The Image Is Everything Presidency Gilbert St. Clair, 2018-03-09 Image is everything Today our television and movie stars our athletes and our politicians carefully craft images for public consumption Even our country s Executive Chief is not immune to a bit of image manipulation If presidents can not always actually satisfy the public s excessive contradictory and unrealistic expectations they can at least present a compelling image of presidential leadership and success When it comes to the modern presidency tennis star Andre Agassi was correct Image is everything Image creation is a serious business with critically important implications for the success of any politician But presidents must be careful in deciding how they craft the ways in which we perceive them If they are to succeed presidents must present an appropriate

image of leadership to the American people an image that is appropriate for the particular needs of the time when the president governs and is appropriate to the personality of that president Their ultimate goal is to convince the public that they are actually providing leadership even if in reality they have only a limited ability to effect outcomes This book examines the way American presidents in the media age have shaped their public personas as a means of cultivating and advancing their political and ideological agendas Images play an important role in the perceived success or failure of our presidents Since public expectations are most often aimed directly at the White House and its central occupant it is more important than ever that a president control his image as well as presenting the right image to the American public Reality thus becomes secondary and image is everything *Public Images* Ryan Linkof,2020-08-12 The stolen snapshot is a staple of the modern tabloid press as ubiquitous as it is notorious The first in depth history of British tabloid photojournalism this book explores the origin of the unauthorised celebrity photograph in the early 20th century tracing its rise in the 1900s through to the first legal trial concerning the right to privacy from photographers shortly after the Second World War Packed with case studies from the glamorous to the infamous the book argues that the candid snap was a tabloid innovation that drew its power from Britain s unique class tensions Used by papers such as the Daily Mirror and Daily Sketch as a vehicle of mass communication this new form of image played an important and often overlooked role in constructing the idea of the press photographer as a documentary eyewitness From Edward VIII and Wallis Simpson to aristocratic debutantes Lady Diana Cooper and Margaret Whigham the rage of the social elite at being pictured so intimately without permission was matched only by the fascination of working class readers while the relationship of the British press to social economic and political power was changed forever Initially pioneered in the metropole tabloid style photojournalism soon penetrated the journalistic culture of most of the globe This in depth account of its social and cultural history is an invaluable source of new research for historians of photography journalism visual culture media and celebrity studies *American Photo* ,2006-03 **American Photo** ,2006-07 **Mind, Matter and Quantum Mechanics** Henry P. Stapp,2009-02-12 Leading quantum physicist Stapp focuses in this book on the problem of consciousness and explains how quantum mechanics allows causally effective conscious thought to be combined in a natural way with the physical brain made of neurons and atoms Imperial persuaders Anandi Ramamurthy,2017-03-01 The first book to provide an historical survey of images of black people in advertising during the colonial period Analyses the various conflicting and changing ideologies of colonialism and racism in British advertising Reveals the historical and production context of many well known advertising icons as well as the specific commercial interests that various companies images projected Provides a chronological understanding of changing colonial ideologies in relation to advertising while each chapter explores images produced to sell specific products such as soap cocoa tea and tobacco *The Iron Lady: The Indomitable Spirit Of Margaret Thatcher* Nicky Huys,2024-02-23 The Iron Lady The Indomitable Spirit of Margaret Thatcher delves into the life and legacy of one of the most influential political figures of the

20th century From her rise to becoming the first female Prime Minister of the United Kingdom to her unwavering leadership during times of political upheaval this book provides a compelling portrayal of Thatcher s indomitable spirit and the impact of her policies on Britain and the world Through insightful analysis and firsthand accounts readers will gain a deep understanding of Thatcher s resilience determination and enduring legacy as a transformative leader *The Soul of Theological Anthropology* Joshua R. Farris,2016-11-25 Recent research in the philosophy of religion anthropology and philosophy of mind has prompted the need for a more integrated comprehensive and systematic theology of human nature This project constructively develops a theological accounting of human persons by drawing from a Cartesian as a term of art model of anthropology which is motivated by a long tradition As was common among patristics medievals and Reformed Scholastics Farris draws from philosophical resources to articulate Christian doctrine as he approaches theological anthropology Exploring a substance dualism model the author highlights relevant theological texts and passages of Scripture arguing that this model accounts for doctrinal essentials concerning theological anthropology While Farris is not explicitly interested in thorough critique of materialist ontology he notes some of the significant problems associated with it Rather the present project is an attempt to revitalize the resources found in Cartesianism by responding to some common worries associated with it **American Images of China** Oliver Turner,2014-04-16 The United States and China are arguably the most globally consequential actors of the early twenty first century and look set to remain so into the foreseeable future This volume seeks to highlight that American images of China are responsible for constructing certain truths and realities about that country and its people It also introduces the understanding that these images have always been inextricable from the enactment and justification of US China policies in Washington and that those policies themselves are active in the production and reproduction of imagery and in the protection of American identity when seemingly threatened by that of China Demonstrating how past American images of China are vital to understanding the nature and significance of those which circulate today Turner addresses three key questions What have been the dominant American images of China and the Chinese across the full lifespan of Sino US relations How have historical and contemporary American images of China and the Chinese enabled and justified US China policy What role does US China policy play in the production and reproduction of American images of China Exploring and evaluating a wide ranging variety of sources including films and television programmes newspaper and magazine articles the records and journals of politicians and diplomats and governmental documents including speeches and legal declarations this work will be of great interest to students and scholars of US foreign policy American politics China studies and international relations The Social Photo Nathan Jurgenson,2019-04-30 Mr Jurgenson makes a first sortie toward a new understanding of the photograph wherein artistry or documentary intent have given way to communication and circulation Like Susan Sontag s *On Photography* to which it self consciously responds *The Social Photo* is slim hard bitten and picture free New York Times A set of bold theoretical reflections on how the social

photo has remade our world With the rise of the smart phone and social media cameras have become ubiquitous infiltrating nearly every aspect of social life The glowing camera screen is the lens through which many of us seek to communicate our experience But our thinking about photography has been slow to catch up this major fixture of everyday life is still often treated in the terms of art or journalism In *The Social Photo* social theorist Nathan Jurgenson develops bold new ways of understanding photography in the age of social media and the new kinds of images that have emerged the selfie the faux vintage photo the self destructing image the food photo Jurgenson shows how these devices and platforms have remade the world and our understanding of ourselves within it **Japan and Russia** Yulia Mikhailova, M. William Steele, 2008-08-28

This volume recognizes the growing awareness of the importance of images in international relations exploring the phenomenon over three centuries as it relates to Russia and Japan The general perception of one country by another the stereotypical collective mentality is an historic phenomenon that continues to be a fundamental component in international relations at all levels but especially in the political and business arenas and remains an ongoing challenge for future generations Bringing together international scholars from various disciplines this innovative study focuses especially on modes of seeing and on the enigma of visual experience It draws on numerous visual representations from propaganda posters and cartoons to artworks and films and to more recent media such as television the internet pop culture icons as well as direct visual encounters The volume raises questions of how different cultures observe understand and represent each other how and why mutual representations have changed or remained unchanged during the long history of Japanese Russian interactions what mental frameworks exist on both sides of the encounter and how visions of otherness influence the construction of national cultural and social identities *A Posthumous History of José Martí* Alfred J. López, 2022-09-16

A Posthumous History of José Martí The Apostle and His Afterlife focuses on Martí's posthumous legacy and his lasting influence on succeeding generations of Cubans on the island and abroad Over 120 years after his death on a Cuban battlefield in 1895 Martí studies have long been the contested property of opposing sides in an ongoing ideological battle Both the Cuban nation state which claims Martí as a crucial inspiration for its Marxist revolutionary government and diasporic communities in the US who honor Martí as a figure of hope for the Cuban nation in exile insist on the centrality of his words and image for their respective visions of Cuban nationhood The book also explores more recent scholarship that has reassessed Martí's literary cultural and ideological value allowing us to read him beyond the Havana Miami axis toward engagement with a broader historical and geographical tableau Martí has thus begun to outgrow his mutually reinforcing cults in Cuba and the diaspora to assume his true significance as a hemispheric and global writer and thinker **Artistic Approaches to Cultural**

Wooden Images Juanita Ballew Wood, 1999 Using 163 photographs of images carved on the underside of medieval choir stalls in the churches and cathedrals of England in the thirteenth through sixteenth centuries this work provides a spirited examination of the social history of ordinary men and women during the late medieval period This examination is particularly useful in that the choir stalls have become less accessible to the public in recent years Misericords have received some scholarly attention but this work is the first to interpret the carvings as social commentary They are not examined as decorative embellishments or pieces of church furniture but rather read as intimate glimpses into the thoughts actions and beliefs of a segment of the English medieval population Whatever amused angered frightened or elated the common person is recorded here in these extraordinary records

Describing Inner Experience? Russell Hurlburt, Eric Schwitzgebel, 2011-08-19 A psychologist and a philosopher with opposing viewpoints discuss the extent to which it is possible to report accurately on our own conscious experience considering both the reliability of introspection in general and the

particular self reported inner experiences of Melanie a subject interviewed using the Descriptive Experience Sampling method Can conscious experience be described accurately Can we give reliable accounts of our sensory experiences and pains our inner speech and imagery our felt emotions The question is central not only to our humanistic understanding of who we are but also to the burgeoning scientific field of consciousness studies The two authors of Describing Inner Experience disagree on the answer Russell Hurlburt a psychologist argues that improved methods of introspective reporting make accurate accounts of inner experience possible Eric Schwitzgebel a philosopher believes that any introspective reporting is inevitably prone to error In this book the two discuss to what extent it is possible to describe our inner experience accurately Hurlburt and Schwitzgebel recruited a subject Melanie to report on her conscious experience using Hurlburt s Descriptive Experience Sampling method in which the subject is cued by random beeps to describe her conscious experience The heart of the book is Melanie s accounts Hurlburt and Schwitzgebel s interviews with her and their subsequent discussions while studying the transcripts of the interviews In this way the authors dispute about the general reliability of introspective reporting is steadily tempered by specific debates about the extent to which Melanie s particular reports are believable Transcripts and audio files of the interviews will be available on the MIT Press website Describing Inner Experience is not so much a debate as it is a collaboration with each author seeking to refine his position and to replace partisanship with balanced critical judgment The result is an illumination of major issues in the study of consciousness from two sides at once

Images of the North Sverrir Jakobsson,2009 This interdisciplinary volume seeks to examine and explore the various issues surrounding image construction identity making and representations of the North as well as the interconnectedness between those issues The aim is to elucidate the multiple aspects of the idea of the North both as a mythological space and a discursive system created and shaped by cultures outside the North as well as from within The objective of the research project Iceland and Images of the North is to elucidate several aspects of images of the North and to explore their functions in the present focusing especially on Iceland What effect have Iceland and its people had on images of the North and how do those images influence the Icelanders and other nations The project will be a cooperative interdisciplinary undertaking by researchers in the humanities and social sciences

Investigations into the Origin of Language and Consciousness Trần Duc Thao,2012-12-06 Tran Duc Thao a wise and learned scientist and an eminent Marxist philosopher begins this treatise on the origins of language and consciousness with a question One of the principal difficulties of the problem of the origin of consciousness is the exact determination of its beginnings Precisely where must one draw the line between the sensori motor psychism of animals and the conscious psychism that we see developing in man And then he cites Karl Marx s famous passage about the bee and the architect from Capital what distinguishes the worst architect from the best of bees is this that the architect raises his structure in the imagination before he erects it in reality At the end of every labor process we get a result that already existed in the imagination of the laborer at its commencement Capital Vol I p

178 tr Moore and Aveling Thao follows this immediately with a second question But is this the most elementary form of consciousness Thus the conundrum concerning the origins of consciousness is posed as a circle if human consciousness pre supposes representation of the external reality of mental awareness of actions of what it may and if this consciousness emerges first with the activity of production using tools and if the production of tools itself pre supposes representation that is with an image of what is to be produced in the mind of the producer then the conditions for the origins of human
