Stephens,2017-07-10 Money is the root of all evil It causes greed splits families and ruins lives Brian finds this out firsthand Throughout his life not having a lot of money he was under the impression that money would make him happy With Brian having several children and a wife he figures that he would be able to give his children a better life if he had more money His numbers come up and he wins the jackpot Investing the money and growing his newfound business the greed kicks in He wants more He makes it seem as if he is doing it to help people but it s all about the bottom line He expands at such a rapid pace that he starts taking out small businesses at first Trying to balance family and business he makes sure that what people see is a happy family but it s just an illusion There is no limit to where he goes or how he gets there nothing is off limits with him His line of new friends are all people with power or money people who could help him achieve his goal of obtaining more money Avoiding tragedies in his own life because his life is so focused on the money even his children try to get him to focus on dealing with life When the ultimate tragedy strikes reality hits him like a ton of bricks and his world is turned upside down He falls into a depression His friend comes over and talks him out of the depression and has him focus on what he has right in front of him At that point he realizes the damage that the money has caused and he spends the money necessary to try to avoid it happening to other families He finally realizes that true happiness lies beyond money **Folk Illusions** K. listening for the sounds of the ocean in a conch shell these are examples of folk illusions youthful play forms that trade on perceptual oddities In this groundbreaking study K Brandon Barker and Claiborne Rice argue that these easily overlooked instances of children s folklore offer an important avenue for studying perception and cognition in the contexts of social and embodied development Folk illusions are traditionalized verbal and or physical actions that are performed with the intention of creating a phantasm for one or more participants Using a cross disciplinary approach that combines the ethnographic methods of folklore with the empirical data of neuroscience cognitive science and psychology Barker and Rice catalogue over eighty discrete folk illusions while exploring the complexities of embodied perception Taken together as a genre of folklore folk illusions show that people starting from a young age possess an awareness of the illusory tendencies of perceptual processes as well as an awareness that the distinctions between illusion and reality are always communally formed *The Truth About Lies* Travis D.
