It offers a clear framework for understanding contemporary conflicts by showing how geography provides opportunities and limits upon the actions of countries, national groups and terrorist organizations and the overarching theme of geopolitical structures and agents requires no previous knowledge of theory or current affairs. Throughout the book case studies including the rise of al Qaeda, the Korean conflict, Israel/Palestine, Chechnya and Kashmir emphasize the multi-faceted nature of conflict. These along with guided exercises help explain contemporary global power struggles, the global military actions of the United States, the persistence of nationalist conflicts, the changing role of borders and the new geopolitics of terrorism. Throughout the readers are introduced to different theoretical perspectives including feminist contributions as both the practice and representation of geopolitics are discussed. *Introduction to Geopolitics* is extensively illustrated with diagrams, maps and photographs. Reading this book will provide a deeper and critical understanding of current affairs and facilitate access to higher level course work and essays on geopolitics. Both students and general readers alike will find this book an essential stepping stone to understanding contemporary conflicts.
