Energy and American Society - Thirteen Myths Benjamin K. Sovacool, Marilyn A. Brown, 2007-05-04 Current events related to energy policy skyrocketing gasoline prices the 2003 Northeast Blackout the Kyoto Protocol's enactment passage of the Energy Policy Act of 2005 and the influence of recent Gulf Coast hurricanes on energy supplies and prices demand innovative approaches towards conceptualizing the relationship between energy and American society This book takes on a central quandary in the study of energy and environmental policy What myths continue to exist in American culture concerning energy the environment and society It enrolls twenty four of the nation's top experts working on energy policy in industry government laboratories utilities nonprofit organizations and universities to debunk and contextualize thirteen energy myths relating to electric power renewable energy energy efficiency transportation and climate change While the book focuses on the American experience it will be of interest to those working in the fields of energy policy energy and the environment and technology assessment worldwide This is a brilliant bold and fascinating book that should be read by anybody even remotely concerned about energy the environment or the future of American society Art Rosenfeld Commissioner California Energy Commission and recipient of the 2006 Enrico Fermi Award This work is a must read for anyone interested in American energy policy Kateri Callahan President Alliance to Save Energy By collecting the best minds to debunk the greatest of these myths Sovacool and Brown have brought us a step closer to finding a national energy policy based on common sense Chris Cooper Executive Director Network for New Energy Choices Sovacool and Brown provide a bold and imaginative way forward John A Skip Laitner Visiting Fellow and Senior Economist American Council for an Energy Efficient Economy *Energy and American Values* Ian G. Barbour, 1982-01-01 [Energy Abstracts for Policy Analysis](#), 1984 *Solar Energy, Technology Policy, and Institutional Values* Frank N. Laird, 2001-03-26 Energy policies that promote new technologies and energy sources are policies for the future They influence the shape of emergent technological systems and also condition our social political and economic lives *Solar Energy Technology Policy and Institutional Values* demonstrates the difficulties of deliberating such properties by providing a historical case study that analyses US renewable energy policy from the end of World War II through the energy crisis of the 1970s The book illuminates the ways beliefs and values come to dominate official problem frames and get entrenched in institutions In doing so it also explains why advocates of renewable energy have often faced ideological opposition and why policy makers fail to take them seriously [American Political Culture](#) Michael Shally-Jensen, Mark J. Rozell, Ted G. Jelen, 2015-04-28 This all encompassing encyclopedia provides a broad perspective on U S politics culture and society but also goes beyond the facts to consider the myths ideals and values that help shape and define the nation Demonstrating that political culture is equally rooted in public events internal debates and historical experiences this unique three volume encyclopedia examines an exceptionally broad range of factors shaping modern American politics including popular belief political action and the institutions of power and authority Readers will see

how political culture is shaped by the attitudes opinions and behaviors of Americans and how it affects those things in return The set also addresses the issue of American exceptionalism and examines the nation s place in the world both historically and in the 21st century Essays cover pressing matters like congressional gridlock energy policy abortion politics campaign finance Supreme Court rulings immigration crime and punishment and globalization Social and cultural issues such as religion war inequality and privacy rights are discussed as well Perhaps most intriguingly the encyclopedia surveys the fierce ongoing debate between different political camps over the nation s historical development its present identity and its future course By exploring both fact and mythology the work will enable students to form a broad yet nuanced understanding of the full range of forces and issues affecting and affected by the political process

Wealth, Energy, and Human Values

Thomas P. Wallace,2009 The degradation of the modern American culture including its 2008 financial and economic crisis and the modern rejuvenation of Asian cultures are best understood within the context of 4 000 years of human history Such are the consequences of the dynamics of cultural change responding to societal variables of wealth energy and human values This work provides a unique and formidable science based framework for civilization development that complements and enhances the work of preeminent historians and sociologists Accordingly the foundation for societal progress is placed on restrictive scientific definitions principles and concepts of energy and wealth consumption rather than solely on behavioral perspectives derived from empirical data and historical events Society s dynamic forces are linked to the cultural deterioration and collapse of Ancient Greece and Rome Imperial Spain and Great Britain Specific chapters are devoted to stagnation of Western civilization Asian and Islamic resurgence deterioration of the American culture and ecological degradation of North America s largest estuary the Chesapeake Bay collateral damage of socio economic profitability The characteristics of America s current cultural deterioration parallel those of previous great civilizations These include abuse of wealth and energy resources excessive individual and national debt lack of cultural civility discipline integrity and ethics unaffordable militarism escalating income and wealth disparities unresolved crises in health care and public education and stultifying cultural complexity and bureaucracy Themes include the underlying principles responsible for the eventual deterioration of all known civilizations the basis for the recurring sequential periodicity of civilization success and failure and the roles and significance of militarism and religion in civilization growth decay and rebirth Addressing these themes necessitates the integration of the academic disciplines of history sociology economics and science reflecting human nature and socioeconomic and political realities that fundamentally and continuously alter human values priorities and behavior thus creating human history
