Gas Flow And Chemical Lasers:

Gas Flow and Chemical Lasers Michele Onorato, 2012-12-06 This volume contains eight invited papers and seventy three contributed papers presented at the Fourth International Symposium on Gas Flow and Chemical Lasers which was held in Stresa Italy from September 13 to 17 1984 The purpose of the Symposium was to record and discuss current research developments and applications related to high power lasers Papers were solicited from the entire spectrum of activities including basic physics aerothermodynamics new laser media laser design diagnostic techniques laser propagation interaction phenomena applications The Symposium was an opportunity for scientists and engineers representing all these disciplines to come together to report their recent work to exchange ideas and to provide an up to date account of international progress in these fields The contributed papers were reviewed by the members of the Scientific Advisory Committee who also took responsibility for formulating the program of invited lectures As editor I wish to express my appreciation and my gratitude to people and organizations that made this Symposium a success the Members of the Scientific Advisory Committee the Members of the Local Organizing Committee the Sponsors and the Symposium Secretary A grateful acknowledgement is expressed to Dr M Sandra Oggiano for assistance in the organization of the Symposium and publication of these proceedings

Gas Flow and Chemical Lasers Salman Rosenwaks, 2012-12-06 The Sixth International Symposium on Gas Flow and Chemical Lasers GCL was held in Jerusalem Israel on September 8 12 1986 The charm and beauty of Jerusalem and the unique blending of ancient and modern made this Symposium an enjoyable experience for the 165 participants and the accompanying persons Yet it seems that the invited and contributed papers presented at the Symposium were equally attractive so that most of the participants attended most sessions resisting the temptations outside the session hall Indeed many speakers presented up to date results that were obtained or cleared just a few days before the Symposium This volume is a compilation of 19 invited and 61 contributed papers and of a panel discussion on the prospects for short wavelength chemical lasers held at the closing session of the Symposium This discussion is presented as recorded in order to retain the flavour of spontaneous presentation at the risk or advantage of presenting some venturesome ideas and the danger of misquoting In editing the book a deductive approach has been attempted The book starts with some fundamental issues namely fluid dynamics and optics and then deals with the design diagnostics propagation and applications of various gas laser systems covering the wavelength spectrum from XUV to infrared Then follow recent developments of general interest to the laser community and the book concludes with an eye to the future i.e. with a section on short wavelength chemical lasers *Gas Flow and Chemical Lasers, 1984* A. S. Kaye, A. C. Walker, 1985
