**Garden Plants Taxonomy** Bijan Dehgan, 2023-04-05 Horticulture has remained far behind in understanding of botanical principles. Recent phylogenetic DNA based reorganization of higher plants has revolutionized taxonomic treatments of all biological entities even when morphology does not completely agree with their organization. This book is an example of applying principles of botanical phylogenetic taxonomy to assemble genera, species and cultivars of 200 vascular plant families of ferns, gymnosperms and angiosperms that are cultivated for enhancement of human living space, homes, gardens and parks. The emphases are on cultivated species but examples of some plants are often shown in the wild and in landscapes. In providing descriptions it is assumed that students and other interested individuals have no background in general botany, plant characteristics or nomenclature. Fundamental features of all plant groups discussed are fully illustrated by original watercolor drawings or photographs. Discussion of the families is grounded on recent botanical phylogenetic treatments which is based on common ancestry, monophyly. Of course, phylogenetic taxonomy is not a new concept and was originally based on morphological characteristics; it is the DNA based phylogeny that has revolutionized modern biological classifications. In practical terms, this book represents the horticultural treatment that corresponds to phylogenetic based botanical taxonomy to which is added cultigens and cultivated genera and species. Hence the harmony between horticultural and botanical taxonomy. This book covers phylogenetic based taxonomy of Angiosperms, Eudicots. A companion volume covers Ferns, Gymnosperms and Angiosperms, Monocots. The Garden Magazine, 1911 The Publishers Weekly, 1911

Gardening enthusiasts and those who love to read about gardening will be delighted by this new collection of Elizabeth Lawrence's work. A gifted landscape architect and writer, Lawrence 1904-85 chronicled her experiences with plants in a voice treasured for its distinctive blend of horticultural expertise and stylistic elegance. Through her six books, all still in print, Lawrence continues to inspire an ever widening circle of dedicated readers everywhere. Between 1932 and 1978, Lawrence wrote more than fifty articles for gardening magazines, newsletters and plant society bulletins. These writings, uncovered in a seven year search and collected here for the first time, offer further testament to her talent for conveying practical details in an engaging, literate manner. Treating such subjects as trees and shrubs, bulbs, perennials, native plants, even fellow gardeners, this collection will be welcomed by the novice and knowledgeable gardener alike. Elizabeth Lawrence, a graduate of Barnard College, was the first woman to receive a degree in landscape architecture from the North Carolina State College School of Design.
