*The Gasoline Buggy of the Duryea Brothers* Robert B. Jackson, 1968 Describes the first successful American gasoline driven automobile and the times it heralded when in January of 1894 the machine made its first successful trip of six miles at a speed of eight miles an hour *Wheels*, 2002 Traces the development of the wheel over 5 000 years accurate drawings and lucid text depict the human victory over space and inertia **Carriages Without Horses** Richard P Scharchburg, 1993-08-01 In September 1893 little could 23 year old mechanic J Frank Duryea dream of the changes that would be brought about by his creation a frail gasoline buggy that made its debut on the streets of Springfield Massachusetts Charles E and J Frank Duryea two brothers from rural Illinois were the founders of the American automobile industry The Duryea Motor Wagon company was the first company organized in the United States for the manufacture of automobiles The attention getting older brother Charles demanded and to date has received the principal credit for these pioneering accomplishments A bitter family feud between the brothers which was even carried on by their families after their deaths further muddled the question about the individual brothers contributions However in *Carriages Without Horses* J Frank Duryea and the Birth of the American Automobile Industry historian and author Richard P Scharchburg proves that the quiet self effacing younger brother J Frank Duryea is unquestionably entitled to as much credit as Charles if not considerably more J Frank did the actual work of construction on the cars and was responsible for the practical designing and engineering of all components aside from the steering mechanism of the Duryea cars More than an account of the struggle for precedence between brothers however *Carriages Without Horses* tells the story of America s first automobile company taking shape Scharchburg covers the design and development of the first Duryea car culminating with its successful operation on the streets of Springfield Massachusetts on September 21 1893 This book also covers the landmark Chicago Times Herald race of 1895 won by the Duryea car built and driven by J Frank the subsequent progress of the Duryea Motor Wagon Company and after the brothers went their separate ways J Frank s 1901 founding of the Stevens Duryea Company **The Best in Children's Books** Zena Sutherland, 1973 Reviews 1 400 books for children chosen as the best published during the years 1966 1972 *Hunting Down Social Darwinism* Stuart K. Hayashi, 2015-02-17 *Hunting Down Social Darwinism* is the third and final installment in the trilogy *The Nature of Liberty* The trilogy gives a secular ethical defense of laissez faire capitalism inspired by Ayn Rand s ideas The trilogy s first book *The Freedom of Peaceful Action* provided the philosophic theory behind the ethics of a free enterprise system based on the individual rights to life liberty and private property which John Locke described The second installment *Life in the Market Ecosystem* explained how free enterprise functions much as a natural ecosystem wherein behavioral norms develop bottom up from repeat interactions among individual participants in the economy As such defenses of free enterprise are frequently criticized as social Darwinism however this third and final installment of the trilogy asks the question What is social Darwinism The book embarks on a hunt for the term s meaning

explores social Darwinism's beginnings and examines whether it is fair to describe such nineteenth century free market advocates as Herbert Spencer and William Graham Sumner as social Darwinists. It then addresses the accusation that the free market Darwinism commonly ascribed to Spencer and Sumner rationalized bigotry and founded the pseudoscience of eugenics. In the process, the book refutes various myths about the topic popularized by such scholars as Richard Hofstadter and John Kenneth Galbraith. The extent to which the popular narratives about social Darwinism prove to be inaccurate holds enormous ramifications for current controversies. It has implications for debates over the ethical appropriateness of reducing taxpayer spending on social welfare programs and also sheds new light on the pros and cons of attempts to apply biological evolutionary theory to the study of human social institutions. Additionally discussed is the manner in which various prominent figures in economics, evolutionary psychology, and Complexity Theory have grown famous for advancing ideas which Spencer and Sumner originated, even as such figures simultaneously downplay the importance of Spencer and Sumner to their field. Following the hunt for social Darwinism, this work sums up the trilogy with some final thoughts on the importance that liberty holds for every effort to live life to the fullest.

**My Forty Years with Ford** Charles E. Sorensen, 2006-01-09 An unflinching eyewitness account of the Ford story as told by one of Henry Ford's closest associates. In *My Forty Years with Ford*, Charles Sorensen, sometimes known as Henry Ford's man, sometimes as Cast Iron Charlie, tells his own story, and it is as challenging as it is historic. He emerges as a man who was not only one of the great production geniuses of the world but also a man who called the plays as he saw them. He was the only man who was able to stay with Ford for almost the full history of his empire, yet he never hesitated to go against Ford when he felt the interests of the company demanded it. When labor difficulties mounted and Edsel's fatal illness was upon him, Sorensen sided with Edsel against Henry Ford and Harry Bennett, and he insisted that Henry Ford II be brought in to direct the company despite the aging founder's determination that no one but he hold the presidential reins. First published in 1956, *My Forty Years with Ford* has now been reissued in paperback for the first time. The Ford story has often been discussed in print but has rarely been articulated by someone who was there. Here Sorensen provides an eyewitness account of the birth of the Model T, the early conflicts with the Dodge brothers, the revolutionary announcement of the five dollar day, and Sorensen's development of the moving assembly line, a concept that changed our world. Although Sorensen conceived, designed, and built the giant Willow Run plant in nineteen months and then proceeded to turn out eight thousand giant bombers, his life's major work was to make possible the vision of Henry Ford and to postpone the personal misfortune with which it ended. *My Forty Years with Ford* is both a personal history of a business empire and a revelation that moves with excitement and the power of tragedy.

Hayashi,2014-11-13 *Life in the Market Ecosystem* the second book in the *Nature of Liberty* trilogy confronts evolutionary psychology head on It describes the evolutionary psychologists theory of gene culture co evolution which states that although customs and culture are not predetermined by anyone s genetic makeup one s practice of a custom can influence the likelihood of that person having children and grandchildren Therefore according to the theory customs count as evolutionary adaptations Extending that theory further as entire systems of political economy capitalism socialism and hunter gatherer subsistence consist of multiple customs and institutions it follows that an entire political economic system can likewise be classified as an evolutionary adaptation Considering that liberal republican capitalism has insofar as the system has been implemented done more to reduce the mortality rate and secure human fertility than other

models of societal structure it stands to reason that liberal republican capitalism is itself a beneficent evolutionary adaptation. Moreover, as essential tenets of Rand's Objectivism, individualism, observation-based rationality, and peaceable self-interest have been integral to the development of the capitalist ecosystem, important aspects of the Objectivism are worthwhile adaptations as well. This book shall uphold that position as well as combat critiques by evolutionary psychologists and environmentalists who denounce capitalism as self-destructive. Instead, capitalism is the most sustainable and fairest political model. This book argues that of all the philosophies, Objectivism is the one that is most fit for humanity.
