I Like You and Du:

Language Policy for the Multilingual Classroom Christine Hélot, Muiris Ó Laoire, 2011 The book proposes a round the world exploration of the way our traditionally monolingual school systems are being challenged by students from diverse language backgrounds forcing educationalists to question entrenched ideologies of language and challenging teachers in their everyday classrooms to rethink their relationships to language learning and the issue of diversity Transcending Boundaries Gisela Hermann-Brennecke, 2007 This volume presents 16 essays by friends and colleagues celebrating Gisela Hermann Brennecke's 60th birthday Since the early 1970s when she emerged as one of the outstanding German specialists in language acquisition and language teaching she has been active in research and teaching at various German universities and abroad The wide range of Gisela Hermann Brennecke's research interests and publications transcending boundaries is mirrored in the diversity of the contributions in this volume language learning and language policy studies in English American and Postcolonial literatures and cultures creative writing Language Hacking German Benny Lewis, 2017-03-28 It's true that some people spend years studying German before they finally get around to speaking the language But here's a better idea Skip the years of study and jump right to the speaking part Sound crazy No it's language hacking Unlike most traditional language courses that try to teach you the rules of German LanguageHacking shows you how to learn and speak German through proven memory techniques unconventional shortcuts and conversation strategies perfected by one of the world's greatest language learners Benny Lewis aka the Irish Polyglot Using the language hacks shortcuts that make learning simple that Benny mastered while learning his 11 languages and his speak from the start method you will crack the language code and exponentially increase your language abilities so that you can get fluent faster It's not magic It's not a language gene It's not something only other people can do It's about being smart with how you learn learning what's indispensable skipping what's not and using what you've learned to have real conversations in German from day one The Method LanguageHacking takes a modern approach to language learning blending the power of online social collaboration with traditional methods It focuses on the conversations that learners need to master right away rather than presenting language in order of difficulty like most courses This means that you can have conversations immediately not after years of study Each of the 10 units culminates with a speaking mission that prepares you to use the language you've learned to talk about yourself Through the language hacker online learner community you can share your personalized speaking missions with other learners getting and giving feedback and extending your learning beyond the pages of the book You don't need to go abroad to learn a language any more **Heteroglossia as Practice and Pedagogy** Adrian Blackledge, Angela Creese, 2013-12-17 This volume presents evidence about how we understand communication in changing times and proposes that such understandings may contribute to the development of pedagogy for teaching and learning It expands current debates on multilingualism asking which signs are in use and in action and what are their social political and historical

implications The volume's starting point is Bakhtin's heteroglossia a key concept in understanding the tensions conflicts and multiple voices within among and between those signs The chapters provide illuminating accounts of language practices as they bring into play both in practice and in pedagogy voices which index students localities social histories circumstances and identities The book documents the performance of linguistic repertoires in an era of profound social change caused by the shifting nature of nation states increased movement of people across territories and growing digital communication Our thinking on language and multilingualism is expanding rapidly Up until recently we have tended to regard languages as bounded entities and multilingualism has been understood as knowing more than one language Working with the concept of heteroglossia researchers are developing alternative perspectives that treat languages as sets of resources for expressing meaning that can be drawn on by speakers in communicatively productive ways in different contexts These perspectives raise fundamental questions about the myriad of ways of knowing and using language's This collection brings together the contributions of many of the key researchers in the field It will provide an authoritative reference point for contemporary interpretations of heteroglossia and valuable accounts of how translanguaging can be explored and exploited in the fields of education and cultural studies Professor Constant Leung King's College London UK From rap and hip hop to taxi cabs and from classrooms to interactive online learning environments each of the chapters in this volume written by well known and up and coming scholars provide fascinating accounts drawing on a wide diversity of rich descriptive data collected in heteroglossic contexts around the globe Creese and Blackledge have brought together a compelling collection that builds upon and expands Bakhtin's construct of heteroglossia These scholars help to move the field away from the view of languages as separate bounded system by providing detailed examples and expert analyses of the ways bilinguals and multilinguals draw upon their linguistic repertoires for effective and meaningful communication Wayne E Wright University of Texas at San Antonio USA

Conceptualising Integration in CLIL and Multilingual Education Tarja Nikula, Emma Dafouz, Pat Moore, Ute Smit, 2016-08-18 Content and Language Integrated Learning CLIL is a form of education that combines language and content learning objectives a shared concern with other models of bilingual education While CLIL research has often addressed learning outcomes this volume focuses on how integration can be conceptualised and investigated Using different theoretical and methodological approaches ranging from socioconstructivist learning theories to systemic functional linguistics the book explores three intersecting perspectives on integration concerning curriculum and pedagogic planning participant perceptions and classroom practices The ensuing multidimensionality highlights that in the inherent connectedness of content and language various institutional pedagogical and personal aspects of integration also need to be considered
