Geography And Refugees Patterns And Processes Of Change:

Geography and Refugees Richard Black, Vaughan Robinson, 1993-08-24 Provides a much needed perspective on the geopolitical economic and social consequences of refugees drawing out key global themes and illustrating them with empirical and comparative material The first section of three deals with the background of the refugee crisis its effects in the countries of first asylum predominantly in the poorer countries of the south and the new challenges facing governments and migrants in the richer countries of the north Prospects for future research on refugees by geographers and social scientists as well as its rising significance for economic development and social welfare in both poor and rich nations are discussed in the final section

The Oxford Handbook of Refugee and Forced Migration Studies Elena Fiddian-Qasmiyeh, Gil Loescher, Katy Long, Nando Sigona, 2014-06-12 Refugee and Forced Migration Studies has grown from being a concern of a relatively small number of scholars and policy researchers in the 1980s to a global field of interest with thousands of students worldwide studying displacement either from traditional disciplinary perspectives or as a core component of newer programmes across the Humanities and Social and Political Sciences Today the field encompasses both rigorous academic research which may or may not ultimately inform policy and practice as well as action research focused on advocating in favour of refugees needs and rights This authoritative Handbook critically evaluates the birth and development of Refugee and Forced Migration Studies and analyses the key contemporary and future challenges faced by academics and practitioners working with and for forcibly displaced populations around the world The 52 state of the art chapters written by leading academics practitioners and policymakers working in universities research centres think tanks NGOs and international organizations provide a comprehensive and cutting edge overview of the key intellectual political social and institutional challenges arising from mass displacement in the world today The chapters vividly illustrate the vibrant and engaging debates that characterize this rapidly expanding field of research and practice

The End of the Refugee Cycle? Richard Black, Khalid Koser, 1999 Includes statistics

Terms of Refuge Court Robinson, 1998 For half a century ever since the Japanese invasion of 1942 much of Southeast Asia has been racked by war In the last 20 years alone some three million people fled their homes in Vietnam Laos and Cambodia This book is their story It is also the story of the international community's response Spearheading this was the United Nations agency responsible UNHCR It pioneered innovations like the Orderly Departure Programme anti piracy and rescue at sea efforts and later on ambitious reintegration projects for returnees Today the camps in Southeast Asia are closed Half a million people have returned home Over two million have started new lives in the United States Canada Australia and France This compelling book is the history of this modern exodus It also takes stock and poses important questions How did the flight of refugees and international response evolve How do we measure the achievements and the failures of that international effort What has been the legacy in Asia itself And what lessons can be drawn for use in other refugee situations around the world

The Cambridge Survey of World Migration

Robin Cohen,1995-11-02 This extensive survey of migration in the modern world begins in the sixteenth century with the establishment of European colonies overseas and covers the history of migration to the late twentieth century when global communications and transport systems stimulated immense and complex flows of labour migrants and skilled professionals In ninety five contributions leading scholars from twenty seven different countries consider a wide variety of issues including migration patterns the flights of refugees and illegal migration Each entry is a substantive essay supported by up to date bibliographies tables plates maps and figures As the most wide ranging coverage of migration in a single volume The Cambridge Survey of World Migration will be an indispensable reference tool for scholars and students in the field

Security and Environment in the Mediterranean Hans Günter Brauch,Peter H. Liotta,Antonio Marquina,Paul F. Rogers,Mohammad El-Sayed Selim,2012-12-06 In this volume security specialists peace researchers environmental scholars demographers as well as climate desertification water food and urbanisation specialists from the Middle East and North Africa Europe and North America review security and conflict prevention in the Mediterranean They also analyse NATO s Mediterranean security dialogue and offer conceptualisations on security and perceptions of security challenges as seen in North and South The latter half of the book analyses environmental security and conflicts in the Mediterranean and environmental consequences of World War II the Gulf War the Balkan wars and the Middle East conflict It also examines factors of global environmental change population growth climate change desertification water scarcity food and urbanisation issues as well as natural disasters Furthermore it draws conceptual conclusions for a fourth phase of research on human and environmental security and peace as well as policy conclusions for cooperation and partnership in the Mediterranean in the 21st century

Conflict and the Refugee Experience Assefaw Bariagaber,2016-05-23 One of the most serious threats to peace security and the sovereignty of nations in the post Cold War era is population migration A particularly volatile form of this threat is the global refugee problem and nowhere is this issue more severe than in Africa This book offers a comprehensive analysis of refugee experience in the Horn of Africa It includes an examination of the dynamics of flight from the country of origin settlement in exile and repatriation to the country of origin Such an integrative approach sets this book apart from other studies and will serve as a reader for courses on ethno national conflicts migration international politics security and African politics

The Palestinian Diaspora Helena Lindholm Schulz,2005-07-27 Schulz examines the ways in which Palestinian identity has been formed in the diaspora through constant longing for a homeland lost In so doing the author advances the debate on the relationship between diaspora and the creation of national identity

The Dispersal and Social Exclusion of Asylum Seekers Patricia Hynes,2011 Establishing asylum seekers in the UK as a socially excluded group this book provides readers with an understanding of how they experience the dispersal system and gives an insight into how this impacts on their lives

International Water Law and the Quest for Common Security

Bjorn-Oliver Magsig,2015-03-24 The world s freshwater supplies are increasingly threatened by rapidly increasing demand

and the impacts of global climate change but current approaches to transboundary water management are unsustainable and may threaten future global stability and international security The absence of law in attempts to address this issue highlights the necessity for further understanding from the legal perspective This book provides a fresh conceptualisation of water security developing an operational methodology for identifying the four core elements of water security which must be addressed by international law availability access adaptability and ambit The analysis of the legal framework of transboundary freshwater management based on this contemporary understanding of water security reveals the challenges and shortcomings of the current legal regime In order to address these shortcomings the present mindset of prevailing rigidity and state centrism is challenged by examining how international legal instruments could be crafted to advance a more flexible and common approach towards transboundary water interaction The concept of considering water security as a matter of regional common concern is introduced to help international law play a more prominent role in addressing the challenges of global water insecurity Ways for implementing such an approach are proposed and analysed by looking at international hydropolitics in Himalayan Asia The book analyses transboundary water interaction as a case study for advancing public international law in order to fulfil its responsibility of promoting international peace and security

Climate Displacement in Mexico Armelle Gouritin, 2022-11-12 This book presents the updated results of an investigation carried out in 2019 The National Autonomous University of Mexico's UNAM Climate Change Research Program PINCC funded the research coordinated by Armelle Gouritin The research aims to answer the following questions Does the Mexican legal framework and public policies address forced internal climate mobility If not what could be the elements of a legal framework and public policies to address the phenomenon As the phenomenon was approached it was clear that it was extremely complex and consisted of numerous tensions that would lead to other questions throughout the research process Climate forced internal displacement is projected as a huge scale phenomenon in Mexico Against this background the book provides the first critical diagnosis of the current politico legal Mexican framework and finds it to be lagging behind in terms of prevention and attention The book analyses the three level Mexican governance federal state and local levels and identifies serious loopholes according to a rights based approach that particularly focuses on women indigenous peoples and persons and communities with scarce economic resources The results provide information on up coming legislative and political processes and provide benchmarks that can be applied in other case studies including other national frameworks critical analysis

Managing Displacement Jennifer Hyndman, 2000 *Migration in Africa* Michiel de Haas, Ewout Frankema, 2022-03-30 This book introduces readers to the age of intra African migration a period from the mid 19th century onward in which the center of gravity of African migration moved decisively inward Most books tend to zoom in on Africa's external migration during the earlier intercontinental slave trades and the more recent outmigration to the Global North but this book argues that migration within the continent has been far more central to the lives of Africans over the course of the

last two centuries The book demonstrates that only by taking a broad historical and continent wide perspective can we understand the distinctions between the more immediate drivers of migration and deeper patterns of change over time During the 19th century Africa s external slave trades gradually declined whilst Africa s expanding commodity export sectors drew in domestic labor This led to an era of heightened mobility within the region marked by rapidly rising and vanishing migratory flows increasingly diversified landscapes of migration systems and profound long term shifts in the wider patterns of migration This era of inward focused mobility reduced with a resurgence of outmigration after 1960 when Africans became more deliberate in search of extra continental destinations with new diaspora communities emerging specifically in the Global North Broad ranging in its temporal spatial and thematic coverage this book provides students and researchers with the perfect introduction to age of intra African migration

Transnational Ruptures Catherine Nolin,2017-05-15 A key development in international migration in recent years has been the increasing feminization of migrant populations Research attention now focuses not only on the growing number of women on the move but also on their changing gender roles as more female migrants participate as principal wage earners and heads of household rather than as dependants The tensions between population displacement within and beyond Guatemala and the multiple local regional and national realities encountered and reconfigured by these refugee and migrants allow a fascinating window onto the connections and ruptures experienced in a global local world Transnational Ruptures holds great interest and value for a wide readership from scholars who are interested in transnational and refugee studies and international migration to upper level university students in disciplines such as human geography anthropology sociology Latin American Studies gender studies political science and international studies

Migrant Resettlement in the Russian Federation Moya Flynn,2004-08-26 This timely book offers a unique insight into the individual and collective experiences of movement and resettlement among Russian migrants returning to the Russian Federation over the period 1991 2002 Moya Flynn uses different levels of analysis local regional national and global to open up fresh perspectives on the nature of the Russian migration regime and government migration policy The book offers the first in depth examination of non governmental development in the area of migration in post Soviet Russia and provides new understandings of the experience of migration and resettlement at the individual level specifically through an exploration of understandings of home and homeland and a focus on the role of migrant networks

Exploring Contemporary Migration Paul Boyle,Keith Halfacree,Vaughan Robinson,2014-06-11 Exploring Contemporary Migration provides the first comprehensive introduction to the various aspects of population migration in both the developed and the developing worlds Some of the most important quantitative and qualitative methods used for the description and analysis of migration are presented in a clearly structured and accessible way The various theoretical approaches used to explain the complex patterns of migration are also summarised These patterns are then explored through the use of specific migration related themes employment stage in the life course quality of life societal engineering violence and persecution and the role

of culture Exploring Contemporary Migration is written in a user friendly accessible style appealing to undergraduate students of population geography and social science students taking a population module This text will also be valuable reading to those researchers and academics concerned with gaining a broad understanding of the dynamics and patterns of contemporary population International Migration and Global Justice Satvinder Juss,2016-04-22 How should international law approach the critical issue of movement of peoples in the 21st century This book presents a radical reappraisal of this controversial problem Challenging present day ideas of restrictions on freedom of movement and the international structure that controls entry to states it argues for a new blueprint for international migration policy that eliminates waste aids both developing and developed societies and brings attendant benefits to voluntary migrants and involuntary refugees alike In a world of increasing disorder it is suggested that current policy only adds to international instability and threatens the interests of a functional global community *Forced Migration in Eastern Africa* C. Veney,2006-12-11 This study enriches understanding of East Africa s refugee situation by examining the conditions that gave rise to it and how the refugees themselves sought to reconstruct their lives Focusing on the 1990s Veney compares Kenya and Tanzania two nations that did not generate many refugees but become important hosts for the general region **The UNHCR and World Politics** Gil Loescher,2001-05-25 Over fifty years ago governments established the Office of the United Nations High Commissioner for Refugees UNHCR to protect the world s refugees The UNHCR was created to be a human rights and advocacy organization But governments also created the agency to promote regional and international stability and to serve the interests of states Consequently the UNHCR has always trod a perilous path between its mandate to protect refugees and asylum seekers and the demands placed upon it by states to be a relevant actor in world politics This is the first independent history of the UNHCR Gil Loescher one of the world s leading experts on refugee affairs draws upon decades of personal experience and research to examine the origins and evolution of the UNHCR as well as to identify many of the major challenges facing the organization in the years ahead A key focus is to examine the extent to which the evolution of the UNHCR has been framed by the crucial events of international politics during the past half century and how in turn the actions of the eight past High Commissioners have helped shape the course of world history Each chapter tells the story of an individual High Commissioner and examines the unique contributions made to the development of the Office The history of the last fifty years shows how the UNHCR has initiated and capitalized on international political developments to progressively expand its scope and authority as an important actor in world politics The book argues that the UNHCR has overstretched itself in recent decades and has strayed from its central human rights protection role The protection of refugees remains a litmus test of the international community s commitment to defend human rights and to uphold liberal democratic values Loescher offers a series of bold policy recommendations aimed at making the agency a more effective and accountable advocate for the millions of refugees in the world today **African Socialism in Postcolonial Tanzania** Priya Lal,2015-12-01 Drawing on a

wide range of oral and written sources this book tells the story of Tanzania's socialist experiment the ujamaa villagization initiative of 1967-75 Inaugurated shortly after independence ujamaa familyhood in Swahili both invoked established socialist themes and departed from the existing global repertoire of development policy seeking to reorganize the Tanzanian countryside into communal villages to achieve national development Priya Lal investigates how Tanzanian leaders and rural people creatively envisioned ujamaa and documents how villagization unfolded on the ground without affixing the project to a trajectory of inevitable failure By forging an empirically rich and conceptually nuanced account of ujamaa African Socialism in Postcolonial Tanzania restores a sense of possibility and process to the early years of African independence refines prevailing theories of nation building and development and expands our understanding of the 1960s and 70s world
