Conservation of Modern Architecture Susan

Macdonald, Kyle C. Normandin, Bob Kindred, 2015-12-08 The importance of protecting significant buildings from decay and destruction would seem to be undeniable Yet whilst the majority of buildings of merit constructed before the Second World War have been highlighted as worthy of protection there is much indifference and in some cases hostility towards many important post war buildings These deserve to receive wider formal recognition but in many cases continue to be mistreated or even demolished This book examines many of the philosophical and practical issues surrounding the conservation of modern buildings and also the problems faced by building practitioners in dealing with buildings constructed in a wider range of styles and materials than at any other time Climate change in particular has forced change in the way in which we think about buildings with the pressures to address issues of energy efficiency becoming more urgent and likely to have consequences that may alter the perceived architectural and historic interest of modern and traditional buildings alike

Architecture : nineteenth and twentieth centuries Henry-Russell Hitchcock, 2023-07-11 In *Architecture Nineteenth and Twentieth Centuries* Henry Russell Hitchcock presents a comprehensive examination of the evolution of architectural styles across two pivotal centuries This meticulously researched volume synthesizes a rich tapestry of movements from Romanticism to Modernism analyzing how historical context technological advancements and cultural shifts influenced architectural practices Hitchcock's prose is both scholarly and accessible employing a critical lens that adeptly navigates the interplay between form and function while also highlighting the significance of prominent figures and landmark projects that have shaped the architectural landscape Henry Russell Hitchcock an esteemed architectural historian was deeply influenced by the changing urban environments of his time and the burgeoning modernist movement His academic pursuits were dedicated to exploring the connections between architecture art and society an interest that fueled his desire to articulate the complexities of architectural development With a degree in Fine Arts and a profound appreciation for design Hitchcock's insights reflect not only a scholarly expertise but also a passionate engagement with the evolution of built environments *Architecture Nineteenth and Twentieth Centuries* is an essential read for students historians and anyone with a keen interest in the architectural narratives that define modern society Hitchcock's authoritative analysis offers a lens through which to appreciate the transformative power of architecture and encourages readers to critically engage with the spaces they inhabit

Revaluating Modern Architecture John Allan, 2022-02-28

The conservation of our Modern architectural heritage is a subject of vehement debate When do buildings become old or significant enough to warrant special heritage status and protection Should Modern listed buildings be treated differently

from those of earlier periods And what does all this mean for building users and owners who might be better served if their buildings were less authentic but more comfortable and usable Presenting a clear line of sight through these complex questions this book explores the conservation regeneration and adaptive re use of Modern architecture It provides a general grounding in the field its recent history and current development including chapters on authenticity charters listing and protection Case studies drawing on the author s extensive practical experience offer valuable lessons learnt in the conservation of Modern heritage buildings Looking beyond the specialist field of elite heritage Revaluing Modern Architecture also considers the changing culture of conservation for sub iconic buildings in relation to de carbonisation and the climate emergency It suggests how revaluing the vast legacy of modern architecture can help to promote a more sustainable future Features leading conservation projects such as the celebrated Penguin Pool at London Zoo Finsbury Health Centre by Lubetkin Tecton and Wells Coates Isokon Lawn Road Flats as well as previously unpublished projects Analyses key Modern conservation controversies of recent years Illustrated with over 160 photos and drawings An essential primer for architectural students and practitioners academics those employed in conservation and planning property owners developers surveyors and building managers *Dictionary of Architecture and Building Construction* Nikolas Davies, Erkki Jokiniemi, 2008-06-19 With more than 20 000 words and terms individually defined the Dictionary offers huge coverage for anyone studying or working in architecture construction or any of the built environment fields The innovative and detailed cross referencing system allows readers to track down elusive definitions from general subject headings Starting from only the vaguest idea of the word required a reader can quickly track down precisely the term they are looking for The book is illustrated with stunning drawings that provide a visual as well as a textual definition of both key concepts and subtle differences in meaning Davies and Jokiniemi s work sets a new standard for reference books for all those interested in the buildings that surround us To browse the book and to see how this title is an invaluable resource for both students and professionals alike visit www.architectsdictionary.com *A Bibliography of British History, 1914-1989* Keith Robbins, American Historical Association, Royal Historical Society (Great Britain), 1996 Containing over 25 000 entries this unique volume will be absolutely indispensable for all those with an interest in Britain in the twentieth century Accessibly arranged by theme with helpful introductions to each chapter a huge range of topics is covered There is a comprehensive index *Britain* Alan Powers, 2007 Thoroughly illustrated with images of the buildings under discussion advertisements and other historical photographs Britain is an authoritative yet highly accessible account of twentieth century British architecture *Specifications for Building Conservation* Rory Cullen, Rick Meier, 2017-09-19 In Specifications for Building Conservation the National Trust draws on a range of case studies and specifications to provide a much needed guide to specification writing for building conservation Although traditional building accounts for approximately a quarter of all buildings in the UK the old skills and understanding required for their care and maintenance have been increasingly eroded over the last century

As the largest heritage charity in Europe the National Trust has a first class reputation for high standards of conservation and care and in this three volume set the Trust brings together a remarkable pool of expertise to guide conservation professionals and students through the process of successful specification writing This first book focusses on the materials used for the external fabric detailing successful approaches employed by the National Trust at some of their most culturally significant sites A range of studies have been carefully selected for their interest diversity and practicality showcasing projects from stonework repairs on the magnificent Grade I listed Hardwick Hall to the re thatching of the traditional cottages of the Holnicote Estate Complete with a practical Conservation Management Plan checklist this book will enable practitioners to develop their skills allowing them to make informed decisions when working on a range of project types This is the first practical guide to specification writing for building conservation and the advice provided by the National Trust experts will be of interest to any practitioners and students involved in building conservation both in the UK and beyond Profits generated from the sale of this publication will go to the National Trust Building Apprenticeship Scheme This provides placements for traditional skills at National Trust properties Modern Architecture and the Sacred Ross

Anderson, Maximilian Sternberg, 2020-11-26 This edited volume Modern Architecture and the Sacred presents a timely reappraisal of the manifold engagements that modern architecture has had with the sacred It comprises fourteen individual chapters arranged in three thematic sections Beginnings and Transformations of the Modern Sacred Buildings for Modern Worship and Semi Sacred Settings in the Cultural Topography of Modernity The first interprets the intellectual and artistic roots of modern ideas of the sacred in the post Enlightenment period and tracks the transformation of these in architecture over time The second studies the ways in which organized religion responded to the challenges of the new modern self understanding and then the third investigates the ways that abstract modern notions of the sacred have been embodied in the ersatz sacred contexts of theatres galleries memorials and museums While centring on Western architecture during the decisive period of the first half of the 20th century a time that takes in the early musings on spirituality by some of the avant garde in defiance of Sachlichkeit and the machine aesthetic the volume also considers the many varied appropriations of sacrality that architects have made up to the present day and also in social and cultural contexts beyond the West

Modern Buildings in Britain Owen Hatherley, 2022-04-07 The definitive illustrated guide to modern British architecture from one of the most acclaimed critics at work today Modernism is now a century old and its consequences are all around us built into our everyday lived environments Its place in Britain s history is fiercely contested and its role in our future is the subject of ongoing controversy but modernist buildings have undoubtedly changed our cities politics and identity forever In Modern Buildings in Britain Owen Hatherley applauds the ambition and explores the significance of this most divisive of architectures travelling from Aberystwyth to Aberdeen from St Ives to Shetland in search of our most important and distinctive modern buildings Drawing on hundreds of examples we learn how the concrete of Brutalism embodies post

war civic principles how corporate values were expressed in the glass facades of the International Style and why Ecomodernist experimentation is often consigned to the geographic fringes As Hatherley considers the social political and cultural value of these structures a number of which are threatened by demolition two linked questions emerge what happens to a building after it has been lived in and what becomes of an idea when its time has passed With more than six hundred pages of trenchantly opinionated often witty analysis and with three hundred photographs in duotone and colour *Modern Buildings in Britain* is a landmark contribution to the history of British architecture **Catalog of the Avery Memorial Architectural Library of Columbia University: Syme - Vanc** Avery Library,1968 **Analysing Buildings from Context to Detail in Time** Hielkje Zijlstra,2009 Technology provided the author of this book with the inspiration to develop a more comprehensive research method to assess buildings *Analysing Buildings from Context to Detail in time ABCD Research Method* Technology at academic level should be considered in the analysis of a building In this book the focus is on construction engineering the study of the requirements associated with constructing buildings Providing information on practice is a key element in construction engineering which is a learning process Changes are made during the life of a building and they might be made differently if the history and technical aspects of the building were studied in greater detail Both maintenance and changes require us to understand the building concerned *Finding List of the Free Library of the General Society of Mechanics and Tradesmen of the City of New York* General Society of Mechanics and Tradesmen of the City of New York. Free Library,1888 Art in England Sara N. James,2016-10-31 *Art in England* fills a void in the scholarship of both English and medieval art by offering the first single volume overview of artistic movements in Medieval and Early Renaissance England Grounded in history and using the chronology of the reign of monarchs as a structure it is contextual and comprehensive revealing unobserved threads of continuity patterns of intention and unique qualities that run through English art of the medieval millennium By placing the English movement in a European context this book brings to light many ingenious innovations that focused studies tend not to recognize and offers a fresh look at the movement as a whole The media studied include architecture and related sculpture both ecclesiastical and secular tomb monuments murals panel paintings altarpieces and portraits manuscript illuminations textiles and art by English artists and by foreign artists commissioned by English patrons *The American Catalogue* ,1905 *Schools and Kindergartens* Mark Dudek,2015-04-28 As a new generation of educational environments are designed and built this *Design Manual* illustrates the most up to date educational strategies and how they are realized in built form Concepts such as working with small teams of students interdisciplinary learning and inclusion of SEN students all require specific spation solutions This specialized field is explained in all its relevant aspects such as role in the community outdoor spaces sustainability and technical requirements such as lighting and acoustics With over 70 case studies from Europe North America and the Pacific Region this is an essential guide for architects involved in the design of schools and kindergartens For the revised edition six groundbreaking

new best practice examples were selected such as Primary School Niederheide near Berlin the first plus energy school in Germany the education center Tor zur Welt one of the key projects of building exhibition IBA 2013 in Hamburg and Children's House for All by Maki Onisha and Toyo Ito conceived for use in refugee camps

The American Catalog, 1900-1905, 1905 Architecture, Media, Populism... and Violence Graham Cairns, 2022-10-07 The Storming of the Capitol was for many the culminating media performance of the four year presidency of Donald Trump His presidency and its final act bore all the hallmarks of a 21st century form of populism and media politico spectacle that may yet come to dominate the political scene in the US and worldwide for years to come The questions that such events raise are complex varied and operative across a multitude of disciplines This book engages with these vexed questions in the broad fields of politics and media but does so uniquely through the prism of architecture This book does not however limit its view to the recent events in Washington DC or the United States Rather it seeks to use those events as the starting point for a critique of architecture in the tapestry of mediated forms of protest and political action more generally Each chapter draws on case studies from across timeframes and across nations The book sharpens our critique of the relationship between direct political action its media representation and the role it assigns to architecture as played out globally in the age of mass media In doing so it opens up broader debates about the past present and future roles of architecture as a political tool in the context of international political systems now dominated by changing and unpredictable uses of media and characterised by an increasingly volatile and at times violent form of political activism It is essential reading for any student or researcher engaging with these questions

Environmental Planning in the Caribbean Janet Momsen, 2016-12-05 Illustrated by case studies from both smaller nations such as Carriacou Barbados and St Lucia and larger countries including Cuba Mexico and Jamaica this volume brings together leading writers on environmental planning in the Caribbean to provide an interdisciplinary contemporary critical overview They argue that context is central to the practice of environmental planning in this region Rather than focusing on a deterministic colonial geography and history the contributors propose that whilst a wide range of foreign planning influences can be felt in different contexts environmental planning emerges in specific settings through the fluid interaction between local and global relations of power A number of chapters explore the effects of external discourses upon the region while others examine discourses on Western style democracy and tourism Other important themes covered include participatory planning urban planning physical development planning pest management sustainable development water pollution conservation and ecotourism
