End Of Architecture Documents And Manifestos:

The End of Architecture? Peter Noever, 1993 *Narrative Architecture* Sylvain De Bleeckere, Sebastiaan Gerards, 2017-02-24 Narrative Architecture explores the postmodern concept of narrative architecture from four perspectives thinking imagining educating and designing to give you an original view on our postmodern era and architectural culture Authors Sylvain De Bleeckere and Sebastiaan Gerards outline the ideas of thinkers such as Edmund Husserl Paul Ricoeur Emmanuel Levinas and Peter Sloterdijk and explore important work of famous architects such as Daniel Libeskind and Frank Gehry as well as rather underestimated architects like Gnter Behnisch and Sep Ruf With more than 100 black and white images this book will help you to adopt the design method in your own work *Architectures* Andrew Ballantyne, 2008-04-15 Architectures Modernism and After surveys the history of the building from the advent of industrialization to the cultural imperatives of the present moment Brings together international art and architectural historians to consider a range of topics that have influenced the shape profile and aesthetics of the built environment Presents crucial moments in the history of the field when the architecture of the past is made to respond to new and changing cultural circumstances Provides a view of architectural history as a part of a continuing dialogue between aesthetic criteria and social and cultural imperatives Part of the New Interventions in Art History Series which is published in conjunction with the Association of Art Historians

Architectures of Poetry , 2021-09-06 Architectures of Poetry is the first comprehensive accounting of the currently intense dialogue between the sister arts of poetry and architecture Refusing to take either term in a metaphoric sense the eleven essays collected in this volume exemplify an exciting methodological direction for work in the humanities a literal wager that is willing to take the unintended suggestions of language as reality At the same time they also provide close readings of the work of a number of important writers In addition to a suite of essays devoted to the team of Arakawa and Madeline Gins chapters focus on figures as diverse as Francesco Borromini Rainer Maria Rilke St phane Mallarm Friedrich Achleitner John Cage and Lyn Hejinian Down Detour Road Eric J. Cesal, 2010-08-06 A young architect s search for new architectural values in a time of economic crisis I paused at the stoop and thought this could be the basis of a good book The story of a young man who went deep into the bowels of the academy in order to understand architecture and found it had been on his doorstep all along This had an air of hokeyness about it but it had been a tough couple of days and I was feeling sentimental about the warm confines of the studio which had unceremoniously discharged me upon the world from Down Detour Road What does it say about the value of architecture that as the world faces economic and ecological crises unprecedented numbers of architects are out of work This is the question that confronted architect Eric Cesal as he finished graduate school at the onset of the worst financial meltdown in a generation Down Detour Road is his journey one that begins off course and ends in a hopeful new vision of architecture Like many architects of his generation Cesal confronts a cold reality Architects may assure each other of their own importance but society has come to view architecture as a luxury it

can do without For Cesar this recognition becomes an occasion to rethink architecture and its value from the very core He argues that the times demand a new architecture an empowered architecture that is useful and relevant New architectural values emerge as our cultural values shift from high risks to safe bets from strong portfolios to strong communities and from clean lines to clean energy This is not a book about how to run a firm or a profession it doesn't predict the future of architectural form or aesthetics It is a personal story and in many ways a generational one a story that follows its author on a winding detour across the country around the profession and into a new architectural reality The Darkness of the Present Steve McCaffery, 2012-11-19 The Darkness of the Present includes essays that collectively investigate the roles of anomaly and anachronism as they work to unsettle commonplace notions of the contemporary in the field of poetics In the eleven essays of The Darkness of the Present poet and critic Steve McCaffery argues that by approaching the past and the present as unified entities the contemporary is made historical at the same time as the historical is made contemporary McCaffery's writings work against the urge to classify works by placing them in standard literary periods or disciplinary partitions Instead McCaffery offers a variety of insights into unusual and ingenious affiliations between poetic works that may have previously seemed distinctive He questions the usual associations of originality and precedence In the process he repositions many texts within genealogies separate from the ones to which they are traditionally assigned The chapters in The Darkness of the Present might seem to present an eclectic faade and can certainly be read independently They are linked however by a common preoccupation reflected in the title of the book the anomaly and the anachronism and the way their empirical emergence works to unsettle a steady notion of the contemporary or new Frederick Kiesler Shirley Haines-Cooke, 2009-03-26 The material for this book has been taken from the 2006 thesis Frederick Kiesler's Art of This Century in New York 1942 1947 in the Context of the Twentieth Century Art Museum The prime objective was to establish why so few people remember Art of This Century which Kiesler designed for Peggy Guggenheim in 1942 and she ruthlessly closed in 1947 A second aim was to investigate why there has been so much research carried out on the Gallery when it was acknowledged as a work of art in its own right at the time of opening Indeed in 2004 Thomas Krens the Guggenheim Foundation's director expressed concern that due to the lack of research it might slip into oblivion Such a statement raises questions as to why it has taken the Guggenheim Foundation over half a century to resurrect Art of This Century in the form of two exhibitions held in Frankfurt and Venice or instigate its own research The book opens with an historical account of the development of the modern art museum as well as an overview of Kiesler's life and multidisciplinary oeuvre His association with selected contemporary architectural theorists and architects is looked at to establish whether they had any influence on his eclectic thinking This is followed by a summary of Kiesler's manifesto On Correalism and Biotechnique A Definition of a New Approach to Building Design 1937 1939 The main body of the work is a detailed description of Art of This Century The notion that Kiesler's innovative theories and designs might be better understood in a twenty first century architectural

context is finally explored This book finally restores Frederick Kiesler to his rightful place in the history of twentieth century art and architecture By a careful analysis of his sometimes fraught collaboration with the mercurial Peggy Guggenheim Haines Cooke uncovers the fascinating story of Kiesler's ground breaking new vision for the display of abstract art rendered all the more poignant by its significant yet largely subliminal influence on much of the best in recent museum and gallery architecture Dr Jonathan Hale University of Nottingham

A Time for the Humanities Tim Dean, Ewa Plonowska Ziarek, 2009-08-25 This book brings together an international roster of renowned scholars from disciplines including philosophy political theory intellectual history and literary studies to address the conceptual foundations of the humanities and the question of their future What notions of the future of the human and of finitude underlie recurring anxieties about the humanities in our current geopolitical situation How can we think about the unpredictable and unthought dimensions of praxis implicit in the very notion of futurity The essays here argue that the uncertainty of the future represents both an opportunity for critical engagement and a matrix for invention Broadly conceived the notion of invention or cultural poesis questions the key assumptions and tasks of a whole range of practices in the humanities beginning with critique artistic practices and intellectual inquiry and ending with technology emancipatory politics and ethics The essays discuss a wide range of key figures e.g. Deleuze Freud Lacan Foucault Kristeva Irigaray problems e.g. becoming kinship and the foreign disposable populations within a global political economy queerness and the death drive the parapoetic electronic textuality invention and accountability political and social reform in Latin America disciplines and methodologies philosophy art and art history visibility political theory criticism and critique psychoanalysis gender analysis architecture literature art The volume should be required reading for all who feel a deep commitment to the humanities its practices and its future

Contemporary Poetics Louis Armand, 2007 Exploring the boundaries of one of the most contested fields of literary study a field that in fact shares territory with philology aesthetics cultural theory philosophy and even cybernetics this volume gathers a body of critical writings that taken together broadly delineate a possible poetics of the contemporary In these essays the most interesting and distinguished theorists in the field renegotiate the contours of what might constitute contemporary poetics ranging from the historical advent of concrete poetry to the current technopoetics of cyberspace Concerned with a poetics that extends beyond our own time as a mere marker of present day literary activity their work addresses the limits of a writing practice beginning with Stéphane Mallarmé in the late nineteenth century that engages concretely with what it means to be contemporary Charles Bernstein's Swiftian satire of generative poetics and the textual apparatus together with Marjorie Perloff's critical historical treatment of writing after Bernstein and other proponents of language poetry provides an itinerary of contemporary poetics in terms of both theory and practice The other essays consider precursors recognizable figures within the histories or prehistories of contemporary poetics from Kafka and Joyce to Wallace Stevens and Kathy Acker conjunctions in which more strictly theoretical and poetical texts enact a concerted engagement

with rhetoric prosody and the vicissitudes of intelligibility cursors which points to the open possibilities of invention from Augusto de Campos's concrete poetics to the codework of Alan Sondheim and transpositions defining the limits of poetic invention by way of technology Intelligent Environments P. Droege, 1997-03-20 The environment as modified and created by people is largely about the use of information its generation and exchange How do recent innovations in the technologies of information management and communication affect our use of space and place and the way we perceive and think about our surroundings This volume provides an international exploratory forum for the complex phenomenon of new information and communication technology as it permeates and transforms our physical world and our relation to it the architectural definition of our surrounding geographical space urban form and immediate habitats This book is a reader an attempt at registering disciplinary changes in context at tracing subtexts for which most mainstream disciplines have no established language The project is to give voice to an emerging meta discipline that has its logic across the specializations A wide range of professionals and academics report findings views and ideas Together they describe the architecture of a postmodern paradigm how swiftly mutating the proliferating technology applications have begun to interact with the construction and reading of physical space in architecture economics geography history planning social sciences transport visual art but also in the newer domains that have joined this spectrum through the very nature of their impacts information technology and telecommunications The space navigated in this volume is vast both in physical terms and in its virtual and analogous form It ranges from the space that immediately encompasses or is simulated to encompass the human body as in buildings and virtual tectonics to that of towns and regions We stay clear of molecular scale space and of dimensions that are larger than earth *Eric Owen Moss* Paola Giaconia, 2006 During the last decade Eric Owen Moss built a critical fortune with a series of elaborations of the de constructivist theories of the 1990s Considered one of the most innovative North American architects working today Eric Owen Moss is known for reinventing spaces for commercial uses and performing arts facilities Moss plans have breathed new life into marginal urban Los Angeles areas such as his celebrated sequence of buildings in Culver City's Hayden Tract This monograph features 250 illustrations including the Wedgewood Holly Complex the Beehive and the Box Eric Owen Moss opened his office in Los Angeles in 1973 In addition to practicing he has held professorial chairs at Yale Harvard and his current position is at the Southern California Institute of Architecture The dotCrime Manifesto Phillip Hallam-Baker, 2007-12-29 Internet crime keeps getting worse but it doesn't have to be that way In this book Internet security pioneer Phillip Hallam Baker shows how we can make the Internet far friendlier for honest people and far less friendly to criminals The dotCrime Manifesto begins with a revealing new look at the challenge of Internet crime and a surprising look at today's Internet criminals You'll discover why the Internet's lack of accountability makes it so vulnerable and how this can be fixed technically politically and culturally Hallam Baker introduces tactical short term measures for countering phishing botnets spam and other forms of Internet crime Even more important he presents a comprehensive plan for implementing

accountability driven security infrastructure a plan that draws on tools that are already available and rapidly emerging standards and products The result a safer Internet that doesn't sacrifice what people value most power ubiquity simplicity flexibility or privacy Tactics and strategy protecting Internet infrastructure from top to bottom Building more secure transport messaging identities networks platforms and more Gaining safety without sacrificing the Internet's unique power and value Making the Internet safer for honest people without sacrificing ubiquity simplicity or privacy Spam draining the swamp once and for all Why spam contributes to virtually every form of Internet crime and what we can do about it Design for deployment how to really make it happen Defining security objectives architecture strategy and design and evangelizing them

[The Manifesto Handbook](#) Julian Hanna, 2020-01-31 The Manifesto Handbook describes the hidden life of an undervalued genre the conduit for declarations of principle advertisements for new isms and provocations in pamphlet form Often physically slight and small in scale the manifesto is always grand in style and ambition A bold charismatic genre it has founded some of the most important and revolutionary movements in modern history from the declaration of wars and the birth of nations to the launch of countless social political and artistic movements worldwide Julian Hanna provides a brief genealogy of the genre analyses its complex speaking position traces the material process of manifesto making from production to dissemination unpacks its extremist underbelly and follows the twenty first century resurgence of the manifesto as a re politicised and reinvigorated digital form
