Geographies Of Power:

Handbook on the Geographies of Power Mat Coleman, John Agnew, 2018-07-27 The so called spatial turn in the social sciences means that many researchers have become much more interested in what can be called the spatialities of power or the ways in which power as a medium for achieving goals is related to where it takes place Most famous authors on the subject such as Machiavelli and Hobbes saw power as entirely equivalent to domination exercised by some over others Though this meaning is hardly redundant understandings of power have become more multidimensional and nuanced as a result of the spatial turn Much recent writing in human geography for example has rigorously extended use of the term power beyond its typical understanding as a resource that pools up in some hands and some places to a medium of agency that has different effects depending on how it is deployed across space and how actors cooperate or not to give it effect To address this objective the book is organized thematically into four sections that cover the main areas in which much of the contemporary work on geographies of power is concentrated bodies economy environment and energy and war

Geographies of Power Andrew Herod, Melissa W. Wright, 2008-04-15 At a time when references to things global have gained more currency than ever this book explores the nexus of power and space behind the politics of geographical scale Explores the nexus of power and space behind the rescaling of contemporary social economic and political life Organized into three sections on theorizing scale the discourses and rhetorics of scale and scales of activism Will stimulate discussion about how conceptions and visions of scale inform all aspects of social life Lost Geographies of Power John Allen, 2011-07-22

This original study explores the difference that space and spatiality make to the understanding of power Explores the difference that space and spatiality makes to an understanding of power Moves forward the incorporation of ideas of space into social theory Presents a new understanding of the exercise uses and manifestations of cultural economic and political power in the second half of the twentieth century Illustrated with cases and examples The Renaissance John Jeffries Martin, 2003 The Renaissance paradigm in crisis Politics language and power Individualism identity and gender Art science and humanism Religion tradition and innovation **Race, Place, and the Law, 1836-1948** David Delaney, 2010-06-28

Black and white Americans have occupied separate spaces since the days of the big house and the quarters But the segregation and racialization of American society was not a natural phenomenon that just happened The decisions enacted into laws that kept the races apart and restricted blacks to less desirable places sprang from legal reasoning which argued that segregated spaces were right reasonable and preferable to other arrangements In this book David Delaney explores the historical intersections of race place and the law Drawing on court cases spanning more than a century he examines the moves and countermoves of attorneys and judges who participated in the geopolitics of slavery and emancipation in the development of Jim Crow segregation which effectively created apartheid laws in many cities and in debates over the doctrine of changed conditions which challenged the legality of restrictive covenants and private contracts designed to

exclude people of color from white neighborhoods This historical investigation yields new insights into the patterns of segregation that persist in American society today

Geographies of Knowledge and Power Peter Meusburger, Derek Gregory, Laura Suarsana, 2015-06-24 Interest in relations between knowledge power and space has a long tradition in a range of disciplines but it was reinvigorated in the last two decades through critical engagement with Foucault and Gramsci This volume focuses on relations between knowledge and power It shows why space is fundamental in any exercise of power and explains which roles various types of knowledge play in the acquisition support and legitimization of power Topics include the control and manipulation of knowledge through centers of power in historical contexts the geopolitics of knowledge about world politics media control in twentieth century cartography in modern war the power of words the changing face of Islamic authority and the role of Millennialism in the United States This book offers insights from disciplines such as geography anthropology scientific theology Assyriology and communication science

Resistance, Space and Political Identities David Featherstone, 2011-06-20 Utilizing research on networked struggles in both the 18th century Atlantic world and our modern day Resistance Space and Political Identities The Making of Counter Global Networks challenges existing understandings of the relations between space politics and resistance to develop an innovative account of networked forms of resistance and political activity Explores counter global struggles in both the past and present including both the 18th century Atlantic world and contemporary forms of resistance Examines the productive geographies of contestation Foregrounds the solidarities and geographies of connection between different place based struggles and argues that such solidarities are essential to produce more plural forms of globalization

Power and Urban Space in Pre-Modern Holland Clé Lesger, 2024-02-22 Cities and urban societies have many faces In this study the pre modern cities of Holland are presented as arenas where power relations between social classes are expressed in a more or less permanent appropriation of physical space and through discursive strategies The continuity of the power relations in the cities of Holland spanning centuries makes it urgent to look not only at the assumption of urban space as an expression of power relations within society but also at the contribution of this appropriation to the acceptance and continuity of the existing power relations in pre modern Holland Within this broad area extensive attention is paid to the very prominent and enduring appropriation of urban space in the field of housing the less permanent but violent appropriation of urban space during the public execution of scaffold punishments the maintenance of public order by civic militias and appropriation during riots and revolts In addition city descriptions maps and pictures of the pre modern cities of Holland are scrutinised for what they can reveal about the appropriation of urban spaces These themes each have an extensive historiography but they have never been brought together in an interpretative framework that fits in with Pierre Bourdieu's model of society and the work of especially John Allen on power until now

Power and Space John Allen, 2024-08-05 Power and Space sets out the inherently spatial nature of power today and seeks to change the conversation around how power exercises us in the contemporary moment The essays brought together in this book are a response to the fact that conventional descriptions of power and its ordered geographies no longer chime with our lived experience Spatiality matters to the workings of power nowadays and this book sheds light on what it is that we face when power is exercised through more subtle spatially nuanced arrangements It is divided into three parts each representing a different kind of engagement with power's relationship to

space from the spatial shifts in the way power is exercised through to its assemblage like entanglements and in turn its progressive topological character Throughout the book a wide range of social political and economic examples are drawn upon to illustrate a more provisional sense of power ranging for instance from the seductive logic of privatized public spaces to the attempt by a data analytics company to manipulate political behaviour through to the offshore spaces invented by rising financial elites to challenge the established banking order Illustrating the new found abilities of the powerful to make their presence felt this book provides an accessible account of the practical workings of power in the present day It will be invaluable to students and academics in human geography and urban studies as well as politics sociology and cultural studies

Topologies of Power John Allen, 2016-01-13 Topologies of Power amounts to a radical departure in the way that power and space have been understood It calls into question the very idea that power is simply extended across a given territory or network and argues that power today has a new found reach Topological shifts have subtly altered the reach of power enabling governments corporations and NGOs alike to register their presence through quieter less brash forms of power than domination or overt control In a world in which proximity and distance increasingly play across one another topology offers an insight into how power remains continuous under transformation the same but different in its ability to shape peoples lives Drawing upon a range of political economic and cultural illustrations the book sets out a clear and accessible account of the topological workings of power in the contemporary moment It will be invaluable for both students and academics in human geography politics sociology and cultural studies

Sex, politics and empire Richard Phillips, 2018-02-01 Colonial governments institutions and companies recognised that in many ways the effective operation of the Empire depended upon sexual arrangements For example nuclear families serving agricultural colonization and prostitutes working for single men who powered armies and plantations mines and bureaucracies For this reason they devised elaborate systems of sexual governance such as attending to marriage and the family However they also devoted disproportionate energy to marking and policing the sexual margins In *Sex Politics and Empire* Richard Phillips investigates controversies surrounding prostitution homosexuality and the age of consent in the British Empire and revolutionises our notions about the importance of sex as a nexus of imperial power relations

Political Power and Social Theory Diane E. Davis, Julian Go, 2009-12-21 It is time to consider changes in the field of comparative historical sociology as the discipline seeks to accommodate old and new trends as well as the transforming spatial scales in which political power and social theory are increasingly embedded This title showcases articles that pursue similar themes

Criminality and Power in the Postcolonial City Maria

Ridda, 2022-11-21 This book investigates the literary imaginings of the postcolonial city through the lens of crime in texts set in Naples and Mumbai from the 1990s to the present Employing the analogy of a black hole it posits the discourse on criminality as a way to investigate the contemporary spatial manifestations of coloniality and global capitalist urbanity Despite their different histories Mumbai and Naples have remarkable similarities Both are port cities gateways to their

countries and regional trade networks and both are marked by extreme wealth and poverty They are also the sites and symbolic battlegrounds for a wider struggle in which the North exploits the South and the South fights back As one of the characters of the novel *The Neapolitan Book of the Dead* puts it a narrativisation of the underworld allows for a discovery of a different city from its forgotten corners Crime provides a means to understand the relationship between space and society culture in a number of cities across the Global South by tracing a narrative of postcolonial urbanity that exposes the connections between exploitation and the ongoing coloniality of power

Gender, Work, and Economy Heidi Gottfried, 2013-11-15 This engaging new text uses a feminist lens to crack open the often hidden worlds of gender and work addressing enduring questions about how structural inequalities are produced and why they persist Making visible the social relationships that drive the global economy the book explores how economic transformations not only change the way we work but how we live our lives The full extent of changing patterns of employment and the current financial crisis cannot be fully understood in the confines of narrow conceptions of work and economy Feminists address this shortcoming by developing both a theory and a political movement aimed at unveiling the power relations inherent in old and new forms of work By providing an analysis of gender work and the economy Heidi Gottfried brings to light the many faces of power from the bedroom to the boardroom A discussion of globalization is threaded throughout the book to uncover the impact of increasing global interconnections and vivid case studies are included from industrialized countries such as the US and the global cities of New York London and Tokyo as well as from developing countries and the emerging global cities of Beijing Shanghai and Dubai This comprehensive analysis of gender and work in a global economy incorporating sociology geography and political economy perspectives will be a valued companion to students in gender studies and across the social sciences more generally
