### **Social Emotions and Their Influences**

Huiyan Lin, Giorgio Coricelli, Chunliang Feng, Siyang Luo, Steven Young, 2023-06-06 The common dimensional model of emotion has emphasized that emotional information is generally processed from two dimensions valence from negative to positive and arousal from low to high Recently several theories have proposed that emotions also vary along a sociality dimension ranging from non social emotions i.e. basic biological drives to social emotions i.e. complex social interactions Specifically non social emotions e.g. fear are derived from incentives or aversive emotions that have direct physiological relevance whereas social emotions e.g. guilt are elicited within the context of social information processing or social cognition Multiple empirical studies have investigated the processing of non social emotions and the influences of these emotions on other cognitive processes However questions regarding social emotion processes and their influences are still open For example little is known about psychological and neural mechanisms underlying different social emotions processes e.g. guilt shame love envy and pride the development and individual differences of social emotions or the influences of social emotions on social behaviors and decision making Therefore this Research Topic aims to gain a deeper understanding of how different social emotions are processed among different populations and how these social emotions influence other cognitive processes We aim to have a collection of studies which extend the theoretical technical and empirical knowledge about psychological and neural mechanisms underlying social emotions processes as well as the influences of these processes on other cognitive processes in particular on social decision making We encourage studies from different domains e.g. emotion behavioural economics and decision making implemented by different techniques e.g. behaviour electrophysiology neuroimaging and brain stimulations among different populations e.g. healthy adults children and elderly persons with psychological traits and personalities and psychiatric patients

**Affective Meditation and the Invention of Medieval Compassion** Sarah McNamer,2011-07-07 Affective meditation on the Passion was one of the most popular literary genres of the high and later Middle Ages Proliferating in a rich variety of forms these lyrical impassioned script like texts in Latin and the vernacular had a deceptively simple goal to teach their readers how to feel They were thus instrumental in shaping and sustaining the wide scale shift in medieval Christian sensibility from fear of God to compassion for the suffering Christ Affective Meditation and the Invention of Medieval Compassion advances a new narrative for this broad cultural change and the meditative writings that both generated and reflected it Sarah McNamer locates women as agents in the creation of the earliest and most influential texts in the genre from John of F camp s Libellus to the Meditationes Vitae Christi thus challenging current paradigms that cast the compassionate affective mode as Anselmian or Franciscan in origin The early development of the genre in women s practices had a powerful and lasting legacy With special attention to Middle English texts including Nicholas Love s Mirror and a wide range of Passion lyrics and laments Affective Meditation and the Invention of Medieval Compassion illuminates how these scripts for the performance of prayer served to construct compassion itself as an intimate and feminine emotion To feel compassion for Christ in the private drama of the heart that these texts stage was to feel like a woman This was an assumption about emotion that proved historically consequential McNamer demonstrates as she traces some of its legal ethical and social functions in late medieval England      **Social Economies of Fear and Desire** V. Nicol,2011-12-19 All

behaviours indeed all forms of agency are viewed as emotionally driven This book provides an approach to emotional experience and agency which drastically nuances the commonly held view that fear has predominantly irrational morally or ideologically suspect effects which thwart the exercise of autonomy      *Beyond Liberalism* R. T. Allen,2017-11-30 In Beyond Nihilism Michael Polanyi argued that a merely negative liberty of doing as one pleases so long as one does not impinge upon the equal liberty of others must and has led to destructive nihilism and a fierce reaction to collectivism R T Allen takes up this argument in Beyond Liberalism and shows how Polanyi s political philosophy evolved into a more positive and distinctly conservative concept of liberty converging upon the archetypal conservatism of Edmund Burke Allen examines Polanyi s and F A Hayek s thinking with respect to the nature value and foundations of liberty Negative and positive liberties are two sides of one liberty and Allen believes negative conceptions of liberty are as dangerous as positive ones He distinguishes among general and abstract definitions of liberty and shows how all including that of Hayek ultimately dissolve According to Allen only tacit conceptions of liberty such as those of Burke and Polanyi prove viable This is because they rest on concrete

tradition Allen examines how the skeptical rationalist and utilitarian philosophies of Ludwig von Mises and Sir Karl Popper fail to support the value of liberty and even proved to be destructive of it Allen argues that society cannot rely upon the classically liberal notion of contract but rather upon prescriptive and inherited obligations In turn this means that citizens have positive as well as negative duties to each other and the body politic of which they are part and upon whose support liberty depends A free society is held together by emotional bonds and the traditions and rituals that sustain them A free society also presupposes that the individual has inherent value in and for himself For R T Allen only Christianity and certainly no modern philosophy has a conception of the unique individual and his irreplaceable value and of a political order that transcends itself into the moral order Even Polanyi s liberty is ultimately insufficient for it gives no inherent value to the person himself but instead to the ideals which he serves Beyond Liberalism challenges deeply ingrained notions of liberty and its meaning in modern society It is a call for traditions of self restraint and justice for their own sakes This noteworthy volume is an essential addition to the libraries of political scientists philosophers and theologians alike
