Collection From the Shelf to the Web tracks the continuing evolution of electronic reference resources and how they are accessed in a variety of settings. The book also examines the use of electronic references from a publisher's perspective and looks at the most important Web-accessible reference tools, both free and subscription, in the areas of humanities, medicine, the social sciences, business, and education. The Reference Collection From the Shelf to the Web also examines issues of authority, accessibility, cost, comfort, and user education in evaluating electronic resources; the formation of purchasing consortia to facilitate the transfer of reference materials from print to online formats; current literature and research findings on the state of digital versus print reference collections; what electronic publishing means to smaller reference books, dictionaries, almanacs, etc.; the need for increased information literacy among students; the nature, extent, and causes of cyber plagiarism; the use of federated search tools; and includes a selected list of the top 100 free Internet reference sites. The Reference Collection From the Shelf to the Web is an essential resource for all reference and collection development librarians and an invaluable aid for publishing professionals. *El-Hi Textbooks & Serials in Print, 2003*, 2003
