Genesis Of Lachmanns Method:

The Genesis of Lachmann's Method Sebastiano Timpanaro, 2005 Until the modern period the reproduction of written texts required manual transcription from earlier versions This cumbersome process inevitably created errors and made it increasingly difficult to identify the original readings among multiple copies Lachmann's method associated with German classicist Karl Lachmann 1793-1851 aimed to provide scholars with a scientific systematic procedure to standardize the transmission of ancient texts Although these guidelines for analysis were frequently challenged they retained a paradigmatic value in philology for many years In 1963 Italian philologist Sebastiano Timpanaro became the first to analyze in depth the history and limits of Lachmann's widely established theory with his publication *La genesi del metodo del Lachmann* This important work which brought Timpanaro international repute now appears in its first English translation *The Genesis of Lachmann's Method* examines the origin development and validity of Lachmann's model as well as its association with Lachmann himself It remains a fundamental work on the history and methods of philology and Glenn W Most's translation makes this seminal study available to an English speaking audience Revealing Timpanaro's extraordinary talent as a textual critic and world class scholar this book will be indispensable to classicists textual critics biblical scholars historians of science and literary theorists

Text Editing, Print and the Digital World Kathryn Sutherland, Marilyn Deegan, 2016-04-01 Traditional critical editing defined by the paper and print limitations of the book is now considered by many to be inadequate for the expression and interpretation of complex works of literature At the same time digital developments are permitting us to extend the range of text objects we can reproduce and investigate critically not just books but newspapers draft manuscripts and inscriptions on stone Some exponents of the benefits of new information technologies argue that in future all editions should be produced in digital or online form By contrast others point to the fact that print after more than five hundred years of development continues to set the agenda for how we think about text even in its non print forms This important book brings together leading textual critics scholarly editors technical specialists and publishers to discuss whether and how existing paradigms for developing and using critical editions are changing to reflect the increased commitment to and assumed significance of digital tools and methodologies

Rediscovering the Islamic Classics Ahmed El Shamsy, 2022-11-29 The story of how Arab editors of the late nineteenth and early twentieth centuries revolutionized Islamic literature Islamic book culture dates back to late antiquity when Muslim scholars began to write down their doctrines on parchment papyrus and paper and then to compose increasingly elaborate analyses of and commentaries on these ideas Movable type was adopted in the Middle East only in the early nineteenth century and it wasn't until the second half of the century that the first works of classical Islamic religious scholarship were printed there But from that moment on Ahmed El Shamsy reveals the technology of print transformed Islamic scholarship and Arabic literature In the first wide ranging account of the effects of print and the publishing industry on Islamic scholarship El Shamsy tells the fascinating story of how a small group of editors and intellectuals brought forgotten works of Islamic literature into print and defined what became the classical canon of Islamic thought Through the lens of the literary culture of nineteenth and twentieth century Arab cities especially Cairo a hot spot of the nascent publishing business he explores the contributions of these individuals who included some of the most important thinkers of the time Through their efforts to find and publish classical literature El Shamsy shows many nearly lost works were recovered disseminated and harnessed for agendas of linguistic ethical and religious reform Bringing to light the agents and events of the Islamic print revolution Rediscovering the Islamic Classics is an absorbing examination of the central role printing and its advocates played in the intellectual history of the modern Arab world

History of the Pauline Corpus in Texts, Transmissions and Trajectories Chris S. Stevens, 2020-06-15 In History of the Pauline Corpus in Texts Transmissions and Trajectories Chris S Stevens examines the Greek manuscripts of the Pauline texts from P46 to

Claromontanus Previous research is often hindered by the lack of a systematic analysis and an indelicate linguistic methodology This book offers an entirely new analysis of the early life of the Pauline corpus Departing from traditional approaches this text critical work is the first to use Systemic Functional Linguistics which enables both the comparison and ranking of textual differences across multiple manuscripts Furthermore the analysis is synchronically oriented so it is non evaluative The results indicate a highly uniform textual transmission during the early centuries The systematic analysis challenges previous research regarding text types Christological scribal alterations and textual trajectories

The Cambridge History of Modern European Thought Warren Breckman, Peter Eli Gordon, 2019 In these well nigh encyclopedic volumes warren Breckman and Peter E Gordon engage in a daunting feat They offer compact and informative introductions to essays on very many crucial dimensions of thought in the nineteenth and twentieth centuries And they furnish along with their own substantive chapters contributions from an array of prominent scholars of intellectual and cultural history all of whom demonstrate impressive expertise in their varied areas of inquiry The result is an important work of both scholarly and general interest Back cover

Major Corrections Tom Geue, 2025-01-28 A trenchant analysis of the thought of Sebastiano Timpanaro one of the most original leftist thinkers of the 20th century Sebastiano Timpanaro 1923 2000 was one of the most original leftist thinkers of the 20th century His thought spans a unique range of subjects from materialism to classical philology from the Enlightenment to Freud from science to socialism from the history of linguistics to 19th century Italian literature Timpanaro confronted this manifold material with addictive clarity and incisive honesty This book is the first serious attempt in any language to introduce Timpanaro s thought in its entirety Drawing on original archival research Geue shows the astonishing breadth of Timpanaro s intellect and his eccentric dual profile as a Marxist and technical philologist From this emerges not only a compelling portrait of a neglected radical thinker but also a rallying call for the Left to revive its commitment to scientific truth and rigorous detail

Philology and Global English Studies Suman Gupta, 2015-07-28 This book retraces the formation of modern English Studies by departing from philological scholarship along two lines in terms of institutional histories and in terms of the separation of literary criticism and linguistics

The Lucretian Renaissance Gerard Passannante, 2011-11-16 With *The Lucretian Renaissance* Gerard Passannante offers a radical rethinking of a familiar narrative the rise of materialism in early modern Europe Passannante begins by taking up the ancient philosophical notion that the world is composed of two fundamental opposites atoms as the philosopher Epicurus theorized intrinsically unchangeable and moving about the void and the void itself or nothingness Passannante considers the fact that this strain of ancient Greek philosophy survived and was transmitted to the Renaissance primarily by means of a poem that had seemingly been lost a poem insisting that the letters of the alphabet are like the atoms that make up the universe By tracing this elemental analogy through the fortunes of Lucretius s *On the Nature of Things* Passannante argues that long before it took on its familiar shape during the Scientific Revolution the philosophy of atoms and the void reemerged

in the Renaissance as a story about reading and letters a story that materialized in texts in their physical recomposition and in their scattering From the works of Virgil and Macrobius to those of Petrarch Poliziano Lambin Montaigne Bacon Spenser Gassendi Henry More and Newton The Lucretian Renaissance recovers a forgotten history of materialism in humanist thought and scholarly practice and asks us to reconsider one of the most enduring questions of the period what does it mean for a text a poem and philosophy to be reborn

Daniel Gurtner, Juan Hernández, Jr., Paul Foster, 2015-09-29 The collection of essays focuses on the twin areas of research undertaken by Prof Michael W Holmes These are the sub disciplines of textual criticism and the study of the Apostolic Fathers The first part of the volume on textual criticism focuses on issues of method the praxis of editing and collating texts and discussions pertaining to individual variants The second part of the volume assembles essays on the Apostolic Fathers There is a particular focus on the person and writings of Polycarp since this is the area of research where Prof Holmes has worked most intensively

Aristotle's ›Physics‹ VIII, Translated into Arabic by Ishaq ibn Hunayn (9th c.) Rüdiger Arnzen, 2020-11-23 Aristotle's theory of eternal continuous motion and his argument from everlasting change and motion to the existence of an unmoved primary cause of motion provided in book VIII of his Physics is one of the most influential and persistent doctrines of ancient Greek philosophy Nevertheless the exact wording of Aristotle's discourse is doubtful and contentious at many places The present critical edition of Ishaq ibn Hunayn's Arabic translation 9th c is supposed to replace the faulty edition by A Badawi

and aims at contributing to the clarification of these textual difficulties by means of a detailed collation of the Arabic text with the most important Greek manuscripts supported by comprehensive Greek and Arabic glossaries *The New Cambridge History of the Bible: Volume 3, From 1450 to 1750* Euan Cameron, 2016-09-01 This volume charts the Bible's progress from the end of the Middle Ages to the Enlightenment During this period for the first time since antiquity the Latin Church focused on recovering and re-establishing the text of Scripture in its original languages It considered the theological challenges of treating Scripture as another ancient text edited with the tools of philology This crucial period also saw the creation of many definitive translations of the Bible into modern European vernaculars Although previous translations exist these early modern translators often under the influence of the Protestant Reformation distinguished themselves in their efforts to communicate the nuances of the original texts and to address contemporary doctrinal controversies In the Renaissance's rich explosion of ideas Scripture played a ubiquitous role influencing culture through its presence in philosophy literature and the arts This history examines the Bible's impact in Europe and its increasing prominence around the globe The Mapping of a Russian War: The Atlas of the Principality of Polatsk by Stanisław Pacholowiecki (1580) Jakub Niedźwiedź, Karol Łopatecki, Grzegorz Franczak, 2024-12-02 This volume is a comprehensive analysis of the Atlas of the Principality of Polatsk 1580 one of the oldest cartographic representations of the military conflict between Russia Muscovy and the Western world Its author the Polish royal cartographer Stanisław Pacholowiecki drew the maps at the beginning of the Livonian War 1579-1582 when the Polish-Lithuanian army liberated the Lithuanian and Livonian lands from Muscovian occupation The Mapping of a Russian War focuses on the military aspects of the maps their political and propaganda use and the Early Modern construction of the past through maps The authors present an innovative approach to these maps rarely examined by the international research community *Perspectives on New Testament Textual Criticism, Volume 2* Eldon Jay Epp, 2020-11-30 Eldon Jay Epp's second volume of collected essays consists of articles previously published during 2006-2017 All treat aspects of the New Testament textual criticism but focus on historical and methodological issues relevant to constructing the earliest attainable text of New Testament writings More specific emphasis falls upon the nature of textual transmission and the text-critical process and heavily on the criteria employed in establishing that earliest available text Moreover textual grouping is examined at length and prominent is the current approach to textual variants not approved for the constructed text for they have stories to tell regarding theological ethical and real-life issues as the early Christian churches sought to work out their own status practices and destiny The Text of Galatians and Its History Stephen C. Carlson, 2015-03-10 Based on the author's doctoral dissertation This volume investigates the text of Paul's Epistle to the Galatians and its history how it changed over time This work performs a stemmatic analysis of 92 witnesses to the text of Galatians using cladistic methods developed by computational biologists to construct an unoriented stemma of the textual tradition The stemma is then oriented based on the internal evidence of textual variants Introducing A.E. Housman

(1859-1936) D. Antoine Sutton, 2018-04-18 This volume is pivotal reading for laypersons looking for an accurate understanding of the private life and public career of A E Housman Furthermore it is also essential for any reader seeking to recover a truer image of the Victorian man who during his lifetime issued two collections of Romantic poems A Shropshire Lad and Last Poems It will be of particular interest to history buffs poets professors and students of classical studies and instructors in literary criticism given that it sketches Housman s biography and examines in detail his scholarship
