comparison of the three languages O'Neill shows that long term contact among the tribes intensified their linguistic differences creating unique Hupa Yurok and Karuk identities If language encapsulates worldview as the principle of linguistic relativity suggests then this region's linguistic diversity is puzzling Analyzing patterns of linguistic accommodation as seen in the semantics of space and time grammatical classification and specialized cultural vocabularies O'Neill resolves the apparent paradox by assessing long term effects of contact

Higher Education Internationalization and English Language Instruction Xiangying Huo, 2020-11-07 This book offers new understanding of the implications of pluralism and of transnational movements to higher education and the construct of a native speaker within contemporary globalization processes Theoretically it calls for a revisioned English as an International Language EIL pedagogy and a wider acceptance of EIL and of World Englishes It challenges the postsecondary education sector to change the discourse around language proficiency to one that engages the pluralism of English As for the applied significance the book contributes to the work on neo racism which means racism goes beyond color to stereotypic foreign cultures nationalities and exotic accents based on cultural distinctions instead of merely skin differences The book contributes to higher education policy and practice pushing a revisioning of ESL in conceptual and pedagogical ways such as designing more culturally oriented curriculum implementing culturally responsive pedagogy and valuing the teaching proficiency more than the language proficiency

Ergativity Alana Johns, Diane Massam, Juvenal Ndayiragije, 2006-06-28 This volume presents a collection of papers on the enticing and complex theme of Ergativity The papers exemplify theoretical depth applied to a wide range of languages with the majority of papers based on original fieldwork Ergativity refers to a grammatical pattern in which the logical subject of intransitive clauses and the logical object of transitive clauses share some grammatical features and in this respect differ from transitive subjects The shared features are often case and or agreement but a variety of other relevant features have also been isolated in the literature The ergative pattern contrasts with that found in accusative languages where the subject has the same grammatical marking in intransitive and transitive clauses while the object has different marking Ergativity provides us with an ideal testing ground for claims about the range and limits of language variation and about the degree of elasticity in the morphology syntax interface However because an understanding of ergativity rests on an understanding of other difficult grammatical issues such as grammatical relations transitivity aspect person case and agreement a clear and integrated analysis of the phenomenon has remained elusive Since Dixon's 1967/1972 pioneer study of Dyirbal extensive research has been conducted on a variety of ergative languages over the world from both descriptive typological and theoretical perspectives see inter alia Anderson 1976 Silverstein 1976 Comrie 1978 Dixon 1979/1994 DeLancey 1981 Marantz 1984 Levin Massam 1985 Johns 1992 Bittner and Hale 1996 to name a few
