Cultural Contact and Linguistic Relativity Among the Indians of Northwestern California Sean O'Neill, 2008. Examines the linguistic relativity principle in relation to the Hupa, Yurok, and Karuk Indians. Despite centuries of intertribal contact, the American Indian peoples of northwestern California have continued to speak a variety of distinct languages. At the same time, they have come to embrace a common way of life based on salmon fishing and shared religious practices. In this thought-provoking re-examination of the hypothesis of linguistic relativity, Sean O'Neill looks closely at the Hupa, Yurok, and Karuk peoples to explore the striking juxtaposition between linguistic diversity and relative cultural uniformity among their communities. O'Neill examines intertribal contact, multilingualism, storytelling, and historical change among the three tribes, focusing on the traditional culture of the region as it existed during the late nineteenth and early twentieth centuries. He asks important historical questions at the heart of the linguistic relativity hypothesis: Have the languages, in fact, grown more similar as a result of contact, multilingualism, and cultural convergence? Or have they instead maintained some of their striking grammatical and semantic differences? Through comparison of the three languages, O'Neill shows that long-term contact among the tribes intensified their linguistic differences, creating unique Hupa, Yurok, and Karuk identities. If language encapsulates worldview as the principle of linguistic relativity suggests, then this region's linguistic diversity is puzzling. Analyzing patterns of linguistic accommodation as seen in the semantics of space and time, grammatical classification, and specialized cultural vocabularies, O'Neill resolves the apparent paradox by assessing long-term effects of contact.

*Walking to Magdalena* Seth Schermerhorn, 2019-04-01. In *Walking to Magdalena*, Seth Schermerhorn explores a question that is central to the interface of religious studies and Native American and indigenous studies: What have Native peoples made of Christianity? By focusing on the annual pilgrimage of the Tohono O'odham to Magdalena in Sonora, Mexico, Schermerhorn examines how these indigenous people of southern Arizona have made Christianity their own. This walk serves as the entry point for larger questions about what the Tohono O'odham have made of Christianity. With scholarly rigor and passionate empathy, Schermerhorn offers a deep understanding of Tohono O'odham Christian traditions as practiced in everyday life and in the words of the O'odham themselves. The author's rich ethnographic description and analyses are also drawn from his experiences accompanying a group of O'odham walkers on their pilgrimage to Saint Francis in Magdalena. For many years, scholars have agreed that the journey to Magdalena is the largest and most significant event in the annual cycle of Tohono O'odham Christianity. Never before, however, has it been the subject of sustained scholarly inquiry. *Walking to Magdalena* offers insight into religious life and expressive culture, relying on extensive field study, videotaped and transcribed oral histories of the O'odham, and archival research. The book illuminates indigenous theories of personhood and place in the

everyday life narratives songs and material culture of the Tohono O odham

**Long and Winding Roads, Revised Edition** Kenneth Womack,2022-12-15 In Long and Winding Roads The Evolving

Artistry of the Beatles Revised Edition Kenneth Womack brings the band's story vividly to life from their salad days as a Liverpool Skiffle group and their apprenticeship in the nightclubs and mean streets of Hamburg through their early triumphs at the legendary Cavern Club and the massive onslaught of Beatlemania itself By mapping the group's development as an artistic fusion Womack traces the Beatles creative arc from their first primitive recordings through Abbey Road and the twilight of their career In this revised edition Womack addresses new insights in Beatles related scholarship since the original publication of Long and Winding Roads along with hundreds of the group's outtakes released in the intervening years The updated edition also affords attention to the Beatles musical debt to Rhythm and Blues as well as to key recent discoveries that vastly shift our understanding of formative events in the band's timeless story     Long History, Deep Time Ann McGrath, Mary Anne Jebb, 2015-08-17 The vast shape shifting continent of Australia enables us to take a long view of history We consider ways to cross the great divide between the deep past and the present Australia's human past is not a short past so we need to enlarge the scale and scope of history beyond 1788 In ways not so distant these deeper times happened in the same places where we walk today Yet they were not the same places having different surfaces ecologies and peoples Contributors to this volume show how the earth and its past peoples can wake us up to a sense of place as history as a site of both change and continuity This book ignites the possibilities of what the spaces and expanses of history might be Its authors reflect upon the need for appropriate feasible timescales for history pointing out some of the obstacles encountered in earlier efforts to slice human time into thematic categories Time and history are considered from the perspective of physics archaeology literature western and Indigenous philosophy Ultimately this collection argues for imaginative new approaches to collaborative histories of deep time that are better suited to the challenges of the Anthropocene Contributors to this volume including many leading figures in their respective disciplines consider history's temporality and ask how history might expand to accommodate a chronology of deep time Long histories that incorporate humanities science and Indigenous knowledge may produce deeper meanings of the worlds in which we live     From Paris to Pompeii Göran Blix, 2013-09-04 In the early nineteenth century as amateur archaeologists excavated Pompeii Egypt Assyria and the first prehistoric sites a myth arose of archaeology as a magical science capable of unearthing and reconstructing worlds thought to be irretrievably lost This timely myth provided an urgent antidote to the French anxiety of amnesia that undermined faith in progress and it armed writers from Chateaubriand and Hugo to Michelet and Renan with the intellectual tools needed to affirm the indestructible character of the past From Paris to Pompeii reveals how the nascent science of archaeology lay at the core of the romantic experience of history and shaped the way historians novelists artists and the public at large sought to cope with the relentless change that relegated every new present to history In postrevolutionary France the widespread desire to claim that no being city culture or language was ever definitively erased ran much deeper than mere nostalgic and reactionary impulses Göran Blix contends that this desire was the cornerstone of the substitution of a weak secular form of

immortality for the lost certainties of the Christian afterlife Taking the iconic city of Pompeii as its central example and ranging widely across French romantic culture this book examines the formation of a modern archaeological gaze and analyzes its historical ontology rhetoric of retrieval and secular theology of memory before turning to its broader political implications
