histories have acknowledged Covering vast chronological and global terrain this book traces the contested and often overlapping boundaries between these practices in such very different polities as the pre modern city states of Europe the modern nation states of France and Japan the imperial power of Britain in India and North America Africa's and Southeast Asia's postcolonial states and the emerging postmodern regional entity of the Mediterranean Sea Indeed the

contemporary explosion of transnational crime raises the question of whether or not the relationship of illicit to licit practices may be mutating once more leading to new political forms beyond the nation state **Pedagogy of Resistance** Henry A. Giroux, 2022-03-24 Henry A Giroux argues that education holds a crucial role in shaping politics at a time when ignorance lies and fake news have empowered right wing groups and created deep divisions in society Education with its increasingly corporate and conservative based technologies is partly responsible for creating these division It contributes to the pitting of people against each other through the lens of class race and any other differences that don t embrace White nationalism Giroux s analysis ranges from the pandemic and the inequality it has revealed to the rise of Trumpism and its afterlife and to the work of Paulo Freire and how his book Pedagogy of Hope can guide us in these dark times and help us produce critical and informed citizens He argues that underlying the current climate of inequity isolation and social atomization all exacerbated by the pandemic is a crisis of education Out of this comes the need for a pedagogy of resistance that is accessible to everyone built around a vision of hope for an alternative society rooted in the ideals of justice equality and freedom Women's Imprisonment in Eastern Europe Arta Jalili Idrissi, 2023-11-16 The first qualitative study based on an ethnographic approach to women s carceral experiences in Latvia this book draws parallels across Eastern Europe and throughout the neoliberal West to provide a refreshing and timely addition to the study of criminology and the sociology of imprisonment *Reinventing the Left in the Global South* Richard Sandbrook, 2014-08-07 A fresh appraisal of the nature and significance of the democratic left in the Global South The Global Gamble Peter Gowan, 1999 The collapse of the Soviet Bloc presented policy makers in Washington with a temptation reminiscent of Faust s opening up vistas of hitherto unimaginable global power but the cold breath of Mephistopheles is already blowing across devastated communities from southeast Asia to the Balkan peninsula in the wake of America s bid for world power In this major analysis of the new era of American domination Peter Gowan strips away the language of humanitarian ideals that have cloaked US interventions from Baghdad to Belgrade to reveal far more cynical goals with the real democratic hopes of the peoples of Europe the South and East systematically trampled down in the rush to impose NATO based US political leadership across the globe Gowan surveys the transformation of NATO from Cold War security shield for Western Europe into a global vigilante force in pursuit of US interests with European footsoldiers under American command He explains the projected expansion of the EU into a set of first and second class countries incapable of any political action independent of the United States and he analyses the catastrophic social and economic effects of the neo liberal Shock Therapy imposed on Russia and Eastern Europe with devastating results Far from being an unstoppable natural force against which every nation state is powerless Gowan argues compellingly that the process of globalisation has been relentlessly driven forward by the enormous political power of the US state and business interests in a highly conscious bid to extend their strategic dominance over the world economy He shows how the international finance system the Dollar Wall Street Regime created out of the ashes of Breton Woods has been

exploited as a political lever to open up local economies to US products and speculative flows of hot money and demonstrates how each financial crisis over the last ten years has been used by the Washington Wall Street axis to force through dramatic economic and social re engineering in the targeted countries While posing as a benign economic education for developing economies US led rescue packages in fact leave these countries seriously weakened destroying national industrial sectors while elevating to power such local rentier interests as the Russian mafia capitalists and leaving the already fragile social tissue of many of these companies irreparably damaged This masterly survey both bold and compelling will become a landmark in the debate on the new world order threatening the twenty first century The Myth of Real Democracy and Other Myths of Modernity. Brian V Peck,2011-08-24 One of the most savage critiques of Modernity ever written on so called Democracy in its many forms Meritocracy What is Truth Fact or Fiction the Mass Media and Individualism Meaning in essence that Socrates famous axiom is as relevant today as it was in the past which was according to Plato that the unexamined life is not worth living The Left in China Ralf Ruckus,2023-02-20 Does a great service by shifting our attention to the oppositional movements of Chinese workers peasants students and women who have contested inequality and exploitation Manfred Elfstrom Tracing the fascinating history of left wing subversive and oppositional forces in China over the last 70 years Ralf Ruckus pulls back the curtain on Chinese politics He looks at the interconnected movements since the founding of the People s Republic of China in 1949 drawing out the main actors ideas and actions Taking us through the Hundred Flowers Movement in the 1950s the Cultural Revolution in the 1960s the democracy movements of the 1970s and 1980s and the workers movements that accompanied these events he draws a clear picture of the political currents of China its ruling party and leaders through to Xi Jinping with a spotlight on contemporary struggles Is the country still socialist the Chinese Communist Party a left wing organisation and the leadership indeed Marxist The book will sort out the confusion present the true history of social movements and left politics in China up to the present day **Utopian Generations** Nicholas Brown,2009-01-10 Utopian Generations develops a powerful interpretive matrix for understanding world literature one that renders modernism and postcolonial African literature comprehensible in a single framework within which neither will ever look the same African literature has commonly been seen as representationally naïve vis vis modernism and canonical modernism as reactionary vis vis postcolonial literature What brings these two bodies of work together argues Nicholas Brown is their disposition toward Utopia or the horizon of a radical reconfiguration of social relations Grounded in a profound rethinking of the Hegelian Marxist tradition this fluently written book takes as its point of departure the partial displacement during the twentieth century of capitalism s internal limit classically conceived as the conflict between labor and capital onto a geographic division of labor and wealth Dispensing with whole genres of commonplace contemporary pieties Brown examines works from both sides of this division to create a dialectical mapping of different modes of Utopian aesthetic practice The theory of world literature developed in the introduction grounds the subtle and powerful readings at

the heart of the book focusing on works by James Joyce Cheikh Hamidou Kane Ford Madox Ford Chinua Achebe Wyndham Lewis Ngugi wa Thiong'o and Pepetela A final chapter arguing that this literary dialectic has reached a point of exhaustion suggests that a radically reconceived notion of musical practice may be required to discern the Utopian desire immanent in the products of contemporary culture

Insurrections Henry A. Giroux, 2023-01-26 With this book Henry A Giroux argues that insurrection has become a dominant motif for the USA and other countries torn between the promises and ideals of democracy and an emergent authoritarianism He argues that education is central to the idea of insurrection showing how on the one hand it contributes to an insurrectional authoritarianism wedded to a fascist legacy that calls for racial purity militarism ultra nationalism and state terrorism On the other hand he presents the idea of insurrectional democracy which has a long legacy in the battle for racial justice economic equality and a politics of inclusion The book explores how both positions are motivated by specific visions values and particular understandings of education and agency He also shows how powerful images social media and the internet are in merging political education power and cultural politics Giroux makes an impassioned call for an insurrectional democracy that makes education central to politics and produces an anti capitalist consciousness as the basis for developing a mass movement in defence of a radical democracy
