"Cause Unknown" Ed Dowd,2022-11-09 What is killing healthy young Americans 2020 saw a spike in deaths in America smaller than you might imagine during a pandemic some of which could be attributed to COVID and to initial treatment strategies that were not effective But then in 2021 the stats people expected went off the rails The CEO of the OneAmerica insurance company publicly disclosed that during the third and fourth quarters of 2021 death in people of working age 18 64 was 40 percent higher than it was before the pandemic Significantly the majority of the deaths were not attributed to COVID A 40 percent increase in deaths is literally earth shaking Even a 10 percent increase in excess deaths would have been a 1 in 200 year event But this was 40 percent And therein lies a story a story that starts with obvious questions What has caused this historic spike in deaths among younger people What has caused the shift from old people who are expected to die to younger people who are expected to keep living It isn t COVID of course because we know that COVID is not a significant cause of death in young people Various stakeholders opine about what could be causing this epidemic of unexpected sudden deaths but CAUSE UNKNOWN doesn t opine or speculate The facts just are and the math just is The book begins with a close look at the actual human reality behind the statistics and when you see the people who are represented by the dry term Excess Mortality it s difficult to accept so many unexpected sudden deaths of young athletes known to be the healthiest among us Similarly when lots of healthy teenagers and young adults die in their sleep without obvious reason collapse and die on a family outing or fall down dead while playing sports that all by itself raises an immediate public health concern Or at least it used to Ask yourself if you recall seeing these kinds of things occurring during your own life in junior high In high school In college How many times in your life did you hear of a performer dropping dead on stage in mid performance Your own life experience and intuition will tell you that what you re about to see is not normal Or at least it wasn t normal before 2021
