of the concept of Russia's security developed by Dugin discusses the subject and main dimensions of Russia's national security in Dugin's works and shows the importance of Russia's foreign policy for the creation of its national security

The British Miner in the Age of De-Industrialization Jörg Arnold, 2023-10-03 The British coal industry no longer exists and yet the figure of the coal miner lives on in the British cultural imagination In feature films and documentaries miners are typically portrayed as proletarian traditionalists working in a dying industry Taking this perspective the 1984-85 miners strike seems a desperate last stand against forces much bigger than the miners themselves not just the Thatcher government but the tide of historical change itself In this ground breaking study Jörg Arnold challenges a declinist reading of the people working in one of Britain's most important energy industries The study makes extensive use of previously inaccessible records to offer a new account of the British miner in the age of de-industrialisation The book situates the miners in broader structures of feeling and reconstructs the miners sense of the past and the future Arnold argues that Britain's miners went through a cyclical movement from loser to winner and back again as Britain underwent a de-industrial revolution in the final decades of the twentieth century The book reinserts the industry's new dawn of the 1970s into the story of coal and shows that the miners wielded real power The industry's reversal of fortunes inscribed in Plan for Coal 1974 proved short lived It was significant all the same Its significance the book argues did not lie in affecting the long term trajectory of the coal industry Rather the new dawn was important in raising the political and cultural stakes The miners found themselves at the centre of sharply conflicting visions of the future at a critical juncture in Britain's history The figure of the coal miner became invested with sharply contrasting characteristics hero and villain underdog and enemy proletarian traditionalist and standard bearer of Socialist advance The miners were no mere spectators in this process They were agents thought to be uniquely powerful by their numerous opponents and half believing in this power themselves The miners special nature however jarred with the aspiration to lead an ordinary life producing tensions that were most cruelly exposed in the year long strike of 1984-1985
