The Land of Footprints Stewart Edward White,1912 **The Land of Footprints** Stewart Edward White,2017-09-12 The Land of Footprints *The Land of Footprints* Stewart Edward White,2020-03-27 Books of sporting travel and adventure in countries little known to the average reader naturally fall in two classes neither with a very few exceptions of great value One class is perhaps the logical result of the other Of the first type is the book that is written to make the most of far travels to extract from adventure the last thrill to impress the awestricken reader with a full sense of the danger and hardship the writer has undergone Thus if the latter takes out quite an ordinary routine permit to go into certain districts he makes the most of travelling in closed territory implying that he has obtained an especial privilege and has penetrated where few have gone before him As a matter of fact the permit is issued merely that the authorities may keep track of who is where Anybody can get one This class of writer tells of shooting beasts at customary ranges of four and five hundred yards I remember one in especial who airily and as a matter of fact killed all his antelope at such ranges Most men have shot occasional beasts at a quarter mile or so but not airily nor as a matter of fact rather with thanksgiving and a certain amount of surprise The gentleman of whom I speak mentioned getting an eland at seven hundred and fifty yards By chance I happened to mention this to a native Africander *The Land of Footprints* Stewart Edward White,1987-05-01 This is a pre 1923 historical reproduction that was curated for quality Quality assurance was conducted on each of these books in an attempt to remove books with imperfections introduced by the digitization process Though we have made best efforts the books may have occasional errors that do not impede the reading experience We believe this work is culturally important and have elected to bring the book back into print as part of our continuing commitment to the preservation of printed works worldwide **The Land of Footprints** Edward Stewart White,2009-02-01 *The Land of Footprints* Stewart Edward White,2020-03-08 Of the first type is the book that is written to make the most of far travels to extract from adventure the last thrill to impress the awestricken reader with a full sense of the danger and hardship the writer has undergone Thus if the latter takes out quite an ordinary routine permit to go into certain districts he makes the most of travelling in closed territory implying that he has obtained an especial privilege and has penetrated where few have gone before him As a matter of fact the permit is issued merely that the authorities may keep track of who is where Anybody can get one This class of writer tells of shooting beasts at customary ranges of four and five hundred yards I remember one in especial who airily and as a matter of fact killed all his antelope at such ranges Most men have shot occasional beasts at a quarter mile or so but not airily nor as a matter of fact rather with thanksgiving and a certain amount of surprise The gentleman of whom I speak mentioned getting an eland at seven hundred and fifty yards By chance I happened to mention this to a native Africander **The Land of Footprints** Stewart White,2013-12-11 A fascinating memoir of Stewart Edward White s year spent in East Equatorial Africa at the beginning of the 20th century White tells the reader what the country its people and its animals are really like **Land of**

Chapagain, Pieter Van Oel, 2019-06-24 Water Footprint Assessment is a young research field that considers how freshwater use scarcity and pollution relate to consumption production and trade patterns This book presents a wide range of studies within this new field It is argued that collective and coordinated action at different scale levels and along all stages of commodity supply chains is necessary to bring about more sustainable efficient and equitable water use The presented studies range from farm to catchment and country level and show how different actors along the supply chain of final commodities can contribute to more sustainable water use in the chain

Rwanda: Cost effective options for inclusive and sustainable development Aragie, Emerta A., Niyonsingiza, Josue, Thurlow, James, Warner, James, Xu, Valencia Wenqian, 2025-05-13 In this policy brief we present research findings of a systematic evaluation and ranking of investment options for Rwanda's agrifood system based on their cost effectiveness in achieving multiple development outcomes including agrifood gross domestic product GDP growth agrifood job creation poverty reduction declining rates of undernourishment and lowering diet deprivation Additionally the study assesses their environmental footprint focusing on water consumption land use and emissions Investments in small and medium enterprise SME processors are shown to be the most cost effective at expanding agrifood GDP and employment while extension and advisory services on livestock and climate emerge as the most efficient farmer facing investments However crop extension services rank least in cost effectiveness for economic and social outcomes However many cost effective investments have relatively high environmental footprints which highlights potential tradeoffs The study further reveals shifts in the cost effectiveness ranking of investment options overtime and when extreme production shocks occur

Living within a Fair Share Ecological Footprint Robert Vale, Brenda Vale, 2013-09-02 According to many authorities the impact of humanity on the earth is already overshooting the earth's capacity to supply humanity's needs This is an unsustainable position This book does not focus on the problem but on the solution by showing what it is like to live within a fair earth share ecological footprint The authors describe numerical methods used to calculate this concentrating on low or no cost behaviour change rather than on potentially expensive technological innovation They show what people need to do now in regions where their current lifestyle means they are living beyond their ecological means such as in Europe North America and Australasia The calculations focus on outcomes rather than on detailed discussion of the methods used The main objective is to show that living with a reduced ecological footprint is both possible and not so very different from the way most people currently live in the west The book clearly demonstrates that change in behaviour now will avoid some very challenging problems in the future The emphasis is on workable practical and sustainable solutions based on quantified research rather than on generalities about overall problems facing humanity
