Speaking of the wounded childhood is acknowledging childhood as the most important period in the emotional construction of an individual 6 This does not imply ceasing to consider the emotional wounds whose origin comes from adolescence or adulthood 7 Childhood emotional wounds tend to occur in the context of early relationships with parents or caregivers as well as with siblings or other figures of the nuclear family It is also necessary to add the school environment 8 The wounded childhood refers especially to the complex relational trauma i e the intolerable and chronic suffering or pain that happens every day during development and frequently in the context of significant and close interpersonal relationships 9 If the wounded childhood is a mistreated childhood then its opposite is a well treated childhood 10 An upbringing based on good treatment and on an education for non violence are fundamental pillars of mental health
