Re-Mapping Centre and Periphery Tessa Hauswedell, Axel Körner, Ulrich Tiedau, 2019-03-25 Historians often assume a one directional transmission of knowledge and ideas leading to the establishment of spatial hierarchies defined as centres and peripheries In recent decades transnational and global history have contributed to a more inclusive understanding of intellectual and cultural exchanges that profoundly challenged the ways in which we draw our mental maps Covering the early modern and modern periods *Re Mapping Centre and Periphery* investigates the asymmetrical and multi directional structure of such encounters within Europe as well as in a global context Exploring subjects from the shores of the Russian Empire to nation making in Latin America the international team of contributors demonstrates how as products of human agency centre and periphery are conditioned by mutual dependencies rather than representing absolute categories of analysis they are subjective constructions determined by a constantly changing discursive context Through its analysis the volume develops and implements a conceptual framework for remapping centres and peripheries based on conceptual history and discourse history As such it will appeal to a wide variety of historians including transnational cultural and intellectual and historians of early modern and modern periods Cowboys of the Americas Richard W. Slatta, 1990-01-01 Lavishly

illustrated with photographs paintings and movie stills this Western Heritage Award winning book explores what life was actually like for the working cowboy in North America If you read only one book on cowboys read this one Journal of the Southwest *London's Urban Landscape* Christopher Tilley, 2019-05-07 London's Urban Landscape is the first major study of a global city to adopt a materialist perspective and stress the significance of place and the built environment to the urban landscape Edited by Christopher Tilley the volume is inspired by phenomenological thinking and presents fine grained ethnographies of the practices of everyday life in London In doing so it charts a unique perspective on the city that integrates ethnographies of daily life with an analysis of material culture The first part of the volume considers the residential sphere of urban life discussing in detailed case studies ordinary residential streets housing estates suburbia and London's mobile linear village of houseboats The second part analyses the public sphere including ethnographies of markets a park the social rhythms of a taxi rank and graffiti and street art London's Urban Landscape returns us to the everyday lives of people and

the manner in which they understand their lives The deeply sensuous character of the embodied experience of the city is invoked in the thick descriptions of entangled relationships between people and places and the paths of movement between them What stories do door bells and house facades tell us about contemporary life in a Victorian terrace How do antiques acquire value and significance in a market How does living in a concrete megastructure relate to the lives of the people who dwell there These and a host of other questions are addressed in this fascinating book that will appeal widely to all readers interested in London or contemporary urban life
