**I Learn from Children** Caroline Pratt, 2014-06-16 The memoir of an innovative American educator and the remarkable school she built a lucid presentation of what progressive education can accomplish The New York Times Over a century ago American educator Caroline Pratt created an innovative school that fosters creativity and independent thought by asking the provocative question Was it unreasonable to try to fit the school to the child rather than the child to the school A strong willed small town schoolteacher who ran a one room schoolhouse by the time she was seventeen Pratt came to viscerally reject the teaching methods of her day which often featured a long winded teacher at the front of the room and rows of miserable children sitting on benches nailed to the floor In this persuasive presentation of progressive education Pratt recounts how she founded what is now the dynamic City and Country School in New York City invented the unit blocks that have become a staple in classrooms around the globe and played an important role in reimagining preschool and primary school education in ways that are essential for the tumultuously creative time we live in today Kirkus Reviews [How Children Learn](#) John Holt, 2009-04-20 From the preface by Deborah Meier We have a long way to go to make John Holt's dream available to all children But his books make it possible and easier for many of us to join him in the journey In this enduring classic rich with deep original insight into the nature of early learning John Holt was the first to make clear that for small children learning is as natural as breathing In his delightful book he observes how children actually learn to talk to read to count and to reason and how as adults we can best encourage these natural abilities in our children *Writings* Just Jeffrey, 2023-07-30 Writings By Just Jeffrey is simply a collection of writings into themes of intimacy influences inspiration and dynamics creating external and internal support networks and balance care giving losing faith in self and God and finding it again A compilation of heartfelt light hearted and enlightened romp through many facets of the human experience poverty neglect substance abuse mental illness discrimination public policy advocacy spirituality and healing reflected through Just Jeffrey's bright polychromatic mind Read it and act *The young child's lesson book; or, what shall i learn first?* William Cort, 1855 [Teaching Children to Learn](#) Robert Fisher, 2005 This exciting book fosters the skills involved in learning providing a framework for developing active learning in every community classroom and school This new edition suggests more ways to create powerful learning environments Teaching Children to Learn has been revised and enlarged giving more practical ideas to develop creative learning skills It includes new sections on learning styles accelerated learning and ways to motivate learning *I'm the Dumbest Kid in Class* Cheryl Hecht, 2013-03-29 Cheryl shares stories of her experiences teaching arithmetic using traditional lessons and how her shift in thinking about and learning about math changed the way she teaches mathematics rather than arithmetic Readers will learn about differences in students and strategies which make learning math more effective and less stressful [Proceedings of the National Conference of Social Work at the ... **Mathematics for Young Children** Marion H. Bird,2022-11-21 For many years increasing stress has been placed on the importance of giving the under sevens a good start in mathematics Originally published in 1991 Mathematics for Young Children shows how children as young as four and five and of all abilities can be encouraged to carry out their own mathematical explorations whilst covering the content of a prescribed curriculum A substantial part of the book is taken up with actual case studies of children working with Marion Bird in a reception classroom fully illustrated with examples of the children s work These case studies are then analysed to show how a prescribed syllabus can be effectively covered through an investigational approach a point which is of paramount importance to teachers concerned with the introduction of the National Curriculum The role of the teacher too is examined carefully in order to identify those parts of a teacher s repertoire which seems to be particularly fruitful in encouraging young children s active mathematical thinking Throughout readers are encouraged to apply and amend ideas to suit their own particular circumstances
