Global Entanglements of a Man Who Never Traveled Dominic Sachsenmaier, 2018-05-29 Born into a low level literati family in the port city of Ningbo the seventeenth century Chinese Christian convert Zhu Zongyuan likely never left his home province Yet Zhu nonetheless led a remarkably globally connected life His relations with the outside world ranging from scholarly activities to involvement with globalizing Catholicism put him in contact with a complex and contradictory set of foreign and domestic forces In *Global Entanglements of a Man Who Never Traveled* Dominic Sachsenmaier explores the mid seventeenth century world and the worldwide flows of ideas through the lens of Zhu s life combining the local regional and global Taking particular aspects of Zhu s multiple belongings as a starting point Sachsenmaier analyzes the contexts that framed his worlds as he balanced a local life and his border crossing faith At the local level the book pays attention to the intellectual political and social environments of late Ming and early Qing society including Confucian learning and the Manchu conquest questioning the role of ethnic and religious identities At the global level it considers how individuals like Zhu were situated within the history of organizations and power structures such as the Catholic Church and early modern empires amid larger transformations and encounters A strikingly original work this book is a major contribution to East Asian transnational and global history with important implications for historical approaches and methodologies

Geo-Narratives of a Filial Son Elizabeth Kindall, 2020-05-11 Huang Xiangjian a mid seventeenth century member of the Suzhou local elite journeyed on foot to southwest China and recorded its sublime scenery in site specific paintings Elizabeth Kindall s innovative analysis of the visual experiences and social functions Huang conveyed through his oeuvre reveals an unrecognized tradition of site paintings here labeled geo narratives that recount specific journeys and create meaning in the paintings Kindall shows how Huang created these geo narratives by drawing upon the Suzhou place painting tradition as well as the encoded experiences of southwestern sites discussed in historical gazetteers and personal travel records and the

geography of the sites themselves Ultimately these works were intended to create personas and fulfill specific social purposes among the educated class during the Ming Qing transition Some of Huang s paintings of the southwest together with his travel records became part of a campaign to attain the socially generated title of Filial Son whereas others served private functions This definitive study elucidates the context for Huang Xiangjian s painting and identifies geo narrative as a distinct landscape painting tradition lauded for its naturalistic immediacy experiential topography and dramatic narratives of moral persuasion class identification and biographical commemoration Chinese History Endymion Porter Wilkinson,2000 Endymion Wilkinson s bestselling manual of Chinese history has long been an indispensable guide to all those interested in the civilization and history of China In this latest edition now in a bigger format its scope has been dramatically enlarged by the addition of one million words of new text Twelve years in the making the new manual introduces students to different types of transmitted excavated and artifactual sources from prehistory to the twentieth century It also examines the context in which the sources were produced preserved and received the problems of research and interpretation associated with them and the best most up to date secondary works Because the writing of history has always played a central role in Chinese politics and culture special attention is devoted to the strengths and weaknesses of Chinese historiography

Francesca Bray,Vera Dorofeeva-Lichtmann,Georges Métaillé,2007-01-01 Drawing on history of science and philosophy of knowledge this wide ranging collection of essays on varieties of diagram schema technical illustration and chart offers a challenging new interpretation of technical knowledge in Chinese thought and practice **Eminent Nuns** Beata

Grant,2008-07-01 The seventeenth century is generally acknowledged as one of the most politically tumultuous but culturally creative periods of late imperial Chinese history Scholars have noted the profound effect on and literary responses to the fall

of the Ming on the male literati elite Also of great interest is the remarkable emergence beginning in the late Ming of educated women as readers and more importantly writers Only recently beginning to be explored however are such seventeenth century religious phenomena as the reinvention of Chan Buddhism a concerted effort to revive what were believed to be the traditional teachings texts and practices of classical Chan And until now the role played by women in these religious developments has hardly been noted at all Eminent Nuns is an innovative interdisciplinary work that brings together several of these important seventeenth century trends Although Buddhist nuns have been a continuous presence in Chinese culture since early medieval times and the subject of numerous scholarly studies this book is one of the first not only to provide a detailed view of their activities at one particular moment in time but also to be based largely on the writings and self representations of Buddhist nuns themselves This perspective is made possible by the preservation of collections of discourse records yulu of seven officially designated female Chan masters in a seventeenth century printing of the Chinese Buddhist Canon rarely used in English language scholarship The collections contain records of religious sermons and exchanges letters prose pieces and poems as well as biographical and autobiographical accounts of various kinds Supplemental sources by Chan monks and male literati from the same region and period make a detailed re creation of the lives of these eminent nuns possible Beata Grant brings to her study background in Chinese literature Chinese Buddhism and Chinese women s studies She is able to place the seven women all of whom were active in Jiangnan in their historical religious and cultural contexts while allowing them through her skillful translations to speak in their own voices Together these women offer an important but until now virtually unexplored perspective on seventeenth century China the history of female monasticism in China and the contribution of Buddhist nuns to the history of Chinese women s writing

Consumption: Theory and issues in the study of consumption Daniel Miller, 2001 **The Qing Dynasty and Traditional Chinese Culture** Richard J. Smith, 2015-10-23 The Qing dynasty 1636-1912 a crucial bridge between traditional and modern China was remarkable for its expansiveness and cultural sophistication This engaging and insightful history of Qing political social and cultural life traces the complex interaction between the Inner Asian traditions of the Manchus who conquered China in 1644 and indigenous Chinese cultural traditions Noted historian Richard J Smith argues that the pragmatic Qing emperors presented a Chinese face to their subjects who lived south of the Great Wall and other ethnic faces particularly Manchu Mongolian Central Asian and Tibetan to subjects in other parts of their vast multicultural empire They were attracted by many aspects of Chinese culture but far from being completely sinicized as many scholars argue they were also proud of their own cultural traditions and interested in other cultures as well Setting Qing dynasty culture in historical and global perspective Smith shows how the Chinese of the era viewed the world how their outlook was expressed in their institutions material culture and customs and how China s preoccupation with order unity and harmony contributed to the civilization s remarkable cohesiveness and continuity Nuanced and wide ranging his authoritative book provides an essential

introduction to late imperial Chinese culture and society

Western Visions of the Far East in a Transpacific Age,

1522-1657 Christina H. Lee, 2016-02-17 Bringing to bear the latest developments across various areas of research and disciplines this collection provides a broad perspective on how Western Europe made sense of a complex multi faceted and by and large Sino centered East and Southeast Asia The volume covers the transpacific period after Magellan's opening of the transpacific route to the Far East and before the eventual dominance of the region by the British and the Dutch In contrast to the period of the Enlightenment during which Orientalist discourses arose this initial period of encounters and conquest is characterized by an enormous curiosity and a desire to seize not only materially but intellectually the lands and peoples of East Asia The essays investigate European visions of the Far East particularly of China and Japan and examine how and why particular representations of Asians and their cultural practices were constructed revised and adapted Collectively the essays show that images of the Far East were filtered by worldviews that ranged from being on the one hand universalistic and relatively equitable towards cultures to the other extreme unilaterally Eurocentric

Praying for Power Timothy Brook, 2020-10-26 In 17th and 18th century China Buddhists and Confucians alike flooded local Buddhist monasteries with donations As gentry numbers grew faster than the imperial bureaucracy traditional Confucian careers were closed to many but visible philanthropy could publicize elite status outside the state realm Actively sought by fund raising abbots such patronage affected institutional Buddhism After exploring the relation of Buddhism to Ming Neo Confucianism the growth of tourism to Buddhist sites and the mechanisms and motives for charitable donations Timothy Brook studies three widely separated and economically dissimilar counties He draws on rich data in monastic gazetteers to examine the patterns and social consequences of patronage

The Age of Confucian Rule Dieter Kuhn, 2011-10-15 Just over a thousand years ago the Song dynasty emerged as the most advanced civilization on earth Within two centuries China was home to nearly half of all humankind In this concise history we learn why the inventiveness of this era has been favorably compared with the European Renaissance which in many ways the Song transformation surpassed With the chaotic dissolution of the Tang dynasty the old aristocratic families vanished A new class of scholar officials products of a meritocratic examination system took up the task of reshaping Chinese tradition by adapting the precepts of Confucianism to a rapidly changing world Through fiscal reforms these elites liberalized the economy eased the tax burden and put paper money into circulation Their redesigned capitals buzzed with traders while the education system offered advancement to talented men of modest means Their rationalist approach led to inventions in printing shipbuilding weaving ceramics manufacture mining and agriculture With a realist's eye they studied the natural world and applied their observations in art and science And with the souls of diplomats they chose peace over war with the aggressors on their borders Yet persistent military threats from these nomadic tribes which the Chinese scorned as their cultural inferiors redefined China's understanding of its place in the world and solidified a sense of what it meant to be Chinese The Age of Confucian Rule is an

essential introduction to this transformative era A scholar should congratulate himself that he has been born in such a time
