Fuzzy If-Then Rules in Computational Intelligence Da Ruan,Etienne E. Kerre,2000-04-30 During the last three decades interest has increased significantly in the representation and manipulation of imprecision and uncertainty Perhaps the most important technique in this area concerns fuzzy logic or the logic of fuzziness initiated by L A Zadeh in 1965 Since then fuzzy logic has been incorporated into many areas of fundamental science and into the applied sciences More importantly it has been successful in the areas of expert systems and fuzzy control The main body of this book consists of so called IF THEN rules on which experts express their knowledge with respect to a certain domain of expertise Fuzzy IF THEN Rules in Computational Intelligence Theory and Applications brings together contributions from leading global specialists who work in the domain of representation and processing of IF THEN rules This work gives special attention to fuzzy IF THEN rules as they are being applied in computational intelligence Included are theoretical developments and applications related to IF THEN problems of propositional calculus fuzzy predicate calculus implementations of the generalized Modus Ponens approximate reasoning data mining and data transformation techniques for complexity reduction fuzzy linguistic modeling large scale application of fuzzy control intelligent robotic control and numerous other systems and practical applications This book is an essential resource for engineers mathematicians and computer scientists working in fuzzy sets soft computing and of course computational intelligence Computational Intelligence: Theory and Applications Bernd Reusch,2007-07-16 Fuzzy Days in Dortmund were held for the first time in 1991 Initially the con ference was intended for scientists and practitioners as a platform for discussions on theory and application of fuzzy logic Early on synergetic links with neural networks were included and the conference evolved gradually to embrace the full spectrum of what is now called Computational Intelligence CI Therefore it seemed logical to launch the 4th Fuzzy Days in 1994 as a conference for CI one of the world s first conferences featuring fuzzy logic neural networks and evolu tionary algorithms together in one event Following this successful tradition the 6th Fuzzy Days aim is to provide an international forum for reporting significant results on the theory and application of Cl methods Once again we have received a remarkable number of papers I would like to express my gratitude to all who have been interested in presenting their work within the framework of this conference and to the members of the programme committee for their valuable work in this edition each paper was reviewed by five referees In particular I wish to thank all keynote and tutorial speakers for their commitment Last but not least I am obliged to the Deutsche Forschun gemeinschaft and Kommunalverband Ruhrgebiet for their financial support *A Tribute to Prof. Dr. Da Ruan* Jie Lu,Etienne Kerre,2012-07-18 This volume is a tribute to Professor Dr Da Ruan who passed away suddenly on July 31 2011 aged 50 The flood of emails that spread throughout the fuzzy logic research community with the tragic news was testimony to the respect and liking felt for this remarkable man Da was a hardworking highly productive scientist who during his short life published 35 books and more than 250 research papers in highly ranked journals and conference proceedings

He established two successful conferences FLINS and ISKE as well as the international journal JCIS This book is a collection of contributions from 88 of Da s academic friends from 47 institutes presented in 60 chapters and over 70 pictures A Foreword by Lotfi Zadeh begins Da s story Section 1 provides an overview of Da s funeral on August 6 2011 Part II outlines Da s scientific life his education scientific career publications and keynote talks Part III presents testimonials by Da s colleagues of academic activities including guest professorships and his many visits to foreign institutes Part IV contains thirty contributions from colleagues and friends across the world to describe their collaborative experience with Da We hope this book will keep the memory of Da alive great scientist great friend great humanitarian He will remain in our hearts forever        **Energy Management—Collective and Computational Intelligence with Theory and Applications** Cengiz Kahraman,Gülgün Kayakutlu,2018-03-21 This book presents a selection of recently developed collective and computational intelligence techniques which it subsequently applies to energy management problems ranging from performance analysis to economic analysis and from strategic analysis to operational analysis with didactic numerical examples As a form of intelligence emerging from the collaboration and competition of individuals collective and computational intelligence addresses new methodological theoretical and practical aspects of complex energy management problems The book offers an excellent reference guide for practitioners researchers lecturers and postgraduate students pursuing research on intelligence in energy management The contributing authors are recognized researchers in the energy research field
