World Englishes □ Problems, Properties and Prospects Thomas Hoffmann, Lucia Siebers, 2009-09-23 World Englishes is a vibrant research field that has attracted scholars from many different linguistic subdisciplines Emphasizing the common ground of all research on World Englishes the 22 articles in this collected volume selected from more than a hundred papers presented at the 2007 conference of the International Association for World Englishes in Regensburg cover a broad range of topics which together reflect the state of the art of research in this field The volume focuses on regions as diverse as Africa the Caribbean the Antipodes and Asia but also promotes a globally comparative perspective by analyzing selected characteristics of the English language across a wide range of varieties Methodologically a number of different approaches are applied including corpus linguistic studies socio phonetics as well as historical discourse analysis Due to its wide scope the book is of interest not only to World Englishes scholars but also to sociolinguists as well as applied contact or corpus linguists

Corpus Linguistics and Linguistic Theory, 2021-10-25 From being the occupation of a marginal and frequently marginalised group of researchers the linguistic analysis of machine readable language corpora has moved to the mainstream of research on the English language In this process an impressive body of results has accumulated which over and above the intrinsic descriptive interest it holds for students of the English language forces a major and systematic re thinking of foundational issues in linguistic theory Corpus linguistics and linguistic theory was accordingly chosen as the motto for the twentieth annual gathering of ICAME the International Computer Archive of Modern Medieval English which was hosted by the University of Freiburg Germany in 1999 The present volume which presents selected papers from this conference thus builds on previous successful work in the computer aided description of English and at the same time represents an attempt at stock taking and methodological reflection in a linguistic subdiscipline that has clearly come of age Contributions cover all levels of linguistic description from phonology prosody through grammar and semantics to discourse analytical issues such as genre or gender specific linguistic usage They are united by a desire to further the dialogue between the corpus linguistic community and researchers working in other traditions Thereby the atmosphere ranges from undisguised skepticism as expressed by Noam Chomsky in an interview which is part of the opening contribution by Bas Aarts to empirically substantiated optimism as for example in Bernadette Vine s significantly titled contribution Getting things done
