England And Wales:

The Changing Electoral Map of England and Wales Jamie Furlong, Will Jennings, 2024-07-12 The 2019 British general election saw a dramatic redrawing of the electoral map with the Labour Party losing seats to the Conservatives in former heartlands in the North of England and Midlands Yet this had been a long term shift with the opposite trend occurring in major cities and university towns where Labour's support has been increasing What has driven these changes in electoral geography Why do they matter This book offers a definitive account of the changing electoral geography of England and Wales over the past half century Jamie Furlong and Will Jennings argue that long term trends in social and economic structure have significantly altered the spatial distribution of voters and combined with changes in the parties appeal to those voters have led to a gradual though recently accelerating realignment of the geographical basis of electoral competition Constituency level analysis of voting at general elections between 1979 and 2019 reveals a swing from Labour to the Conservatives in demographically left behind areas areas with largely white working class populations and lower levels of educational attainment while Labour's support has remained stable in areas characterized by high levels of economic deprivation and insecure employment Areas that have experienced improvements in their socioeconomic condition typically cities where Labour have inefficiently stacked up votes have swung towards Labour whereas areas characterized by economic and population decline have swung towards the Conservatives Spatial analysis reveals clusters of seats where each party has more support than expected based on sociodemographic composition places where in short place matters In Merseyside Labour's vote is much higher than would be predicted by demographics while this is similarly the case for the Conservatives in Lincolnshire and parts of the West Midlands But what makes these areas distinctive We present qualitative case studies for Merseyside and Lincolnshire to identify the place based contextual factors that help explain their unusual political characteristics The book argues for the need to recognize the importance of people places and parties in shaping the geography of electoral outcomes

Deserted Wives and Economic Divorce in 19th-Century England and Wales Jennifer Aston, Olive Anderson, 2024-11-14 This book considers Section 21 of the Divorce and Matrimonial Causes Act 1857 and its significant impact on previously invisible married women in the 19th century Tens of thousands of women used this little known section of the Act to apply for orders from local magistrates courts to reclaim their rights of testation inheritance property ownership and dependent on local franchise qualifications ability to vote By examining the orders that were made and considering the women who applied for them the book challenges the mistaken belief that Victorian England and Wales were nations of married cohabiting couples The detailed statistical analysis and rich case studies presented here provide a totally new perspective on the legal status and experiences of married women in England and Wales Although many thousands of orders were granted between 1858 and 1900 their details remain unknown and unexamined primarily because census records did not consistently record dissolved marriages and there is no central index of applications made Using

sources including court records parliamentary papers newspaper reports census returns probate records and trade directories this book reconstructs the successful and unsuccessful experiences of women applying to magistrates courts and the Court for Divorce and Matrimonial Causes to protect their assets across regions and decades **Government Publications of ...** Great Britain. The Nurse Apprentice, 1860-1977 Ann Bradshaw, 2017-07-05 The British apprenticeship model of nurse training developed under Florence Nightingale's influence from 1860 at St Thomas's Hospital gained national and world wide recognition Its end was heralded with the publication of the last national syllabus from the General Nursing Council for England and Wales in 1977 This apprenticeship model a crucial part of the history of British health care for over a century is the subject of this book Primary evidence much of it original is gained from Parliamentary debates and reports syllabuses long neglected nursing textbooks major governmental and professional reports and the voices of nurses themselves expressed through their professional journals Primary sources are systematically re-examined and contextually interpreted in the light of new evidence The study in particular interprets the contemporary attitudes and moral values underpinning the apprenticeship system especially the place of vocation The reasons for the ending of this system arising in part from the cultural shifts of the 1960s are explained in relation to this historical moral context The reader sees how the self-understanding of the profession shifts with much tension and disagreement as mores change The book fills a major gap in the history of nurse training by giving a sustained account of the apprenticeship model of nursing in context and charting changing values away from the historic vocational tradition Its copious use of primary sources will make this a key text for nurses historians and policy makers
