Lancashire And Whitehall The Diary Of Sir Raymond Streat:

Lancashire and Whitehall Sir Raymond Streat, 1987 **Lancashire and Whitehall: 1939-57** Sir E. Raymond Streat, 1987 *Empire, Politics and the Creation of the 1935 India Act* Andrew Muldoon, 2016-05-06 The 1935 Government of India Act was arguably the most significant turning point in the history of the British administration in India. The intent of the Act, a proposal for an Indian federation, was the continuation of British control of India and the deflection of the challenge to the Raj posed by Gandhi, Nehru and the nationalist movement. This book seeks to understand why British administrators and politicians believed that such a strategy would work and what exactly underpinned their reasons. It is argued that British efforts to defuse and disrupt the activities of Indian nationalists in the interwar years were predicated on certain cultural beliefs about Indian political behaviour and capacity. However, this was not simply a case of Orientalist policy making. Faced with a complicated political situation, a staggering amount of information and a constant need to produce analysis, the officers of the Raj imposed their own cultural expectations upon events and evidence to render them comprehensible. Indians themselves played an often overlooked role in the formulation of this political intelligence, especially the relatively few Indians who maintained close ties to the colonial government, such as T B Saprú and M R Jayakar. These men were not just mediators as they have frequently been portrayed but were in fact important tacticians whose activities further demonstrated the weaknesses of the colonial information economy. The author employs recently released archival material, including the Indian Political Intelligence records, to situate the 1935 Act in its multiple and overlapping contexts: internal British culture and politics, the imperial information order in India and the politics of Indian nationalism. This rich and nuanced study is essential reading for scholars working on British Indian and imperial history.

The King Who Had To Go Adrian Phillips, 2016-10-13 The previously untold story of the hidden politics that went on behind the scenes during the handling of the Royal abdication crisis of 1936. *The King Who Had to Go* describes the harsh realities of how the machinery of government responds when even the King steps out of line. It reveals the pitiless and insidious battles in Westminster and Whitehall that settled the fate of the King and Mrs Simpson. Prime Minister Stanley Baldwin had to fight against ministers and civil servants who were determined to pressure the King into giving up Mrs Simpson, and when that failed, into abdicating. Dubious police reports on Mrs Simpson's sex life poisoned the government's view of her and were used to blacken her reputation. Threats to sabotage her divorce were deployed to edge the King towards abdication. Covert intelligence operations convinced the hardliners that the badly coordinated and hopeless attempts of the King's allies, particularly Winston Churchill, to keep him on the throne amounted to a sinister anti-constitutional conspiracy. The book also shows how the King doomed his chances of keeping the throne by wildly unrealistic goals and ill thought out schemes. As each side was overwhelmed by desperation and distrust, Baldwin somehow held the balance and steered the crisis to as smooth a conclusion as possible.

Britain in the World Economy since 1880 Bernard W.E. Alford, 2014-06-06 Bernard Alford reviews the changing role and

diminishing influence of Britain within the international economy across the century that saw the apogee and loss of Britain's empire and her transformation from globe straddling superpower to off shore and indecisive member of the European Community. He explores the relationship between empire and economy, looks at economic performance against economic policy and compares Britain through and beyond the Thatcher years with her European partners America and Japan. In assessing whether Britain's economic decline has been absolute or merely relative, he also illuminates the broader history of the world economy itself.

The First Royal Media War Adrian Phillips, 2023-06-30 The abdication crisis of 1936 demolished the wall of silent deference that had protected the British royal family from press comment and intrusion since the days of Queen Victoria. King Edward VIII was a child of the burgeoning age of media and the first celebrity monarch, but the immense personal popularity created by his charm and good looks was not enough to save him when he came into conflict with a government that embodied the conservative ethos of the time. Nor did the support of powerful media barons. In the United States, William Randolph Hearst, who inspired *Citizen Kane*, dreamed of giving Britain an American Queen and maneuvered with Wallis Simpson to place her on the throne. In Britain, the Anglo-Canadian newspaper magnate Lord Beaverbrook hoped to use the confrontation between the King and the government to force the prime minister, his bitter enemy Stanley Baldwin, out of power. Edward was blocked from broadcasting his case directly to the public, which was the source of deep resentment to him. The government treated the couple's media initiatives as declarations of war and was prepared to respond savagely. The British press remained tactfully silent almost until the end of the crisis, but behind the scenes a cold war was being fought. For the rest of his life, Edward fought to air his grievances against the ill treatment to which he thought that he had been subjected. He believed that he had been forced to abdicate by a coalition of reactionaries grouped behind the Archbishop of Canterbury. Edward resented bitterly the ostracism to which he and Wallis were subjected by his brother and sister-in-law, King George VI and Queen Elizabeth, especially the refusal to grant his wife royal status. With sometimes farcical results, Edward tried to find authors who put over his side of the story. Beaverbrook supported Edward but tried to bend Edward's quest to fit his own agenda. The establishment did its utmost to restrain Edward and maintain a discreet silence over the crisis, but gradually members of the royal court abandoned reticence and fought back. The abdication challenged the British monarchy as an institution. A large part of the legacy is today's no holds barred media environment where the royal family's issues are fought in a ruthless glare of worldwide attention.

Churchill and Industrial Britain Jim Tomlinson, 2024-11-14 This book offers a new understanding of the main economic and political trends of 20th century Britain through the lens of Churchill's early career and approach to industrialisation. Shedding fresh light on Churchill's political endeavours between 1900 and 1922, this study analyses his work within his political constituencies and highlights how he attempted to balance their local concerns with his larger imperial agenda. Tomlinson guides readers through Britain's industrial challenges at the start of the twentieth century with a particular focus on the textile economies of Churchill's

constituencies in Lancashire and Scotland and shows how industrial competition within the Empire exemplified the tensions between domestic economic policy and attempts at globalization and influenced Churchill's later politics Tomlinson acknowledges the role of the First World War in boosting the industrial output and bargaining power of countries within the Empire and analyses these alongside key moments in Churchill's early career such as his defeat at Dundee and time at the Exchequer In doing so the author highlights the context in which Churchill's ideas on the politics and economics of Empire were first formed particularly in relation to the impact of imperial economic policy on British domestic prosperity Ultimately this book delivers a new assessment of twentieth century British economic history in the light of Britain's relationship to the Empire and the first great globalization
