Sparks, 2025-07-11 This book traces and summarizes theoretical insights and empirical findings on the topic of whether or not anxiety for language learning could be a causal variable for individual differences in language learning The author brings together three decades of research to show that first language L1 skills and second language L2 aptitude are confounding variables in studies of language anxiety and that learners levels of anxiety for L2 learning are strongly related to their levels of language achievement These findings have suggested that language anxiety instruments reflect students accurate self perceptions of their language skills and their levels of L1 achievement and L2 aptitude The research presented in this book holds the potential to change the ways in which L2 educators and researchers think about language anxiety how language anxiety is assessed how investigations into language anxiety are conducted and how L2 teachers respond to anxiety in the classroom      **A New New English** Anja Kellermann, 2001 Gibraltar is a mere 2.5 square miles of British rock at the southern tip of the Iberian peninsula Yet this microcosm is home to 20 000 Gibraltarians In the wake of age old geo political social and cultural tensions a unique language contact situation has emerged Since the arrival of the British in 1704 Spanish and English have coexisted in the colony English as the language of the colonial masters and Spanish Yanito as that of the local people Over the last 60 years however this diglossic situation has gradually changed with the Gibraltarians adopting English as their mother tongue The result has been the institutionalisation of the language and the emergence of a new New English This empirical study conducts an instrumental analysis of this localised form of English revealing its nativisation process The analysis pinpoints the distinctive features of Gibraltarian English and posits that a focussing process is in progress Implementing a qualitative quantitative analysis of sociolinguistic data the author also explores the mechanisms behind the speech community s language usage attitudes and ideology Over time Gibraltarians changing conceptions about English and Spanish have reflected their

perceived identity of themselves as British and or Gibraltarians This book reveals Gibraltar as speech community in search of an identity It is a people aware of its multicultural heritage determined in its continued rejection of Spanish claims on sovereignty and increasingly ambivalent toward its colonial past *I Can Read & Speak in Spanish* Maurice Hazan,2005
