Supreme Court of the State of New York, Appellate Division-First Department ,1900 The Sufi Message of Hazrat

Inayat Khan: The Sufi Teachings Hazrat Inayat Khan,2020-09-28 Sufism has never had a first exponent or a historical origin It existed from the beginning because man has always possessed the light which is his second nature and light in its higher aspect may be called the knowledge of God the divine wisdom in fact Sufism Sufism has always been practiced and its messengers have been people of the heart thus it belonged to the masters as well as to others Tradition states that Adam was the first prophet which shows that wisdom was already the property of the first man There have always been some among the human race who have desired wisdom These sought out spiritual beings in their solitude serving them with reverence and devotion and learning wisdom from them Only a few could understand those spiritual beings but many were attracted by their great personalities They said We will follow you we will serve you we will believe in you we will never follow any other and the holy ones said to them My children we bless you Do this do that This is the best way to live And they gave their followers precepts and principles such as might produce in them meekness and humility In this way the religions were formed But in the course of time the truth was lost The tendency to dominate arose and with it the patriotism of the community and prejudice against others and thus wisdom was gradually lost Religion was accepted though with difficulty but the evolution of the world at that time was not such as could understand the Sufis They were mocked at ill treated ridiculed they were obliged to hide themselves from the world in the caves of the mountains and in the solitude At the time of Christ there were Sufis among the first of those who gave heed to him and in the time of Muhammad the Sufis on Mount Zafah were the first to respond to his cry One of the explanations of the term Sufi is this association with Mount Zafah Muhammad was the first to open the way for them in Arabia and they had many followers among them Sadik and Ali *The Sufi Message of Hazrat Inayat Khan: The Smiling Forehead* Hazrat Inayat Khan,2020-09-28 By forehead is meant man s expression The smiling forehead is the pleasant expression it depends solely upon man s attitude to life Life is the same for the saint and for Satan and if men are different it is because of their outlook on life The same life is turned by the one into heaven and by the other into hell There are two attitudes to one all is wrong to the other all is right Our life in the world from morning to evening is full of experiences good and bad which can be distinguished according to their degree And the more we study the mystery of good and bad the more we see that there really is no such thing as good and bad It is because of our attitude and the conditions that things seem good or bad It is easy for an ordinary person to say what is good or bad just or unjust it is very difficult for a wise man Although everyone according to his outlook on life turns things from bad to good and from good to bad everyone has his own grade of evolution and reasons accordingly Sometimes one thing is subtler than others and then it is difficult to judge There was a time when Wagner s music was not understood and another time when he was considered

the greatest of musicians Sometimes things are good but our own evolution makes them less good for us What we considered good a few years ago may not seem good at a later degree of evolution At one time a child appreciates a doll most later it will prefer the work of great sculptors This proves that at every step and degree of evolution man's idea of good and bad changes Therefore a thinker will understand that there is no such thing as right or wrong If there is wrong all is wrong if there is right all is right

Solving the Quantum Puzzle. Paradigm Change in Milliseconds Mario Wingert, 2023-11-18 For 100 years almost all physicists have believed that it was no longer possible to understand the true constitution of nature The culprit is the unsolved wave particle paradox the apparent contradiction between wholeness divisibility that subtle smile of nature that was so perplexing that theoretical physics threw in the towel in despair as early as 1927 This was a direct consequence of the Copenhagen Interpretation in which Niels Bohr had postulated an insurmountable barrier of cognition at least for physicists Since then nature has been regarded as bizarre and weird the quantum puzzle as unsolvable and the theory as so complicated that it can no longer be understood by ordinary mortals In reality however the underlying experiments are of a poignant simplicity that even laymen can easily understand geometrically they show holistic division and branching processes and thus refute the atom and elementary particle hypothesis i.e. the atomistic world view Volume 1 introduces the quantum puzzle and identifies the four cognitive problems of quantum physics They are obviously caused by assumptions that are considered proven but must nevertheless be false So we embark on a detective search for clues in the history of ideas in 19th century physics The investigation reveals among other things that the indivisibility hypothesis already failed experimentally justified in the founding days of chemistry which led Avogadro to the hypothesis of divisible atoms called molecules The mechanistic interpretation of this divisibility then led to the salvation of the atomic hypothesis which however around 1927 in quantum physics suddenly proved to be untenable No physicist could make sense of it which led to a hundred year blockade of thought in theoretical physics the atom hypothesis had become a paradigm that apparently could no longer be reasonably questioned

Mao's Road to Power: Revolutionary Writings, 1912-49: v. 6: New Stage (August 1937-1938) Zedong Mao, Stuart Schram, 2015-07-17 By 1936 after a decade of Civil War and even before the Xi an Incident Mao Zedong had begun talking about a New Stage of cooperation between the Guomindang and the Communist Party With the establishment of a framework for cooperation between the two parties and as Japan began its brutal war against China Mao began to develop this theme more systematically in both the political and military spheres This volume documents the evolution of Mao s thinking in this area that found its culmination in his long report to the Sixth Enlarged Plenum of the Central Committee in October 1938 explicitly entitled On the New Stage and presented here in its entirety It was also during this period that Mao delivered a course of lectures on dialectical materialism

after reading and annotating a number of works on Marxist theory by Soviet and Chinese authors These lectures from which On Practice and On Contradiction were later extracted are also translated here in their entirety *Flora capensis* William Henry Harvey, Otto Wilhelm Sonder, 1865 *Flora Capensis* William H. The Opposite Mirrors E. Lagerspetz, 2013-03-09 How do social institutions exist How do they direct our conduct The Opposite Mirrors defends the thesis that the existence of institutions is a conventional matter Ultimately they exist because we believe in their existence and because they play a role in our practical reasoning Human action necessarily has an unpredictable aspect human institutions perform an important task by reducing uncertainty in our interactions The author applies this thesis to the most important institutions the law and the monetary system In his analysis he connects many traditional topics of the philosophy of law social philosophy and the philosophy of social sciences in a new way He discusses the nature of rules authority and power and analyzes the Hobbesian presuppositions which have been dominant in legal theory and in the economic analyses of the state The book is written for legal theorists as well as for political and social philosophers and theoretically oriented social scientists
