The Big Shift Marc Freedman, 2012-04-10 Marc Freedman hailed by the New York Times as the voice of aging baby boomers seeking meaningful and sustaining work later in life makes an impassioned call to accept the decades opening up between midlife and anything approximating old age for what they really are an entirely new stage of life which he dubs the encore years In *The Big Shift* Freedman bemoans the fact that the discussion about longer lives in America has been entirely about the staggering economic costs of a dramatically aging society when in reality most of the nation's 78 million boomers are not getting old at least not yet The whole 60 to 80 year old period is simply new territory he writes and the people in this period constitute a whole new phenomenon in the 21st century *The Big Shift* is animated by a simple premise that the challenge of transitioning to and making the most of this new stage while deeply personal is much more than an individual problem it's an urgent social imperative one affecting all generations By embracing this time as a unique period of life and providing guidance training education and support to the millions who are in it Freedman says that we can make a monument out of what so many think of as the leftover years The result could be a windfall of talent that will carry us toward a new generation of solutions for growing problems in areas like education the environment and health care
