Reclamation Sarah Zettel, 2009-05-30 Set in the far future RECLAMATION centers on The Realm of the Nameless Powers a world so ravaged by age that only a portion of underground canyons is habitable The Realm has degenerated into a harsh caste system and Middle Ages technology Their religion strictly enforces the castes who can marry and which children are allowed to live Eric Born is a lapsed priest and a son of one of the noble families Like all members of the priesthood he is a very precise telekinetic but he also has the rare gift of healing Stifled by the backward ways of The Realm he escapes to make a new life among the stars Since then he has established himself as a freelance computer engineer He is employed by the Rhudolant Vitae space traders who travel between star systems trading their technological and management skills for raw materials and political influence The Vitae s deepest desire is to find their native world from which they were forced to flee many centuries ago When Eric Born discovers that The Realm is that very world his loyalties are split

Dichronauts Greg Egan, 2017-07-11 Seth is a surveyor along with his friend Theo a leech like creature running through his skull who tells Seth what lies to his left and right Theo in turn relies on Seth for mobility and for ordinary vision looking forwards and backwards Like everyone else in their world they are symbionts depending on each other to survive In the universe containing Seth s world light cannot travel in all directions there is a dark cone to the north and south Seth can only face to the east or the west if he tips his head backwards If he starts to turn to the north or south his body stretches out across the landscape and to rotate as far as north north east is every bit as impossible as accelerating to the speed of light Every living thing in Seth s world is in a

state of perpetual migration as they follow the sun's shifting orbit and the narrow habitable zone it creates. Cities are being constantly disassembled at one edge and rebuilt at the other with surveyors mapping safe routes ahead. But when Seth and Theo join an expedition to the edge of the habitable zone, they discover a terrifying threat: a fissure in the surface of the world so deep and wide that no one can perceive its limits. As the habitable zone continues to move, the migration will soon be blocked by this unbridgeable void, and the expedition has only one option to save its city from annihilation: descend into the unknown.

Superpower M. Keith Booker, 2010-05-01 Supernatural and superhuman elements have been prominent in American culture from the time of the New England Puritans' intense emphasis on religion. *Superpower* surveys the appearance of supernatural and superhuman elements in American culture, focusing on the American fascination with narratives involving supernatural adventure, superhuman heroes, and vast conspiracies driven by supernatural evil. In particular, M. Keith Booker suggests that the popularity of such themes indicates a deep-seated dissatisfaction with the rationalized world of contemporary American society. Booker details the development of the national myths underlying the characters of Superman, Batman, and Spiderman; television hits from *Star Trek* to *Lost*; and the franchises of *Pirates of the Caribbean* and *The Lord of the Rings*. This culture-spanning investigation begins with a historical survey of supernatural and superhuman themes in American culture and concludes with the recent upsurge that began in the 1990s. It then turns to various works of recent popular culture with supernatural and superhuman themes, such as *Twin Peaks*, *The X-Files*, and *Buffy the Vampire Slayer*, organized according to the desires to which these works respond. What do these fantasies reveal about what it means to be American today, and what we want it to mean?

The New Space Race Martha Davis, 2025-04-02 Explore the groundbreaking endeavors of three visionary entrepreneurs: Jeff Bezos, Richard Branson, and Elon Musk. This compelling narrative unveils the fierce competition and ambitious ambitions that define the modern era of space exploration as these titans of industry aim not just to reach the stars but to colonize them. Discover the motivations behind their ventures: Bezos's Blue Origin, Branson's Virgin Galactic, and Musk's SpaceX, each shaped by a unique vision for humanity's future in space. As you engage with the innovative technologies they are developing and the challenges they face, you will gain insight into the personal philosophies and drive that propel these leaders to push the boundaries of what is possible. This book delves into the broader implications of their missions, examining the ethical, environmental, and economic considerations of space colonization. Through captivating anecdotes and thorough research, *The New Space Race* profiles the rivalry and collaboration among these pioneers who strive to transform humanity into a multi-planetary species.
