Corporate Social Responsibility, Accountability and Governance Istemi Demirag, 2018-10-08

The business case for corporate social responsibility which suggests that socially and environmentally aware companies can expect to reap financial rewards is seemingly gaining widespread acceptance within the business community. This is particularly apparent in the ever increasing number of prominent companies parading their social ethical and environmental credentials by producing paper or web based social and environmental or sustainability reports. In so doing reporting companies claim they are demonstrating a clear commitment to transparency and accountability to their key stakeholder groups. However in the prevailing voluntaristic business case centred climate within which such initiatives are taking place little thought appears to have gone into the question of how stakeholders other than the capital provider group can actually use corporate disclosures offered in order to hold management accountable for the social and environmental consequences of their actions. While much corporate rhetoric abounds concerning notions of stakeholder dialogue and engagement rigorous analysis of the governance implications of their claimed commitment to the principles of corporate social responsibility is largely conspicuous by its absence. Corporate Social Responsibility Accountability and Governance seeks to explore this missing link between CSR and associated reporting initiatives and governance mechanisms that are capable of embracing true stakeholder accountability. A wide range of case studies drawing on experiences of both public and private sector initiatives in Europe the United States Canada South America and Asia offer insightful analysis of the complex relationships between the state the market and civil society in the development of CSR accountability and sustainable development. The book employs a multidisciplinary perspective in order to analyse the political social economic technological legal and organisational shaping of CSR. The complexities underpinning the concept are thereby clearly drawn out and the gross oversimplifications inherent in the prevailing consultancy driven business case literature painfully exposed. Above all the book offers a sound practically and theoretically informed contribution to public policy debate and reflects and builds on urgent calls from public and private sector policy makers as well as academics to develop better governance and accountability frameworks for business to deal with the imperatives of social responsibility sustainable development and ethics. This book is divided into five parts. In Part 1 the complex concepts of responsibility accountability and governance are discussed and in particular the presumed relationships between the state the market and civil society in improving accountability and governance are explored and critiqued. Part 2 consists of chapters relating to corporate social responsibility and stakeholder theory. Part 3 is concerned with empirical studies covering governance structures networking and corporate social responsibility. Part 4 deals with corporate governance and its implications for regulators and civil society. Part 5 discusses multinational companies and how they impact on national governance regimes. Finally a summary is provided with emerging international patterns of accountability and governance structures. Corporate Social Responsibility Accountability and Governance will be essential

reading for public and private policy makers and practitioners and academics interested in how CSR can become more than a soundbite and rather a substantial force for better global corporate governance and accountability **Climate-Resilient**

Development Astrid Carrapatoso, Edith Kürzinger, 2013-10-01 The concept of resilience currently infuses policy debates and public discourse and is promoted as a normative concept in climate policy making by governments non governmental organizations and think tanks This book critically discusses climate resilient development in the context of current deficiencies of multilateral climate management strategies and processes It analyses innovative climate policy options at national inter regional and local levels from a mainly Southern perspective thus contributing to the topical debate on alternative climate governance and resilient development models Case studies from Africa Asia and Latin America give a ground level view of how ideas from resilience could be used to inform and guide more radical development and particularly how these ideas might help to rethink the notion of progress in the light of environmental social economic and cultural changes at multiple scales from local to global It integrates theory and practice with the aim of providing practical solutions to improve complement or where necessary reasonably bypass the UNFCCC process through a bottom up approach which can effectively tap unused climate resilient development potentials at the local national and regional levels This innovative book gives students and researchers in environmental and development studies as well as policy makers and practitioners a valuable analysis of climate change mitigation and adaptation options in the absence of effective multilateral provisions
